Economic Growth United States. Congress. House. Committee on Natural Resources, 2011 *Economic and Social Rights in a Neoliberal World* Gillian MacNaughton, Diane F. Frey, 2018-06-28 The rise of neoliberal policy and practice simultaneous to the growing recognition of economic and social rights presents a puzzle Can the rights to food water health education decent work social security and the benefits of science prevail against market fundamentalism Economic and Social Rights in a Neoliberal World is about the potential of these rights to contest the adverse impacts of neoliberal policy and practice on human wellbeing Cutting across several lines of human rights literature the chapters address norm development court decision making policymaking advocacy measurement and social mobilization The analyses reveal that neoliberalism infiltrates management practices changes international policy goals flattens public school curriculum and distorts the outputs of UN human rights treaty bodies Are economic and social rights successful in challenging neoliberalism are they simply marginalized or are they co opted and incorporated into neoliberal frameworks This multidisciplinary work by a geographically diverse group of scholars and practitioners begins to address these questions **A Reappraisal of Economic Development** Jerome Bruner, Andrew H. Whiteford, 2017-07-05 What have the social sciences to show for decades of systematic investigation of the problems of economic development What basic problems have they solved and what remains to be done in the development of viable theoretical approaches to this area of research and policy In an unusually open discussion thirty three experts from the fields of anthropology economics political science geography sociology and agriculture here present a stimulating re examination of their accomplishments and mutual problems of the progress the disciplines have made and that which remains The increased interest of social scientists in their sister disciplines has not been stimulated solely by intellectual exploration into the problems that they share and the particular

insights each provides Much of the interest stems from the groping and searching concern of field workers who find themselves investigating problems and systems which cannot be understood adequately in terms of a single kind of analysis be it political social cultural historical or psychological Fieldwork thrusts upon them the realization that their professional areas of concern overlap and converge upon aspects of life which traditionally or academically lie in the domains of other disciplines A Reappraisal of Economic Development is distinguished by the vitality and spark of scholars of different disciplines interacting with each other The book s formal essays are deliberately short leaving the bulk of the volume to intensive cross disciplinary investigation of the positions accomplishments and proposals of the speakers and their critics The result is a fruitful re evaluation of the political social and geographic forces affecting economic development in emerging nations and a useful handbook for anyone dealing with the varied problems of foreign aid health and educational development labor organization and foreign business Andrew H Whiteford was Geor **The United States Catalog** ,1928
