history sociology and psychology in order for students to make sense of the world around them and develop their own voices This demands a student centered focus in the classroom where problematic questions must be addressed and investigated in depth in order to increase social understanding and active participation toward social progress This volume provides crucial upgrades to the original handbook including a greater emphasis on teaching issues in the elementary grades the inclusion of issues pertaining to human rights genocide and sustainability to be addressed in the secondary grades and addressing issues related to disabilities Mark Previte Associate Professor of Secondary Education University of Pittsburgh Johnstown Chair NCSS Issues Centered Education Community
