Roland Holst, M. Nijhoff, J. Slauerhoff Theo D'haen,2023-09-15 This text takes a wholly new look at a major

early twentieth century Dutch poet and novelist from the perspective of world literature situating his work in both a national and a world literary context as measured against contemporaries and near contemporaries such as Conrad Pound Brecht Segalen and Malraux Exemplifying how an author from a minor literature may be a major world author this book considers the debates within World Literature regarding the classification of literatures as major and minor canon formation within Dutch literature Slauerhoff's position in the Dutch tradition as well as his contribution to world literature particularly focusing on his East Asian poems his East Asian novels and stories and his poetry and prose set in Latin America This book is a key read for scholars and students of comparative literature world literature European literature and Dutch literature Lucid in style innovative in approach surprisingly fresh qua topic this book opens new horizons for literary studies *Library of Congress Catalogs Library of Congress, 1970* *Malmbergs bibliografie der literaire kritiek van Noord- en Zuid-Nederland* K. van de Laarschot, 1968 **Literature of the Low Countries** Reinder Meijer, 2012-12-06 In any definition of terms Dutch literature must be taken to mean all literature written in Dutch thus excluding literature in Frisian even though Friesland is part of the Kingdom of the Netherlands in the same way as literature in Welsh would be excluded from a history of English literature Similarly literature in Afrikaans South African Dutch falls outside the scope of this book as Afrikaans from the moment of its birth out of seventeenth century Dutch grew up independently and must be regarded as a language in its own right Dutch literature then is the literature written in Dutch as spoken in the Kingdom of the Netherlands and the so called Flemish part of the Kingdom of Belgium that is the area north of the linguistic frontier which runs east west through Belgium passing slightly south of Brussels For the modern period this definition is clear enough but for former times it needs some explanation What do we mean for example when we use the term Dutch for the medieval period In the Middle Ages there was no standard Dutch language and when the term Dutch is used in a medieval context it is a kind of collective word indicating a number of different but closely related Frankish dialects The most important of those were the dialects of the duchies of Limburg and Brabant and of the counties of Flanders and Holland **Ontmoetingen**, 1968 **Malmbergs bibliografie der literaire kritiek van Noorden Zuid-Nederland: Betreffende kritieken in boekvorm verschenen gedurende de periode ± 1880-heden en betrekking hebbende op de literatuur van deze periode** K. van de Laarschot, 1968
