- Understanding clients' unique psychological needs and using that information to keep them motivated.
- Monitoring clients' needs both as they are originally presented and as they evolve over time.
- Applying strategies for treating and preventing overuse injuries so that clients avoid injury and frustration, thereby avoiding withdrawal from the program.
- Addressing the unique considerations of aging clients, including musculoskeletal conditions and functional mobility.

The third edition of Client Centered Exercise Prescription retains the client-centered approach of previous editions, offering simulated initial interviews with clients, teaching cues for demonstration, sample sessions, and sample counseling dialogue. The text also features numerous updates:

- More than 40 reproducible forms included in the text and duplicated in printable format in the web resource that can be shared with clients.
