Home Based Care For A New Century

Eileen E. Morrison

Home Based Care For A New Century:

Home-Based Care for a New Century Daniel M. Fox, Carol Raphael, 1997-04-03 With expansion the home care market is becoming more diverse and more competitive For profit agencies are multiplying Nursing homes and hospital systems are moving beyond their institutional walls to provide an array of home and community based services Managed care organizations are enrolling record numbers of individuals and families They and other third party payers are aggressively shopping among home care providers seeking better value for money The articles that comprise this book commissioned by the Milbank Memorial Fund and the Visiting Nurse Service of New York address these issues

Health Care Ethics: Critical Issues for the 21st Century Eileen E. Morrison, 2008-03-20

Ethics in Community-Based Elder Care Martha B. Holstein, Phyllis B. Mitzen, 2001-10-11 Caring for elders outside of institutions is the fastest growing sector of US health care Building on their research study at the Park Ridge Center editors Holstein and Mitzen together with a team of experts examine the complexities involved in developing an ethics for community based long term care They also challenge policymakers to make home care a more viable option for older people in need Chapters address many of the ethical and practical problems that arise in the care of older people with physical and mental disabilities including how to allocate scarce funds how to keep good caregivers how to balance concerns of autonomy risk and safety and worker stress The volume is an excellent resource for practitioners policymakers and students

Embarking on a New Century Robert L. Schalock, Pamela C. Baker, M. Doreen Croser, 2002 Captures the challenging and controversial era between 1975 2000 that led the field of intellectual disability into an age of community acceptance and inclusion This title includes chapters that focus themes such as public policy and health care

Who Will Care For Us? Paul Osterman, 2017-09-06 The number of elderly and disabled adults who require assistance with day to day activities is expected to double over the next twenty five years As a result direct care workers such as home care aides and certified nursing assistants CNAs will become essential to many more families Yet these workers tend to be low paid poorly trained and receive little respect Is such a workforce capable of addressing the needs of our aging population In Who Will Care for Us economist Paul Osterman assesses the challenges facing the long term care industry He presents an innovative policy agenda that reconceives direct care workers work roles and would improve both the quality of their jobs and the quality of elder care Using national surveys administrative data and nearly 120 original interviews with workers employers advocates and policymakers Osterman finds that direct care workers are marginalized and often invisible in the health care system While doctors and families alike agree that good home care aides and CNAs are crucial to the well being of their patients the workers report poverty level wages erratic schedules exclusion from care teams and frequent incidences of physical injury on the job Direct care workers are also highly constrained by policies that specify what they are allowed to do on the job and in some states are even prevented from simple tasks such as administering eye drops Osterman concludes that broadening the scope of care workers duties will

simultaneously boost the quality of care for patients and lead to better jobs and higher wages He proposes integrating home care aides and CNAs into larger medical teams and training them as health coaches who educate patients on concerns such as managing chronic conditions and transitioning out of hospitals Osterman shows that restructuring direct care workers jobs and providing the appropriate training could lower health spending in the long term by reducing unnecessary emergency room and hospital visits limiting the use of nursing homes and lowering the rate of turnover among care workers As the Baby Boom generation ages Who Will Care for Us demonstrates the importance of restructuring the long term care industry and establishing a new relationship between direct care workers patients and the medical system The Caring Class Richard Schweid,2021-03-15 The number of elderly and disabled Americans in need of home health care is increasing annually even as the pool of people almost always women willing to do this job gets smaller and smaller The Caring Class takes readers inside the reality of home health care by following the lives of women training and working as home health aides in the South Bronx Richard Schweid examines home health care in detail focusing on the women who tend to our elderly and disabled loved ones and how we fail to value their work They are paid minimum wage so that we might be absent getting on with our own lives The book calls for a rethinking of home health care and explains why changes are urgent the current system offers neither a good way to live nor a good way to die By improving the job of home health aide Schweid shows we can reduce income inequality and create a pool of qualified competent home health care providers who would contribute to the well being of us all The Caring Class also serves as a guide into the world of our home health care system Nearly 50 million US families look after an elderly or disabled loved one This book explains the issues and choices they face Schweid explores the narratives histories and people behind home health care in the United States examining how we might improve the lives of both those who receive care and those who provide it *New Teachers for a New Century* ,2000 During the reign of the Kingdom of Burgundy at the Rhone River about 443 534 a Burgundian church developed with an Arian homoian profile This led to disputes but also to an intensive theological exchange with the predominantly Nicene Gallo Roman population and with Bishop Avitus of Vienne For the first time this monograph provides selected letters and fragments written by Avitus with German translation and annotation which indicate problems of church organization and refer to discourses on religion and theological discussions in particular on the Holy Spirit filioque in order to clarify more exactly the meaning of Arian at that time **Foundation for a New Century** ,1995 New Teachers for a New Century Diane Horm-Wingerd,2001-04 , **Retooling for an Aging America** Institute of Medicine,Board on Health Care Services,Committee on the Future Health Care Workforce for Older Americans,2008-09-27 As the first of the nation s 78 million baby boomers begin reaching age 65 in 2011 they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers

who currently receive little or no training in how to tend to their aging loved ones The book also recommends that Medicare Medicaid and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides Educators and health professional groups can use *Retooling for an Aging America* to institute or increase formal education and training in geriatrics Consumer groups can use the book to advocate for improving the care for older adults Health care professional and occupational groups can use it to improve the quality of health care jobs *Latino Poverty in the New Century* Maria Vidal De Haymes,Keith Kilty,Elizabeth Segal,2012-11-12 Understand the social factors that challenge this fast growing community The Latino community will soon be the largest minority population in the United States Although Hispanics have been part of the American scene since before independence their issues have only recently drawn the attention of the mainstream *Latino Poverty in the New Century* takes a clear look at the reasons why poverty and inequality are still major concerns for Hispanic citizens and residents This keen analysis examines how apparently neutral even well meaning social and educational policies can have a devastating effect The interlocking consequences of language problems educational problems gangs poverty and illness become a vicious cycle Despite pervasive patterns of discrimination and subtle barriers to achievement the Latino community still displays its power *Latino Poverty in the New Century* reveals how a faith based community organization succeeded in adapting indigenous networks and culturally relevant sources of support and power to create a strong community presence *Latino Poverty in the New Century* offers a rich detailed analysis of the challenges that face Hispanics in the United States the implications of US immigration policy for immigrants refugees and native born Latino citizens the language barriers that can prevent Latinos from full participation in both society and educational programs health care policies and the sometimes tragic consequences of the lack of medical insurance the role of extracurricular activities in keeping Latino students in school the twin calamities known as gentrification and urban blight This comprehensive book provides social workers and policymakers with wide ranging analyses of some of the pressing issues and social policies that affect Hispanics in the United States *Latino Poverty in the New Century* explores ways to keep Latino youth in high school promote community organization encourage Latinos to vote and increase your understanding of migration dynamics Containing current research and case studies this valuable book will help you comprehend the challenges that Latinos face in this country and respect the gains they have made in spite of the obstacles in their way

Respiratory Protection for Healthcare Workers in the Workplace Against Novel H1N1 Influenza A. Committee on Respiratory Protection for Healthcare Workers in the Workplace Against Novel H1N1 Influenza A, Institute of Medicine, 2009-09-03. In the event that the H1N1 virus creates a surge of patients during the upcoming flu season, it will be critical to protect health care workers from infection given their central role in treating sick people and lessening the pandemic's overall impact. This new report from the Institute of Medicine recommends strategies for health care organizations and employees to prepare for the H1N1 virus. These recommendations include wearing fitted N95 respirators to guard against respiratory infection by the virus and establishing policies for innovative triage processes, handwashing, disinfection, and more. The report also calls for a boost in research to answer questions about how the flu viruses can be spread and to design and develop better protective equipment that would enhance workers' comfort, safety, and ability to do their jobs. *Community Health Nursing*.
