Governing Biodiversity Through Democratic Deliberation ,2015 *Governing Biodiversity through Democratic Deliberation* Mikko Rask,Richard Worthington,2015-05-15 This book discusses political controversies involved in global biodiversity policy and the practical opportunities that are opened up in solving them through increased citizen participation and democratic deliberation It examines the emerging practice of deliberative global governance and its political consequences The collection focuses on the intersection of global biodiversity policy and the promise of deliberative democracy In doing so it examines how new discursive logics emerge in global citizen deliberation that might destabilize the impasses encountered in biodiversity negotiations how a global citizens voice emerges in deliberative processes despite the dominance of national institutions in the lives of those citizens the most effective and innovative ways to amplify the results of large scale deliberations to policy makers and broader audiences and how future citizen deliberations can be designed to make them fair feasible and consequential processes in general and for biodiversity issues in particular This highly original contribution to the field provides theoretical discussions empirical analyses and local experiences of biodiversity policy making it an invaluable resource for students and scholars of environmental politics governance and sociology particularly those interested in deliberative democracy citizen participation and biodiversity **The Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES)** Marie Hrabanski,Denis Pesche,2016-10-04 Twenty years after the Convention on Biological Diversity CBD entered into force the founding of the Intergovernmental Platform on Biodiversity and Ecosystem Services IPBES in 2012 was the outcome of a long process of setting biodiversity issues at the top of the global environmental agenda With contributions from more than a dozen well renowned researchers in political science law and sociology this book analyzes IPBES functioning and challenges in terms of the knowledge selection process and actors involved The book reveals that through its conceptual framework IPBES promotes a pluralistic view of nature that calls for a broadening of the disciplinary frontiers It combines natural science and social science research and also includes indigenous and local knowledge IPBES is considered to represent the institutionalization of a permanent knowledge assessment on biodiversity and is often referred to as an IPCC success story constituting a new stage in global environmental governance In analyzing the knowledge selection process for IPBES decision making the book better situates IPBES within the biodiversity and global governance domain It ultimately argues that the establishment of IPBES provides a new opportunity to coordinate the different international conventions CBD RAMSAR CITES etc and initiatives international assessment of marine biology scientific programs funding etc **Economic Valuation of Biodiversity** Bartosz Bartkowski,2017-05-18 This book provides an ecological economic perspective on the value of diversity in ecosystems Combining insights from various sub disciplines of ecology and environmental ecological economics the author constructs a conceptual framework which identifies the ways in

which biodiversity influences human well being are identified and offers a novel unifying perspective on the economic value of biodiversity *Achieving Biodiversity Protection in Megadiverse Countries* Paul Martin, Márcia Dieguez

Leuzinger, Solange Teles da Silva, Gabriel Leuzinger Coutinho, 2020-03-19 This volume systematically analyses why legal doctrines for the protection of biodiversity are not sufficiently effective It examples implementation in Australia and Brazil two megadiverse countries with very differing legal and cultural traditions and natural environments Substantial effort goes into the development and interpretation of legal doctrines for the protection of biodiversity in national and international law Despite this biodiversity continues in steep decline Nowhere is this more evident than in megadiverse countries such as Australia and Brazil which possess the greatest number and diversity of animals and plants on Earth The book covers a wide range of topics including farming mining marine environments indigenous interests and governance *Achieving Biodiversity Protection in Megadiverse Countries* highlights specific causes of underperformance in protecting diverse terrestrial and marine environments It provides proposals for more effective implementation in these two jurisdictions relevant to other megadiverse territories and for biodiversity protection generally Each chapter was written by teams of Australian and Brazilian authors so that similar issues are considered across both jurisdictions to provide both country specific and generalisable insights *Achieving Biodiversity Protection in Megadiverse Countries* will be of great interest to students and scholars of environmental law and governance and biodiversity conservation as well as policymakers practitioners and NGOs working in these fields *The Routledge Handbook of Democracy and Sustainability* Basil Bornemann, Henrike

Howlett, Ishani Mukherjee, 2018-07-17 Uniting theoretical bases and advancements in practice the Routledge Handbook of Policy Design brings together leading experts in the academic field of policy design in a pioneering effort of scholarship Each chapter provides a multi topic overview of the state of knowledge on how why where or when policies are designed and how such designs can be improved These experts address how a new emphasis on effective policy design has re emerged in public policy studies in recent years and clarify the role of historical policy decisions policy capacities and government intentions in promoting a design orientation towards policy formulation and policy making more generally They examine many previously unexplored aspects of policy designs and designing activities which focus upon analyzing and improving the sets of policy tools adopted by governments to correct policy problems Ranging from the fundamentals of policy design and its place in greater policy studies to new questions regarding policy design content and effectiveness to contemporary design trends such as the use of digital tools and big data the Routledge Handbook of Policy Design is a comprehensive reference for students and scholars of public policy public administration and public management government and business **Public Participation, Science and Society** Mikko Rask, Saulė Mačiukaitė-Žvinienė, Loreta Tauginienė, Vytautas Dikčius, Kaisa Matschoss, Timo Aarrevaara, Luciano d'Andrea, 2018-01-12 The field of public participation is developing fast with phenomena such as citizen science and crowdsourcing extending the resource base of research stimulating innovation and making science more accessible to the general population Promoting public participation means giving more weight to citizens and civil society actors in the definition of research needs and in the implementation of research and innovation As yet there is limited understanding of the implications of widespread use of public participation and as a result there is a risk that it will become a burden for research and an obstacle to bridging the gap between research and society This volume presents the findings of a three year international study on innovative public participation The resulting work studies the characteristics and trends of innovative public participation through a global sample of 38 case studies It provides theoretical generalisations on the dynamics of public participation suggestions for an evaluation framework and clear empirical examples of how public participation works in practice Illustrated by best practice cases the authors identify characteristics which contribute to successful public participation The book is aimed primarily at scholars and practitioners of public participation as well as research managers policy makers and business actors interested in related issues There is also a secondary market for students and scholars of European governance studies sociology and political sciences *Forest Health and Biotechnology* National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on the Potential for Biotechnology to Address Forest Health, 2019-03-01 The American chestnut whitebark pine and several species of ash in the eastern United States are just a few of the North American tree species that have been functionally lost or are in jeopardy of being lost due to outbreaks of pathogens and insect pests New pressures in this century are putting even more trees at risk Expanded human mobility and

global trade are providing pathways for the introduction of nonnative pests for which native tree species may lack resistance. At the same time, climate change is extending the geographic range of both native and nonnative pest species. Biotechnology has the potential to help mitigate threats to North American forests from insects and pathogens through the introduction of pest-resistant traits to forest trees. However, challenges remain: the genetic mechanisms that underlie trees' resistance to pests are poorly understood; the complexity of tree genomes makes incorporating genetic changes a slow and difficult task; and there is a lack of information on the effects of releasing new genotypes into the environment. Forest Health and Biotechnology examines the potential use of biotechnology for mitigating threats to forest tree health and identifies the ecological, economic, and social implications of deploying biotechnology in forests. This report also develops a research agenda to address knowledge gaps about the application of the technology.

Handbook of Democratic Innovation and Governance Stephen Elstub, Oliver Escobar, 2019-12-27 Democratic innovations are proliferating in politics, governance, policy, and public administration. These new processes of public participation are reimagining the relationship between citizens and institutions. This Handbook advances understanding of democratic innovations in theory and practice by critically reviewing their importance throughout the world. The overarching themes are a focus on citizens and their relationship to these innovations and the resulting effects on political equality. The Handbook therefore offers a definitive overview of existing research on democratic innovations while also setting the agenda for future research and practice.

Asian Sacred Natural Sites Bas Verschuuren, Naoya Furuta, 2016-08-12 Nature conservation planning tends to be driven by models based on Western norms and science, but these may not represent the cultural, philosophical, and religious contexts of much of Asia. This book provides a new perspective on the topic of sacred natural sites and cultural heritage by linking Asian cultures, religions, and worldviews with contemporary conservation practices and approaches. The chapters focus on the modern significance of sacred natural sites in Asian protected areas, with reference where appropriate to an Asian philosophy of protected areas. Drawn from over 20 different countries, the book covers examples of sacred natural sites from all of IUCN's protected area categories and governance types. The authors demonstrate the challenges faced to maintain culture and support spiritual and religious governance and management structures in the face of strong modernisation across Asia. The book shows how sacred natural sites contribute to defining new, more sustainable and more equitable forms of protected areas and conservation that reflect the worldviews and beliefs of their respective cultures and religions. The book contributes to a paradigm shift in conservation and protected areas as it advocates for greater recognition of culture and spirituality through the adoption of biocultural conservation approaches.

Conservation, Land Conflicts and Sustainable Tourism in Southern Africa Regis Musavengane, Llewellyn

Leonard, 2022-05-11 This book examines the nexus between conservation land conflicts and sustainable tourism approaches in Southern Africa with a focus on equity access restitution and redistribution. While Southern Africa is home to important biodiversity, pristine woodlands and grasslands and is a habitat for important wildlife species, it is also a land of contestations over its natural resources with a complex historical legacy and a wide variety of competing and conflicting issues surrounding race, cultural and traditional practices and neoliberalism. Drawing on insights from conservation, environmental and tourism experts, this volume presents the nexus between land conflicts and conservation in the region. The chapters reveal the hegemony of humans on land and associated resources including wildlife and minerals. By using social science approaches, the book unites environmental, scientific, social and political issues as it is imperative we understand the holistic nature of land conflicts in nature-based tourism. Discussing the management theories and approaches to community-based tourism in communities where there are or were land conflicts is critical to understanding the current state and future of tourism in African rural spaces. This volume determines the extent to which land reform impacts community-based tourism in Africa, to develop resilient destination strategies and shares solutions to existing land conflicts to promote conservation and nature-based tourism. The book will be of great interest to students, academics, development experts and policymakers in the field of conservation, tourism, geography, sociology, development studies, land use and environmental management and African studies.

The Politics of Knowledge and Global Biodiversity Alice Vadrot, 2014-04-24 The establishment of the Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES) points to the crucial role attributed to science and knowledge for the successful implementation of biodiversity politics by both scientists and policy makers. With the increased importance of biodiversity in international politics and in part inspired by the success of the Intergovernmental Panel on Climate Change (IPCC), which has had in raising awareness of global warming, the call for an IPCC for Biodiversity was successful. The Politics of Knowledge and Global Biodiversity gives a full overview of the process of its implementation as finalised in 2013 and proposes an innovative conceptual framework that puts this specific case into a more general perspective of international politics and relations. It provides a detailed empirical analysis of the knowledge politics associated with the establishment of IPBES and its conceptual framework and methodological approach is grounded in a theoretical perspective. This pioneering work is the first to examine IPBES in this way and is essential reading for researchers and scholars of International Relations, Environmental and Biodiversity Politics, Science Policy Interfaces and Global Environmental Governance. It will also be of interest to political scientists and social scientists.

Values in Biodiversity Dirk Lanzerath, Minou Friele, 2014-01-23 Biodiversity may refer to the diversity of genes species or ecosystems in general These varying concepts of biodiversity occasionally lead to conflicts among researchers and policy makers as each of them require a customized type of protection strategy This book addresses the questions surrounding the merits of conserving an existing situation evolutionary development or the intentional substitution of one genome species or ecosystem for another Any practical steps towards the protection of biodiversity demand a definition of that which is to be protected and in turn the motivations for protecting biodiversity Is biodiversity a necessary model which is also useful or does it carry intrinsic value Debates like this are particularly complex when interested parties address it from different conceptual and moral perspectives Comprised of three parts each complemented by a short introductory paragraph this collection presents a variety of approaches to this challenge The chapters cover the perspectives of environmental scientists with expertise in evolutionary environmental biology systematic zoology and botany as well as those of researchers with expertise in philosophy ethics politics law and economics This combination facilitates a truly interdisciplinary debate by highlighting hitherto unacknowledged implications that inform current academic and political debates on biodiversity and its protection The book should be of interest to students and researchers of environment studies biodiversity environmental philosophy ethics and management

Ecological Politics and Democratic Theory Mathew Humphrey, 2007-09-12 This volume examines the reasons why some despair at the prospects for an ecological form of democracy and challenges the recent deliberative turn in environmental political thought Deliberative democracy has become popular for those seeking a reconciliation of these two forms of politics Demand for equal access to a public forum in which the best argument will prevail appears to offer a way of incorporating environmental interests into the democratic process This book argues that deliberative theory far from being friendly to the environmental movement shackles the ability those seeking radical change to make their voices heard in the most effective manner Mathew Humphrey challenges beliefs about the relationship between ecological politics and democracy at a time when those who take direct action are being swept up in the War on

Terror By calling for a more open and contested form of democracy in which the boundaries of what constitutes acceptable behaviour are not decided in advance of actual debate Ecological Politics and Democratic Theory is an original contribution to the literature on environmental politics ecological thought and democracy
