Homo Novus - A Human Without Illusions Ulrich J. Frey, Charlotte Störmer, Kai P. Willführ, 2010-08-24 Converging evidence from disciplines including sociobiology evolutionary psychology and human biology forces us to adopt a new idea of what it means to be a human As cherished concepts such as free will na ve realism humans as creation s crowning glory fall and our moral roots in ape group dynamics become clearer we have to take leave of many concepts that have been central to defining our humanness What emerges is a new human the homo novus a human being without illusions Leading authors from many different fields explore these issues by addressing a range of illusions and providing evidence for the need despite considerable reluctance to relinquish some of our most cherished ideas about ourselves *The Patriarchs* Angela Saini, 2023-02-28 For fans of *Sapiens* and *The Dawn of Everything* a groundbreaking exploration of gendered oppression its origins its histories our attempts to understand it and our efforts to combat it For centuries societies have treated male domination as natural to the human species But how would our understanding of gender inequality our imagined past and contested present look if we didn t assume that men have always ruled over women If we saw inequality as something more fragile that has had to be constantly remade and reasserted In this bold and radical book award winning science journalist Angela Saini explores the roots of what we call patriarchy uncovering a complex history of how it first became embedded in societies and spread across the globe from prehistory into the present She travels to the world s earliest known human settlements analyzes the latest research findings in science and archaeology and traces cultural and political histories from the Americas to Asia finding that From around 7 000 years ago there are signs that a small number of powerful men were having more children than other men From 5 000 years ago as the earliest states began to expand gendered codes appeared in parts of Europe Asia and the Middle East to serve the interests of powerful elites but in slow piecemeal ways and always resisted In societies where women left their own families to live with their husbands marriage customs came to be informed by the widespread practice of captive taking and slavery eventually shaping laws that alienated women from systems of support and denied them equal rights There was enormous variation in gender and power in many societies for thousands of years but colonialism and empire dramatically changed ways of life across Asia Africa and the Americas spreading rigidly patriarchal customs and undermining how people organized their families and work In the 19th century and 20th centuries philosophers historians anthropologists and feminists began to actively question what patriarchy meant as part of the attempt to understand the origins of inequality In our own time despite the pushback against sexism abuse and discrimination even revolutionary efforts to bring about equality have often ended in failure and backlash But *The Patriarchs* is a profoundly hopeful book one that reveals a multiplicity to human arrangements that undercuts the old grand narratives and exposes male supremacy as no more and no less than an ever shifting element in systems of control **Essential**

Building Blocks of Human Nature Ulrich J. Frey, Charlotte Störmer, Kai P. Willführ, 2010-11-08 To understand why we

humans are as we are it is necessary to look at the essential building blocks that comprise our nature The foundations of this structure are our evolutionary origins as primates and our social roots Upon these rest features such as our emotions language and aesthetic preferences with our self perceptions self deceptions and thirst for knowledge right at the top The unifying force holding these blocks together is evolutionary theory Evolution provides a deeper understanding of human nature and in particular of the common roots of these different perspectives To build a reliable and coherent model of man leading authors from fields as diverse as primatology anthropology neurobiology and philosophy have joined forces to present essays each describing their own expert perspective Together they provide a convincing and complete picture of our own human nature

The Seneca Effect Ugo Bardi, 2017-08-22 The essence of this book can be found in a line written by the ancient Roman Stoic Philosopher Lucius Annaeus Seneca Fortune is of sluggish growth but ruin is rapid This sentence summarizes the features of the phenomenon that we call collapse which is typically sudden and often unexpected like the proverbial house of cards But why are such collapses so common and what generates them Several books have been published on the subject including the well known Collapse by Jared Diamond 2005 The collapse of complex societies by Joseph Tainter 1998 and The Tipping Point by Malcom Gladwell 2000 Why The Seneca Effect This book is an ambitious attempt to pull these various strands together by describing collapse from a multi disciplinary viewpoint The reader will discover how collapse is a collective phenomenon that occurs in what we call today complex systems with a special emphasis on system dynamics and the concept of feedback From this foundation Bardi applies the theory to real world systems from the mechanics of fracture and the collapse of large structures to financial collapses famines and population collapses the fall of entire civilizations and the most dreadful collapse we can imagine that of the planetary ecosystem generated by overexploitation and climate change The final objective of the book is to describe a conclusion that the ancient stoic philosophers had already discovered long ago but that modern system science has rediscovered today If you want to avoid collapse you need to embrace change not fight it Neither a book about doom and gloom nor a cornucopianist's dream The Seneca Effect goes to the heart of the challenges that we are facing today helping us to manage our future rather than be managed by it

The Reality of Time Flow Richard T. W. Arthur, 2019-04-25 It is commonly held that there is no

place for the now in physics and also that the passing of time is something subjective having to do with the way reality is experienced but not with the way reality is. Indeed the majority of modern theoretical physicists and philosophers of physics contend that the passing of time is incompatible with modern physical theory and excluded in a fundamental description of physical reality. This book provides a forceful rebuttal of such claims. In successive chapters the author explains the historical precedents of the modern opposition to time flow giving careful expositions of matters relevant to becoming in classical physics the special and general theories of relativity and quantum theory without presupposing prior expertise in these subjects. Analysing the arguments of thinkers ranging from Aristotle Russell and Bergson to the proponents of quantum gravity he contends that the passage of time understood as a local becoming of events out of those in their past at varying rates is not only compatible with the theories of modern physics but implicit in them.

Homo Novus - A Human Without Illusions Ulrich Frey, Charlotte Störmer, Kai P. Willführ, 2010-09-14

Converging evidence from disciplines including sociobiology evolutionary psychology and human biology forces us to adopt a new idea of what it means to be a human. As cherished concepts such as free will naïve realism humans as creations crowning glory fall and our moral roots in ape group dynamics become clearer we have to take leave of many concepts that have been central to defining our humanness. What emerges is a new human the homo novus a human being without illusions. Leading authors from many different fields explore these issues by addressing a range of illusions and providing evidence for the need despite considerable reluctance to relinquish some of our most cherished ideas about ourselves.

Disziplinierte Tiere? Reingard Spannring, Karin Schachinger, Gabriela Kompatscher, Alejandro Boucabeille, 2015-01-15

Nichtmenschliche Tiere wurden bislang in den Human Geistes und Sozialwissenschaften aufgrund des vorherrschenden Anthropozentrismus der radikalen Ablehnung jeglichen Anthropomorphismus sowie des biologischen Essentialismus kaum berücksichtigt. Die Beziehungsformen zwischen nichtmenschlichen Tieren und Menschen sind historisch kulturell aber auch innergesellschaftlich sehr heterogen ambivalent und widersprüchlich ihre Wechselbeziehungen sind multidimensional. Angesichts dessen stellen die Beiträge des Bandes die Frage danach was die Berücksichtigung nichtmenschlicher Tiere und der Tier-Mensch-Beziehungen für die jeweilige wissenschaftliche Disziplin bedeutet und welche Herausforderungen sich für deren Forschungsfelder Theorien und Methoden ergeben. Mit Vorworten der beiden Ethologen Marc Bekoff und Kurt Kotrschal.
