Governing Higher Education National Perspectives On Institutional Governance Higher Education Dynamics:

Governing Higher Education: National Perspectives on Institutional Governance Alberto Amaral, Glen Jones, B. Karseth, 2013-11-11 Over the last decades higher education has gone through an unprecedented growth period and as a result the average university or college has now more students and a larger output than ever before At the same time the socio economic and political demands with respect to higher education have grown dramatically These developments have taken place without a proportional increase of the budgets and facilities of the higher education institutions This has created an imbalance between the expectations with respect to higher education and the institutional capacities in the sector One of the underlying trends is that the traditional pact between higher education and society has become problematic Society no longer accepts the rather special and protected position that universities have had for a very long time in our societies The knowledge based social and cultural missions of higher education institutions are no longer taken for granted as the main legitimacy bases for public investments in higher education Universities and colleges are at present expected to function efficiently to contribute to sustainable economic growth at various levels and to add to national and even supranational trade balances On top of this they have to prove that they maintain a high level of quality in their primary activities i e teaching research and services while adapting and responding to the expectations expressed so vehemently in their environments and to a decreasing per capita funding basis

The Changing Dynamics of Higher Education Middle Management V. Lynn Meek, Leo Goedegebuure, Rui Santiago, Teresa Carvalho, 2010-07-16 Known as either soft or hard managerialism new managerialism or new public management this new narrative has irrespective of moniker permeated the institutions of higher education almost everywhere Taking this as its context this volume is founded on a comprehensive international comparative analysis of the evolving role of middle level academic managers deans heads of department and

their equivalents The chapters address key questions that will determine the future of academe have the imperatives of management theory caused a realignment of the values and expectations of middle level academic managers In what way do the new expectations placed on this group shape the academic profession as a whole And whose interests do middle level academic managers represent Based on material presented at one of the high level Douro Seminars on research into tertiary education this volume systematically combines theoretical views with empirical analysis It argues that managerialist pressure has resulted in changes in the way academic performance is measured There has been a shift in criteria away from research reputation teaching and scholarship to the measurement of performance based upon management capacities This has given middle level academic managers a pivotal role halfway between the predilections of high level decision makers and the maintenance of academic values and control The enhanced expectations and more defined functions of middle level academic managers are in clear contrast to earlier times when the position was considered a public spirited rite of passage for career minded academics Despite this the contributors to this book believe that the middle level managers in the ten countries examined are neither corporate lackeys nor champions of academe It is becoming increasingly clear that the ability of organisations to achieve their aims is largely dependent on the skill and dedication of middle managers Past studies of organisational dynamics have been preoccupied with the executive level of management This text which will be of great interest to researchers and policy makers alike attempts to redress the balance

Westerheijden, Bjorn Stensaker, Maria Joao Rosa, 2007-09-04 By bringing together leading experts on quality assurance in higher education from seven countries from Europe the USA and South Africa this volume intends to go several steps further than most publications on quality assurance First it brings together views from micro to macro levels in the multi actor space showing how quality assurance impacts the higher education system throughout Second it links quality assurance solidly to issues of regulation translation rather than mechanical implementation and transformation instead of being only focused on quality assurance as a single policy instrument Third it uses this broad range of research insights to criticize current practices explaining for instance why sometimes people have difficulty in tracing any concrete effects of all initiatives taken in this area Finally the book offers proposals for better focusing quality assurance in the future to address institutional challenges better The general purpose of the book then is to give an engaged academic reflection on how quality assurance is embedded in higher education and in a dynamic way to assess its impacts and potential improvements **The Dynamics of Change in Higher Education** Svein Kyvik, 2008-12-25 In most Western European countries higher education has to an increasing extent been developing outside universities partly through the establishment of new institutions and partly through the upgrading of professional and vocational schools into higher education colleges The main trend in countries with a binary system has been that student numbers have increased more in the college sector than in the university sector Yet there is a shortage of in depth studies on the changes that have taken place in this part of the educational system and on the processes that have driven this development The aim of this book is to improve our understanding of these processes through developing concepts and theoretical perspectives which might offer new insights of complex phenomena This book is based upon a large number of studies on college education in Norway and in other Western European countries I have studied change processes in this field over a period stretching back to the late 1970s Kyvik 1981 and this book synthesises my former publications as well as updates the development until August 2008 and presents new analyses based on my gradual attainment of deeper insight into the processes that have taken place *OECD Reviews of Tertiary Education Tertiary Education for the Knowledge Society Volume 1 and Volume 2* OECD, 2008-09-16 Tertiary Education for the Knowledge Society provides a thorough international investigation of tertiary education policy across its many facets governance funding quality assurance equity research and innovation academic career links to the labour market and internationalisation *The Higher Education Managerial Revolution?* Alberto Amaral, V.L. International Trends in University Governance Michael Shattock, 2014-06-05 Governance is becoming increasingly important in universities just as it is in the wider world of commerce and banking Historically universities were run by their academic communities but as mass higher education has taken root as university research has become a critical element in national economies and as the demand for more accountability both financial and in academic performance has grown pressure has mounted for a modernisation of governance structures One aspect of modernisation particularly important in many European systems and in Japan has been the decision by governments to give institutions greater autonomy more control over their budgets and legal responsibility for the employment of their staff International trends to introduce greater competition between institutions to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership a more systematic involvement of external stakeholders and a more corporate style of governance At the same time this has often led to a sense of loss of collegiality a redistribution of authority and a growing gap between the centre and the periphery within

universities This book analyses governance change in nine major higher education systems Australia Finland France Germany Italy Japan Norway the UK and the USA each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical cultural political and social characteristics of the different systems Michael Shattock is a leading authority on university governance this study offers the most up to date account of governance reform in a range of higher education systems an analysis of the common trends and an assessment of their impact on the idea of a university It will be essential reading for academics postgraduates and practitioners in higher education
