Governing Marine Protected Areas Peter Jones, 2014-02-24 In this innovative volume the author addresses some important challenges related to the effective and equitable governance of marine protected areas MPAs These challenges are explored through a study of 20 MPA case studies from around the world A novel governance analysis framework is employed to address some key questions How can top down and bottom up approaches to MPA governance be combined What does this mean in reality in different contexts How can we develop and implement governance approaches that are both effective in achieving conservation objectives and equitable in fairly sharing associated costs and benefits The author explores the many issues that these questions raise as well as exploring options for addressing them A key theme is that MPA governance needs to combine people state and market approaches rather than being based on one approach and its related ideals Building on a critique of the governance analysis framework developed for common pool resources the author puts forward a more holistic and less prescriptive framework for deconstructing and analyzing the governance of MPAs This interdisciplinary analysis is aimed at supporting the development of MPA governance approaches that build social ecological resilience through both institutional and biological diversity It will also make a significant contribution to wider debates on natural resource governance as it poses some critical questions for contemporary approaches to related research and offers an alternative theoretical and empirical approach

**Governing Marine Protected Areas (MPAs) in China** W. Qiu, 2010 There are growing academic and policy debates on how best to govern MPAs concerning the benefits and risks of different governance approaches and instruments This echoes the broader debates on the roles of state hierarchies markets and community participation in governing societal affairs This study investigates the roles of different actors involved in governing MPAs and the strengths and weaknesses of MPA governance in China The research questions are addressed through three detailed case studies Despite some variations the three case study MPAs show major similarities in governance structure In all three cases the attitudes of key actors towards biodiversity conservation and their influences on MPA decision making can be characterised by 1 an unenthusiastic state which often adopts a non interventionist strategy in MPA management and law enforcement as long as the MPAs exist on paper 2 corporatised local governments which are keen to influence and dominate MPA decision making and law enforcement to promote economic development 3 a growing private sector which can both strengthen or undermine MPA governance by forming alliances with government institutions and 4 silent local communities whose influence on MPA governance has been very limited In addressing the key conflicts in governing MPAs in China the use of economic instruments appears to be the most important steering mechanism Both state steering and community participation are used less effectively Overall the imbalance of power in governing MPAs and the over reliance on market based approaches arguably leads to failures in protecting the interests of biodiversity and local communities Restoring the balance of power in MPA governance in China may therefore mean repositioning the central state

and empowering local communities which will allow diversified and balanced use of different steering mechanisms Returning to a balance of power will also provide for more effective and equitable governance outcomes

**Contested Forms of Governance in Marine Protected Areas** Natalie Bown, Tim S. Gray, Selina M. Stead, 2013-01-17 In this book the authors examine the governance of marine protected areas MPA and in particular they compare two different forms of governance co management CM and adaptive co management ACM CM is characterized by the decentralization of the decision making process incorporating the governed as well as the government ACM is characterized by the dynamic process whereby co management decision making is made continuously responsive to the changing ecological and socio economic circumstances of the MPA The authors carry out a comprehensive critical analysis of CM and ACM before applying these concepts to the case study of the Cayos Cochinos Marine Protected Area off Honduras to assess two successive management cycles 2004-9 and 2008-13 The area was designated as an MPA in 1993 a governmental decision which was met with resentment by local communities CM was introduced in 2004 to involve these local stakeholders in the decision making process but achieved limited success In an attempt to deal with these deficiencies ACM was adopted in the second management plan in 2008 but whereas the position of the local communities improved it tipped the scales too far away from conservation A third management plan is currently being prepared that promises to strike a better balance between ecological and socio economic objectives A central theme of the book is to examine how far the CCMPA adhered to the principles of CM and ACM respectively in its first two management plans

*Governing Marine Protected Areas* Peter J. S. Jones, 2014 These challenges are explored through an

analysis of twenty MPA case studies from around the world *Protected Area Governance and Management* Graeme L. Worboys, Michael Lockwood, Ashish Kothari, Sue Feary, Ian Pulsford, 2015-04-08 *Protected Area Governance and Management* presents a compendium of original text case studies and examples from across the world by drawing on the literature and on the knowledge and experience of those involved in protected areas The book synthesises current knowledge and cutting edge thinking from the diverse branches of practice and learning relevant to protected area governance and management It is intended as an investment in the skills and competencies of people and consequently the effective governance and management of protected areas for which they are responsible now and into the future The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term and organisations such as International Union for the Conservation of Nature are a unifying force in this regard Nonetheless protected areas are a socio political phenomenon and the ways that nations understand govern and manage them is always open to contest and debate The book aims to enlighten educate and above all to challenge readers to think deeply about protected areas their future and their past as well as their present The book has been compiled by 169 authors and deals with all aspects of protected area governance and management It provides information to support capacity development training of protected area field officers managers in charge and executive level managers

**Marine Protected Areas** Jessica S. Sanders, D. F. Gréboval, Antonia Hjort, 2013 The five case studies from Belize Mauritania Samoa Philippines and Japan were prepared as part of a set of 16 studies gathering national experiences from around the world The studies are intended to ground the FAO Technical Guidelines on Marine Protected Areas MPAs and Fisheries<sup>1</sup> in practical experience and to inform the use of MPAs globally

**Securitizing Marine Protected Areas** Elizabeth M. De Santo, 2024-07-10 This book presents a novel examination of Marine Protected Areas within a security context bridging science policy and geopolitics and addressing the often under emphasized aspect of environmental justice The book argues that Marine Protected Areas MPAs are not only a critical tool for protecting marine biodiversity in a changing climate but they also play an important role at the intersection of geopolitics and environmental justice and they provide a case study of environmental governance at the science policy interface The book takes an interdisciplinary and critical approach and builds on the author's two decades of experience working in this field Geopolitically it explores the ways in which MPAs provide footprints for influence and access to resources far from home for nations with overseas territories MPAs also raise important issues connected to equity environmental justice and social justice including access to resources and participation in environmental decision making processes key aspects for achieving long term conservation goals The book also demonstrates how MPAs are a critical lens for understanding how policy makers cope with scientific uncertainty and the necessity of well designed and precautionary science advisory processes While the ecological contribution of MPAs is paramount social issues and geopolitical considerations are often less obvious in the discourse underpinning MPAs and the resulting tensions can undermine long

term conservation objectives By applying the three lenses of geopolitics environmental justice and science this book provides key insights to help the international community moving past the 2030 biodiversity targets and beyond towards a future of meaningful equitable and effective conservation approaches This book will be of great interest to students and scholars of biodiversity conservation marine studies political geography environmental governance and science policy studies It will also be of interest to marine conservation governance professionals and policymakers Governing Marine Protected Areas

**The Controversy over Marine Protected Areas** Alex Caveen,Nick Polunin,Tim Gray,Selina Marguerite Stead,2014-10-17 This book is a critical analysis of the concept

of marine protected areas MPAs particularly as a tool for marine resource management It explains the reasons for the extraordinary rise of MPAs to the top of the political agenda for marine policy and evaluates the scientific credentials for the unprecedented popularity of this management option The book reveals the role played by two policy networks epistemic community and advocacy coalition in promoting the notion of MPA showing how advocacy for marine reserves by some scientists based on limited evidence of fisheries benefits has led to a blurring of the boundary between science and politics Second the study investigates whether the scientific consensus on MPAs has resulted in a publication bias whereby pro MPA articles are given preferential treatment by peer reviewed academic journals though it found only limited evidence of such a bias Third the project conducts a systematic review of the literature to determine the ecological effects of MPAs and reaches the conclusion that there is little proof of a positive impact on finfish populations in temperate waters Fourth the study uses discourse analysis to trace the effects of a public campaigning policy network on marine conservation zones MCZs in England which demonstrated that there was considerable confusion over the objectives that MCZs were being designated to achieve The book s conclusion is that the MPA issue shows the power of ideas in marine governance but offers a caution that

scientists who cross the line between science and politics risk exaggerating the benefits of MPAs by glossing over uncertainties in the data which may antagonise the fishing industry delay resolution of the MPA issue and weaken public faith in marine science if and when the benefits of MCZs are subsequently seen to be limited **Marine Protected Areas**

**Economics, Management and Effective Policy Mixes** OECD,2017-06-05 Intense exploitation of our oceans and seas is degrading marine biodiversity and ecosystems at an alarming rate This report presents good practice insights for effectively managing marine protected areas MPAs one of the policy instruments available for the conservation and sustainable

Governance of Marine Fisheries and Biodiversity Conservation Serge M. Garcia,Jake Rice,Anthony Charles,2014-07-15 Governance of Marine Fisheries and

Biodiversity Conservation explores governance of the world s oceans with a focus on the impacts of two inter connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co

authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book s exploration of whether as the streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world s oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject **Governance of Marine Fisheries and Biodiversity Conservation** is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book

**Management of Marine Protected Areas** Paul D. Goriup, 2017-04-17 With the health of the world s oceans threatened as never before it is becoming increasingly apparent that Marine Protected Areas MPAs play a vitally important role in protecting marine and coastal habitats **Management of Marine Protected Areas A Network Perspective** draws on the results of a major EU sponsored research project related to the establishment of networks of MPAs in the Mediterranean and Black Seas that transpired from February 2011 to January 2016 Featuring contributions by leading university and national research institute based scientists chapters utilize the latest research data and developments in marine conservation policy to explore issues related to ways in which networks of MPAs may amplify the effectiveness and conservation benefits of individual areas within them Topics addressed include the broader socio economic impacts of MPAs in the Mediterranean and Black Seas the use of Marine Spatial Planning MSP to resolve conflicts between marine resource use and protection special protection measures under the EU s Marine Strategy Framework Directive MSFD ecological value assessments in the Black Sea the Ecosystem Approach EA for managing marine ecosystems MPAs along Turkey s Black Sea coast MPAs and offshore wind farms and managing and monitoring MPA networks within and between the Black and Mediterranean Seas Timely and important **Management of Marine Protected Areas A Network Perspective** offers invaluable insights into the role of MPAs in preserving the welfare and long term viability of our world s oceans **Governing the Provision of Ecosystem Services** Roldan Muradian, Laura Rival, 2012-11-13 Founded on the core notion that we have reached a turning point in the governance and thus the conservation of ecosystems and the environment this edited volume features more than 20 original chapters each informed by the paradigm shift in the sector over the last decade Where once the emphasis was on strategies for

conservation enacted through instruments of control such as planning and polluter pays legislation more recent developments have shown a shift towards incentive based arrangements aimed at those responsible for providing the environmental services enabled by such ecosystems Encouraging shared responsibility for watershed management developed in Costa Rica is a prime example and the various interests involved in its instauration in Java are one of the subjects examined here
