Good Company Douglas A. Harper, 2006 A celebration of the tramp way of life in America in the 1930s which has all but vanished in the modern age

Good Company Douglas Harper, 2016-03-17 This sociological classic shows how the railroad tramp's status as a deviant changed from frontier itinerant to post settlement vagrant from class conscious proletariat in the Depression to the damaged post WWII vet The third edition with new photos discusses how today the freights have become the milieu of violent gangs who transport drugs human traffickers and serial killers Beating the odds against increased post 9 11 surveillance are yuppie adventure seekers young travelers crust punks and oogles In the background is the same freight train unforgiving and lethal and cultures policed at times by honorable tramps and at times by sadistic enforcers of violent gangs Features of the new edition Eight previously unpublished photos that reflect new directions in visual ethnography 90 photos altogether A fuller integration of photos made during the author's participant research with tramps over thousands of miles on the freights and while living homeless in urban America New nuanced edit of a narrative describing author's five week immersion with the quintessential tramp of the era Carl

Viewpoints Mary Strong, Laena Wilder, 2013-05-01 Early in its history anthropology was a visual as well as verbal discipline But as time passed visually oriented professionals became a minority among their colleagues and most anthropologists used written words rather than audiovisual modes as their professional means of communication Today however contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream Digital media small sized and easy to use equipment and the Internet with its interactive and public forum websites democratize roles once relegated to highly trained professionals alone However having access to a good set of tools does not guarantee accurate and reliable work Visual anthropology involves much more than media alone This book presents visual anthropology as a work in progress open to the myriad innovations that the new audiovisual communications technologies bring to the field It is intended to aid in contextualizing explaining and humanizing the storehouse of visual knowledge that university students and general readers now encounter and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes Concentrating on documentary photography and ethnographic film as well as lesser known areas of study and presentation including dance painting architecture archaeology and primate research the book's fifteen contributors feature populations living on all of the world's continents as well as within the United States The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings

wanderlust the compulsion not to live a settled existence asceticism affinity with nature the desire to retain the innocence and mischief of childhood aloofness yet compassion for the rest of human kind and the rejection of formal education for knowledge experienced via their own senses Refusing to be compromised by the grand narratives of religion politics law nationalism and convention they regarded themselves as citizens of the universe rather than slaves of what they regarded as geographical and political states artificially created by humans Cutler attempts to rescue from obscurity the philosophy first espoused by the ancient Cynics and now practiced outside of any organized movement by this disparate group of thinkers and writers by presenting arguments and conclusions that are original to this work Visual Sociology Douglas
