**Governing the Soul** Nikolas S. Rose, 1999 *Governing the Soul* is now widely recognized as one of the founding texts in a new approach to analyzing the links between political power expertise and the self This governmentality perspective has had important implications for a range of academic disciplines including criminology political theory sociology and psychology and has generated much theoretical innovation and empirical investigation The second edition contains a new introduction which sets out the methodological and conceptual bases of this approach Also a new final chapter has been added that considers some of the implications of recent developments in the government of subjectivity [Buy This Book](#) Mica Nava, Andrew Blake, Iain MacRury, Barry Richards, 2013-11-05 *Buy This Book* is an important contribution to the history and understanding of consumption and advertising This book brings together an outstanding collection of writing on the study of advertising consumer practices and the future directions of research Advertising and Consumption constitutes an invaluable resource for researchers teachers and students The essays are based on new textual and ethnographic research and engage with existing theoretical and historical work to form a volume which is a challenging companion to studies in this field

[Immaterial Bodies](#) Lisa Blackman, 2012-08-16 In this unique contribution Blackman focuses upon the affective capacities of bodies human and non human as well as addressing the challenges of the affective turn within the social sciences Fresh and convincing this book uncovers the paradoxes and tensions in work in affect studies by focusing on practices and experiences including voice hearing suggestion hypnosis telepathy the placebo effect rhythm and related phenomena Questioning the traditional idea of mind over matter as well as discussing the danger of setting up a false distinction between the two this book makes for an invaluable addition within cultural theory and the recent turn to affect In a powerful and engaging matter Blackman discusses the immaterial body across the neurosciences physiology media and cultural studies body studies artwork performance psychology and psychoanalysis Interdisciplinary in its core this book is a must for everyone seeking a dynamic and thought provoking analysis of culture and communication today **The Making of the Good Person** Nora Hämäläinen, 2023-04-03 This book provides a philosophical assessment of the idea of personhood advanced in popular self help literature It also traces within academic philosophy and philosophical scholarship a self help culture where the self is brought forth as an object of improvement and a key to meaning progress and profundity Unlike other academic treatments of the topic of self help this book is not primarily concerned with providing a critique of popular self help and self transformative practices Rather it is concerned with how they work to shape contemporary forms and ideals of moral personhood and are conducive to moral renegotiation and change The book consists of two parts with somewhat different argumentative strategies Part 1 consists of an overview and reassessment of popular self help literature and its sociological and journalistic critics written from a moral philosophical perspective Part 2 opens with discussion of the current attraction among a range of philosophers to self transformative themes The chapters assess the strand of self transformative

philosophy found in the work of Ludwig Wittgenstein Michel Foucault Pierre Hadot Stanley Cavell and Iris Murdoch Finally the book concludes with a discussion of the theme of social change and moral renegotiation in contemporary societies which is a central but underestimated undercurrent in discussions on contemporary self transformative practices The book's dual perspective on both popular self help and self transformative currents in philosophy enables a cultural and moral philosophical analysis of contemporary ethical ideals of personhood as well as reflection on the literatures available for its development The Making of the Good Person will be of interest to scholars and advanced students working in moral philosophy history of philosophy psychology sociology and literary studies

**An Analysis of Michel Foucault's Discipline and Punish** Meghan Kallman, Rachele Dini, 2017-07-05 Michel Foucault is famous as one of the 20th century's most innovative thinkers and his work on Discipline and Punish was so original and offered models so useful to other scholars that the book now ranks among the most influential academic works ever published Foucault's aim is to trace the way in which incarceration was transformed between the seventeenth and twentieth centuries What started as a spectacle in which ritual punishments were focused on the prisoner's body eventually became a matter of the private disciplining of a delinquent soul Foucault's work is renowned for its original

insights and Discipline and Punish contains several of his most compelling observations Much of the focus of the book is on making new connections between knowledge and power leading Foucault to sketch out a new interpretation of the relationship between *voir savoir* and *pouvoir* or to see is to know is to have power Foucault also dwells in fascinating detail on the true implications of a uniquely creative solution to the problems generated by incarcerating large numbers of criminals in a confined space Jeremy Bentham's panopticon a prison constructed around a central tower from which hidden guards might or might not be monitoring any given prisoner at any given time As Foucault points out the panopticon creates a prison in which inmates will discipline themselves for fear of punishment even when there are no guards present He goes on to apply this insight to the manner in which all of us behave in the outside world a world in which CCTV and speed cameras are explicitly designed to modify our behavior Foucault's highly original vision of prisons also ties them to broader structures of power allowing him to argue that all previous conceptions of prison are misleading even wrong For Foucault the ultimate purpose of incarceration is neither to punish inmates nor to reduce crime It is to produce delinquency as a way of enabling the state to control and of structure crime

*Work, Subjectivity and Learning* Stephen Billett, Tara Fenwick, Margaret Somerville, 2007-06-03 In recent year efforts to understand learning for and throughout working life have moved away from a focus on workplace training to concerns about learning as a component and outcome of engaging in work and work related activities and interactions This shift acknowledges a broader set of workplace factors that shape workers learning and development Yet equally it acknowledges that this learning through engagement is also necessarily shaped by the diverse ways that individuals elect to engage or participate in workplace activities Central here is the issue of individuals subjectivity and how this is shaped by but shapes engagement in work and therefore what learning flows from their participation It is in considering the relations among subjectivity learning and work that it is possible to advance both the conceptual and procedural bases for understanding learning through and for working life Moreover the focus on relations among subjectivity work and learning represents a point of convergence for diverse disciplinary traditions and practices that are provided by the book's contributors In this way the contributions represent something of the emerging perspectives that are elaborating the complex relations among subjectivity work and learning and circumstances in which they are played out

**Learning across Contexts in the Knowledge Society** Ola Erstad, Kristiina Kumpulainen, Åsa Mäkitalo, Kim Christian Schrøder, Pille Pruulmann-Vengerfeldt, Thuridur Jóhannsdóttir, 2016-02-10 Developments within the knowledge society especially those resulting from technological innovation have intensified an interest in the relationship between different contexts and multiple sites of learning across what is often termed as formal non formal and informal learning environments The aim of this book is to trace learning and experience across multiple sites and contexts as a means to generate new knowledge about the borders and edges of different practices and the boundary crossings these entail in the learning lives of young people in times of dynamic societal environmental economic and technological change The empirical research discussed in this book has grown out of a Nordic network of researchers The research initiatives in the Nordic countries tend to avoid the more spectacular debates over the future of the educational institutions that tend to dominate and obscure discussions on education in the knowledge society and which look to models of informal learning whether in the learning communities of workplaces and families or in the new socio technical spaces of the Internet as a source of alternative educational strategies Rather Nordic researchers more modestly ask whether it is possible to envisage new models of teaching and learning which take seriously both the responsibility to social justice and social wellbeing which at least rhetorically underpinned a commitment to mass education of the 20th century as well as to the radical challenges to traditional educational models offered by the new socio technical spaces and practices of the 21st century

place and nature of learning outside of the school It challenges dominant versions of school around the world whilst also critically discussing the value and place of non institutionalised learning Learning Beyond the School should be of interest to academics researchers postgraduate scholars engaged in the study of comparative education youth work education systems digital culture sociology of education and youth development It should also be essential reading for practitioners and policymakers who are interested in youth and education system reform
