International Intellectual Property Law Paul Goldstein, Marketa Trimble, 2012-01-01 *International Intellectual Property Law* Paul Goldstein, 2001 Law school casebook with two objectives One is to equip law students with the methodology they will need to engage in an international intellectual property practice involving transactional work or litigation The second is to expose students to the social economic and cultural considerations that underpin intellectual property law around the world Features expertly edited cases and problems for classroom discussion *International Copyright* Paul Goldstein, P. Bernt Hugenholtz, 2012-11-15 BInternational Copyright is an indispensable reference work for professionals involved with international intellectual property transactions or litigation It is essential reading for scholars and for intellectual property practitioners worldwide This edition provides new sections on contributory liability of intermediaries and on collective rights management **Intellectual Property in Asia** Paul Goldstein, Joseph Straus, 2009-01-07 Introduction Intellectual property rights foster innovation But if as it surely does intellectual property means not just intellectual property rules the law of patents copyrights trademarks designs trade secrets and unfair competition but also intellectual property institutions the courts police regulatory agencies and collecting societies that administer these rules what are the respective roles of intellectual property rules and institutions in fostering creativity And to what extent do forces outside intellectual property rules and institutions economics culture politics history also contribute to innovation Is it possible that these other factors so overwhelm the impact of intellectual property regimes that it is futile to expect adjustments in intellectual property rules and institutions to alter patterns of innovation and ultimately economic development It was to address these questions in the most dynamic region of the world today Asia that we invited leading country experts to contribute studies that not only summarize the current condition of intellectual property regimes in countries ranging in economic size from Cambodia to Japan and in population from Laos to China but that also describe the historical sources of these laws and institutions the realities of intellectual property enforcement in the marketplace and the political economic educational and scientific infrastructures that sustain and direct investment in innovative activity A International and Comparative Copyright Law, Cases and Materials Paul Goldstein, Marketa Trimble, 2023-12-04 Goldstein Trimble's International and Comparative Copyright Law Cases and Materials 1st Edition has been carved out from the authors International Intellectual Property Law 6th Edition and includes all of the copyright relevant private and public international law materials from the larger volume along with that volume's collection of cases and materials on comparative copyright law neighboring rights and industrial design **A Patent Lie** Paul Goldstein, 2008-06-17 A gripping inside look at high stakes lawyering A Patent Lie is further evidence that Paul Goldstein is an emerging master of the legal thriller After being forced from his high powered Manhattan law firm Michael Seeley the tough but wounded hero of Errors and Omissions has set up shop in his native Buffalo Partly out of need partly out of pride Seeley takes on a case for his estranged brother whose small

biotech firm is suing a Swiss pharmaceutical giant over a controversial new AIDS vaccine Seeley heads out to Silicon Valley to lead the case but soon realizes there is much more at stake than he was first led to believe As certain partnerships come to light and financial gains become staggeringly clear Seeley's own life may be in grave danger

International Patent Rights Harmonisation Weinian Hu, 2017-05-08 With reference to China this book examines the course of international patent rights harmonisation its characteristics as well as impediments It evaluates the case of China's patent law development over the course of the last three decades by drawing on the most up to date Chinese language sources In the process the volume focuses on China's

patent legislation its achievements and weaknesses as well as the intrinsic limitations especially as far as enforcement is concerned The author pays close attention to the unique societal background in China a country that did not provide constitutional recognition to private property rights until 2004 and where a property law entered into force as late as 2013 30 years after the first promulgation of the patent law Global trade policy makers IP professionals and businesses will benefit from the insights presented by the chapters as they will help them to appreciate the achievements and the controversies pursuant to China s efforts in patent protection While serving as a useful case study for countries seeking to leverage patent protection as a driver for economic development the book will equally facilitate Chinese legislature to reflect on its patent legislation development specifically on legislative policy choices An additional analytical strength of the volume is that it compares the Chinese patent legislation with the American Invents Act and the European Patent Convention It discovers the differences between the three patent legislations by using the minimum patent protection standards set down by the TRIPS Agreement as the benchmark The results of the comparisons suggest that China has successfully harmonised its patent legislation with the global patent protection system and often opts for higher patent protection standards The book also considers whether China could learn lessons from Japan and India in their respective patent legislation and policy choices With China undertaking a fourth patent law amendment the provisions contained in the second draft of the Patent Law 2015 which was published in December 2015 are included in the analysis

International Legal Materials on Intellectual Property Paul Goldstein, 2000 Chapters cover Trade Agreements Copyright and Neighbouring Rights Patents and Plant Variety Protection Trademarks and Geographical Indications Industrial Design and Semiconductor Layout European Union Directives and Regulations International organisations

International Copyright Law and Access to Education in Developing Countries Susan Štrba, 2012-08-22 In *International Copyright Law and Access to Education in Developing Countries Exploring Multilateral Legal and Quasi Legal Solutions* Susan Isiko trba demonstrates the challenge of access to printed copyrighted educational and research materials in developing countries and proposes institutional and normative solutions at national and international levels

Principles of International Economic Law Matthias Herdegen, 2013-01-10 *Principles of International Economic Law* gives a comprehensive overview of the central topics in international economic law with an emphasis on the interplay between the different economic and political interests on both the international and domestic levels The book sets the classic topics of international economic law WTO law investment protection commercial law and monetary law in context with human rights environmental protection good governance and the needs of developing countries It thus provides a concise picture of the current architecture of international economic law Topics covered range from codes of conduct for multinational enterprises to the human rights implications of the exploitation of natural resources The book demonstrates the economic foundations and economic implications of legal frameworks It puts into profile the often complex relationship between on the one hand international standards on liberalization and economic rationality and on the

other state sovereignty and national preferences It describes the new forms of economic cooperation which have developed in recent decades such as the growing number of transnational companies in the private sector and forms of cooperation between states such as the G8 or G20 Providing a perfect introductory text to the field of international economic law the book thoroughly analyses legal developments within their wider political economic or social context

The Copyright-Competition Interaction within the EU Dino Gliha,2025-07-09 This book provides a comprehensive analysis of the copyright competition interaction issue in the EU and provides a sustainable method of approach The research identifies several approaches to the copyright competition issue some of which were extensively applied in practice while others were considered more theoretical However none of the discussed approaches has proved to be an adequate fundament to understanding the copyright competition interaction issue and there is still a considerable disagreement on how to deal with this matter It is vital to start with the relationship between copyright law and competition law to overcome the flaws of the identified approaches The issue can be elegantly settled through the existent principles of both laws From the perspective of copyright law the application of competition law is a limitation of the author s right in a broader sense originating outside of copyright law From the perspective of competition law the presence of copyright should be comprehended as a specific situation in which the focus should mainly be on the effects of copyright instead of allocation and productiveness at the same time the concept of authorship should be taken into consideration in the light of consumer welfare Only after the fundamental approach to the copyright competition interaction issue is settled is it possible to analyse specific situations further In practice several types of exercises have been recognised as the matter of the copyright competition interaction The research focuses on the interference between the exercise of copyright and competition rules on prohibited agreements i e licensing practices and abuse of dominant position i e refusal to license copyright Each situation is analysed separately based on the common understanding of the copyright competition interaction issue and following the fundamental principles of copyright law and competition law In doing so a detailed critical analysis of the relevant case law and literature is provided After the analysis of the relevant case law and doctrine for both situations are conducted the research produces a specific approach and method of analysis specific for the copyright competition interaction cases dealing under Article 101 and Article 102 TFEU It should be noted that the approaches are primarily construed from the perspective of copyright civil law tradition and EU competition law although such approach might as well be considered in other legal systems and traditions In the end a special view is given to the digital industry sector and the assessment of further potential developments in that field that might potentially fall under the scope of the copyright competition interaction issue

The relationship between intellectual property and private international law is a fascinating and multi faceted one Both fields are inherently international but it is the exponential increase in conflicts involving trans border elements in a world characterised by global trade and borderless communication structures that has in modern times drawn the two disciplines close The essays contained in this book first presented at a Symposium in Munich set out possible visions for a future system of international and regional jurisdiction and applicable law that is better adapted to the increasingly supranational character of IP rights A second feature of the book is its treatment of harmonisation of choice of law issues Framed by these two elements international jurisdiction on the one hand and perspectives for harmonised choice of law rules in an international context on the other specific European themes are also addressed jurisdiction the establishment of a European judiciary in

the patent field the relationship between regional European systems and an international jurisdiction convention and the recent proposal for a Regulation on applicable law in non contractual relationships Rome II *Intellectual Property Rights in a Fair World Trade System* Annette Kur, 2011-01-01 Intellectual Property law IP particularly in relation to international trade regimes is increasingly finding itself challenged by rapid developments in the technological and global economic landscapes In its attempt to maintain a responsive legislative system that is interacting successfully with global trade rules IP is having to respond to an increasing number of actors on an international level This book examines the problems associated with this undertaking as well as suggesting possible revisions to the TRIPS agreement that would make it more relevant to the environment in which today's IP mechanisms are operating The overall aim is to find an adequate response to the IP balance dilemma The theme is pursued throughout various topics including a look at what this means in relation to economy in a country like China and also considering how IP is increasingly having to reconcile itself with human rights issues

Global Patents Marketa Trimble, 2012-02-14 *Global Patents Limits of Transnational Enforcement* explains why a global patent does not exist It identifies the barriers to its creation from both historical and current perspectives and discusses the difficulties that arise as inventors investors and businesses strive to protect their inventions in the widest territory possible The author analyzes the options available to patent holders and explains how a country's patent law may be used to stop or limit the exploitation of an invention patented in that country and even in other countries where the invention is not patented
