

Global vs. Local Winds

Global

- Combination of convection cells & Coriolis effect produces patterns of air circulation called Global Winds

Local

- Generally move short distances and can blow from many directions
- Mountains or shorelines can produce temperature differences that cause local winds
- Land heats faster than water.
 - Air above land becomes warmer than above the ocean
 - Warm air rises, cold air from ocean replaces it
 - At night land cools faster, wind blows toward the ocean. P. 462
