Questions Mats Alvesson,Jorgen Sandberg,2013-02-28 All researchers want to produce interesting and influential theories A
key step in all theory development is formulating innovative research questions that will result in interesting and significant
research Traditional textbooks on research methods tend to ignore or gloss over actual ways of constructing research
questions In this text Alvesson and Sandberg develop a problematization methodology for identifying and challenging the
assumptions underlying existing theories and for generating research questions that can lead to more interesting and
influential theories using examples from across the social sciences Established methods of generating research questions in
the social sciences tend to focus on gap spotting which means that existing literature remains largely unchallenged The
authors show the dangers of conventional approaches providing detailed ideas for how one can work through such problems
and formulate novel research questions that challenge existing theories and produce more imaginative empirical studies
