Good To Eat Riddles Of Food And Culture:

Good to Eat Marvin Harris, 1998-07-02 Why are human food habits so diverse Why do Americans recoil at the thought of dog meat Jews and Moslems pork Hindus beef Why do Asians abhor milk In *Good to Eat* best selling author Marvin Harris leads readers on an informative detective adventure to solve the worlds major food puzzles He explains the diversity of the worlds gastronomic customs demonstrating that what appear at first glance to be irrational food tastes turn out really to have been shaped by practical economic or political necessity In addition his smart and spirited treatment sheds wisdom on such topics as why there has been an explosion in fast food why history indicates that its bad to eat people but good to kill them and why children universally reject spinach *Good to Eat* is more than an intellectual adventure in food for thought It is a highly readable scientifically accurate and fascinating work that demystifies the causes of myriad human cultural differences

Anxious Eaters Janet Chrzan, Kima Cargill, 2022-08-30 What makes fad diets so appealing to so many people How did there get to be so many different ones often with eerily similar prescriptions Why do people cycle on and off diets perpetually searching for that one simple trick that will solve everything And how did these fads become so central to conversations about food and nutrition Anxious Eaters shows that fad diets are popular because they fulfill crucial social and psychological needs which is also why they tend to fail Janet Chrzan and Kima Cargill bring together anthropology psychology and nutrition to explore what these programs promise yet rarely fulfill for dieters They demonstrate how fad diets help people cope with widespread anxieties and offer tantalizing glimpses of attainable self transformation Chrzan and Cargill emphasize the social contexts of diets arguing that beliefs about nutrition are deeply rooted in pervasive cultural narratives Although people choose to adopt new eating habits for individual reasons broader forces shape why fad diets seem to make sense Considering dietary beliefs and practices in terms of culture nutrition and individual psychological needs Anxious Eaters refrains from moralizing or promoting a right way to eat Instead it offers new ways of understanding the popularity of a wide range of eating trends including the Atkins Diet and other low or no carb diets beliefs that ingredients like wheat products and sugars are toxic allergenic or addictive food avoidance and Clean Eating practices and paleo or primal diets Anxious Eaters sheds new light on why people adopt such diets and why these diets remain so attractive even though they often fail

Vegetarianism, Meat and Modernity in India Johan Fischer, 2023-04-07 Never before in human history have vegetarianism and a plant based economy been so closely associated with sustainability and the promise of tackling climate change Nowhere is this phenomenon more visible than in India which is home to the largest number of vegetarians globally and where vegetarianism is intrinsic to Hinduism India is often considered a global model for vegetarianism However in this book which is the outcome of eight months of fieldwork conducted among vegetarian and non vegetarian producers traders regulators and consumers I show that the reality in India is quite different with large sections of communities being meat eaters In 2011 vegetarian veg green and nonvegetarian non veg brown labels on all packaged foods drinks were introduced in India Paradoxically this grand scheme was implemented at a time when meat and non vegetarian

food production trade and consumption were booming The overarching argument of the book is that a systematic study of the complex and changing relationship between vegetarian and non vegetarian understandings and practices illuminates broader transformations and challenges that relate to markets the state religion politics and identities in India and beyond The book's empirical focus is on the changing relationship between vegetarian non vegetarian as understood practised and contested in middle class India while remaining attentive to the vegetarian non vegetarian modernities that are at the forefront of global sustainability debates Through the application of this approach the book provides a novel theory of human values and markets in a global middle class perspective
