Internet-ontologies-Things Sungyong Ahn, 2023-09-21 Internet ontologies Things explores how power mobilizes algorithmic and ontological objects for example smartwatches and smart buildings to uncover hidden problems within the physical domains of the IoT One popular approach of software studies in recent times is to think of algorithmic objects like the things in what is known as the Internet of Things IoT as ontological agents to the same extent as the humans who use them While post humanist philosophies such as speculative realism and object oriented ontology have provided a theoretical foundation for this methodological elevation of objects to autonomous and sentient beings the complicity between this philosophical discourse and the material transformation of our everyday lives which are embedded with these smart objects remains relatively underexplored Within this constantly changing infrastructure Internet ontologies Things Smart Objects

Hidden Problems and their Symmetries reveals a new form of economic and political power whose algorithmic governance finds its legitimacy in our newly cultivated paranoia about unknown and perhaps unknowable computational problems In its examination of our smart world this book illuminates the mechanisms by which this power mobilizes various algorithmic and ontological objects from smart wearables to smart buildings to identify a greater number of hidden problems within the physical domains of the IoT from city sidewalks to the nerves and organs of our very own bodies Wholeness in Hope Care Daniel Johannes Louw, 2015 Throughout his life the apartheid activist Nelson Mandela Madiba maintained In the darkest moment there is always hope We must never give up Hope as a mode of the courage to be Paul Tillich points to what the Sociologist Peter Berger calls signals of transcendence Wholeness in Hope Care explores the rich tradition of hope in wisdom philosophy and Christian theology It connects non hope un hope Gabriel Marcel inespour to a theology of compassion in soul care cura animarum Resurrection hope theologia resurrectionis points to the healing of life cura vitae and the preservation of land cura terrae In order to describe the helping and healing dimension in pastoral caregiving the term promissiotherapy has been coined Daniel Johannes Louw was Dean of the faculty of theology at the University of Stellenbosch 2001 2005 President of the International Academy of Practical Theology IAPT 2003 2005 and President of the International Council for Pastoral Care and Counselling ICPPC 2011 2015 Series Pastoral Care and Spiritual Healing Series Pastoral Care and Spiritual Healing Vol 3 Subject Pastoral Studies Religious Studies Christianity *Law and the Philosophy of Privacy* Janice Richardson, 2015-08-20 Situating privacy within the context of political philosophy this book highlights the way in which struggles concerning the meaning of privacy have always been political Different conceptions of privacy are here shown to involve diverse assumptions about ontology our conceptions of self culture society and communication Privacy theory s debt to Locke Kant or Mill and what is at stake in their conceptual frameworks is examined The extent to which the term privacy has been used to the detriment of and to create weaker parties in marriage in the workplace and now as citizens or non citizens and consumers as well as employees is also demonstrated In contrast Janice Richardson pursues the relevance of Floridi s philosophy of information before turning to her application of Spinoza the philosopher of communication in order to outline a more useful framework through which to think about privacy today The book will be of interest to those working in political philosophy feminist philosophy law the philosophy of information sociology media and cultural studies *Localizing the Internet* John Postill, 2011-08-01 Internet activism is playing a crucial role in the democratic reform happening across many parts of Southeast Asia Focusing on Subang Jaya a suburb of Kuala Lumpur this study offers an in depth examination of the workings of the Internet at the local level In fact Subang Jaya is regarded as Malaysia s electronic governance laboratory The author explores its field of residential affairs a digitally mediated social field in which residents civil servants politicians online journalists and other social agents struggle over how the locality is to be governed at the dawn of the Information Era Drawing on the field theories of both Pierre Bourdieu and the Manchester School of political anthropology this study

challenges the unquestioned predominance of network and community as the two key sociation concepts in contemporary Internet studies The analysis extends field theory in four new directions namely the complex articulations between personal networking and social fields the uneven diffusion and circulation of new field technologies and contents intra and inter field political crises and the emergence of new forms of residential sociality

After the Human Sherryl Vint, 2020-12-10 After the Human provides a comprehensive overview of how a range of philosophical ethical and political ideas under the framework of posthumanism have transformed humanities scholarship today Bringing together a range of interdisciplinary scholars and perspectives it puts into dialogue the major influences from philosophy literary study anthropology and science studies that set the stage for a range of new questions to be asked about the relationship of the human to other life The book's central argument is that posthumanism's challenge to and disruption of traditional humanist knowledge is so significant as to presage a sea change from the humanities into the posthumanities After the Human documents the emergence of posthumanist ideas in the fractures within traditional disciplines examines the new objects of analysis that thus came into prominence and theorizes new interdisciplinary methods of study that followed

Theology, Ethics, and Technology in the Work of Jacques Ellul and Paul Virilio Michael Morelli, 2021-06-17 Theology Ethics and Technology in the Work of Jacques Ellul and Paul Virilio examines biographical and textual connections between sociologist theologian Jacques Ellul and philosopher phenomenologist Paul Virilio Through an examination of their embeddedness in the socio historical context of postwar France Michael Morelli identifies a relationship between these critics of technology that bears the marks of a nascent theological tradition He shows from various vantage points how Ellul and Virilio's nascent tradition exposes technology as modernity's primary idol and how these thinkers use multiple disciplines including history sociology philosophy phenomenology theology and ethics to resist the perilous consequences of the modern world's worship of power and the kinds of technologies this misdirected worship produces Jacques Ellul's death in 1994 and Paul Virilio's death in 2018 may have prevented the maturation of this nascent theological tradition but this book will aid in this tradition's ripening through the presentation of an illuminating way to read these two unique prophetic intellectuals

Breslin,1971 Modern Methods of Diagnosing Diseases Mr. Rohit Manglik,2024-07-30 Explores cutting edge diagnostic technologies and methodologies used in identifying diseases with high accuracy and efficiency Coming of Age in Second Life Tom Boellstorff,2015-08-25 Millions of people around the world today spend portions of their lives in online virtual worlds Second Life is one of the largest of these virtual worlds The residents of Second Life create communities buy property and build homes go to concerts meet in bars attend weddings and religious services buy and sell virtual goods and services find friendship fall in love the possibilities are endless and all encountered through a computer screen At the time of its initial publication in 2008 Coming of Age in Second Life was the first book of anthropology to examine this thriving alternate universe Tom Boellstorff conducted more than two years of fieldwork in Second Life living among and observing its residents in exactly the same way anthropologists traditionally have done to learn about cultures and social groups in the so called real world He conducted his research as the avatar Tom Bukowski and applied the rigorous methods of anthropology to study

many facets of this new frontier of human life including issues of gender race sex money conflict and antisocial behavior the construction of place and time and the interplay of self and group *Coming of Age in Second Life* shows how virtual worlds can change ideas about identity and society Bringing anthropology into territory never before studied this book demonstrates that in some ways humans have always been virtual and that virtual worlds in all their rich complexity build upon a human capacity for culture that is as old as humanity itself Now with a new preface in which the author places his book in light of the most recent transformations in online culture *Coming of Age in Second Life* remains the classic ethnography of virtual worlds
