Information Technology in Disaster Risk Reduction Terje Gjøsæter, Jaziar Radianti, Yuko Murayama, 2023-05-28 This volume constitutes the refereed and revised post conference proceedings of the 7th IFIP WG 5.15 International Conference on Information Technology in Disaster Risk Reduction ITDRR 2022 held in Kristiansand Norway in October 2022. The 23 full papers presented were carefully reviewed and selected from 33 submissions. The papers focus on various aspects and challenges of coping with disaster risk reduction. The papers are categorized in the following topical subheadings: strategic disaster risk reduction, situational awareness, telecommunications, sensors and drones, collaborative emergency management, cybersecurity and privacy, earthquake and climate forecasting, social media analytics, community resilience. Building Bottom-up Health and Disaster Risk Reduction Programmes Emily Ying Yang Chan, 2018 Introductory to intermediate level textbook and reference book for healthcare professionals, fieldworkers, volunteers and students who are interested in promoting health and emergency and disaster risk reduction in Asia. **Drug Addict Trivia Game** Thomas J. Rundquist, 2001-03. Spationomy Vít Pászto, Carsten Jürgens, Polona Tominc, Jaroslav Burian, 2019-11-06 This open access book is based on Spationomy: Spatial Exploration of Economic Data, an interdisciplinary and international project in the frame of ERASMUS funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics. For the newly introduced courses, interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed consisting of one student from each university participating in the project. The achieved results were presented in a summer school a few months later. At this event, more methodological knowledge was imparted to prepare students for a final simulation game about spatial and economic decision making. In a broader sense, the chapters will present the methodological background of the project, give case studies and show how visualisation and the simulation game works.

Harm Reduction in Substance Use and High-Risk Behaviour Richard Pates, Diane Riley, 2012-05-31 Harm Reduction is a philosophy of public health intended as a progressive alternative to the prohibition of certain potentially dangerous lifestyle choices. Recognising that certain people always have and always will engage in behaviours which carry risks, the aim of harm reduction is to mitigate the potential dangers and health risks associated with those behaviours. *Harm Reduction in Substance Use and High Risk Behaviour* offers a comprehensive exploration of the policy practice and evidence base of harm reduction. Starting with a history of harm reduction, the book addresses key ethical and legal issues central to the debates and developments in the field. It discusses the full range of psychoactive substances, behaviours and communities, with chapters on injecting, dance drugs, stimulant use, tobacco, harm reduction, alcohol use and sex work. Written by an international team of contributors, this text provides an essential panorama of harm reduction in the 21st century for educators and researchers in
