## **Governing Social Risks In Post Crisis Europe:**

*Governing Social Risks in Post-Crisis Europe* Colin Crouch, 2015-01-30 In this illuminating book Colin Crouch examines the diverse approaches presented by advanced societies in their attempts to resolve a central dilemma of a capitalist economy the need to combine buoyant mass consumption with insecure workers subject to The Political Economy of Policy Ideas Gemma Scalise, 2020-10-15 In 2008 the European Commission relaunched the policy idea of active inclusion with the aim of facilitating the integration of people into sustainable and quality employment Over ten years later and in the aftermath of one of the most trying periods in Europe's recent economic history this book provides a critical and timely reassessment The Political Economy of Policy Ideas contributes to the growing scholarly literature on ideational political economy and labour market regulation by providing a systematic analysis of the idea of active inclusion and its three core principles activation conditionality and personalization The research breaks new ground by detailing how divergent interpretations of these principles by relevant social actors in different contexts have shaped their implementation The book is of interest to scholars and students across comparative political economy economic sociology welfare and industrial relations studies

Corporate Governance in Contention Ciaran Driver, Grahame Thompson, 2018-06-10 Corporate governance is a complex idea that is often inappropriately simplified as a cookbook of recommended measures to improve financial performance Meta studies of published research show that the supposed benign effects of these measures independent directors or highly incentivised executives are at best context specific There is thus a challenge to explain the meaning purpose and importance of corporate governance This volume addresses these issues The issues discussed centre on relationships within the firm e.g. between labour managers and investors and relationships outside the firm that affect consumers or the environment The essays in this collection are the considered selection by the editors and the contributors themselves of what are seen as some of the most weighty and urgent issues that connect the corporation and society at large in developed economies with established property rights The essays are to be read in dialogue with each other giving a richer understanding than could be obtained by shepherding all contributions into a single mould Nevertheless taken together they demonstrate a shared sense of deep concern that the corporate governance agenda has been and still is on the wrong track The contributors individually and collectively identify in this compendium both a research programme and a platform for change Labour Mobility in the Enlarged Single European Market Jon Erik Dølvik, Line Eldring, 2016-11-22 The economic crisis has caused a surge in intra European labour mobility unleashing heated debates about the consequences of large scale labour migration This volume improves understanding of the drivers mechanisms and effects of the past decade's surge in cross border labour mobility and work related migration within Europe *Climate Change as Societal Risk* Mikael Granberg, Leigh Glover, 2023-11-02 This book analyzes climate change from a societal risk perspective considering IPCC data harm reduction and global impact Climate change is a globalised agent of social disruption whose impacts will worsen societal inequities and

inequalities around the world For some unfortunate societies already precariously exposed climate change will tip them into societal collapse Devastation will also occur to many ecological values in which all societies are embedded But effective social action can limit the extent of these costs and losses Ultimately only social transformation can limit the social and environmental harms of climate change But what does this mean To what extent is society at risk Are such risks particularized and restricted to specific segments and localities Or is society at risk in a more universal way Climate risks are re shaping the practices of households communities governments and businesses In this way climate risks are a dynamic element in social change and social processes Risk holds a mirror to society revealing who and what is prioritized recognized and valued It also provides a reckoning of our perceived strengths vulnerabilities and weaknesses This volume examines how we understand the societal risks of contemporary and forecast climate change impacts and those risks inherent in dealing with these impacts We know that society is fashioning a new global climate but climate change is also re fashioning society this book explores this dynamic process and considers its implications for future society

**Heat, Greed and Human Need**  
Ian Gough, 2017-10-27 This book builds an essential bridge between climate change and social policy Combining ethics and human need theory with political economy and climate science it offers a long term interdisciplinary analysis of the prospects for sustainable development and social justice Beyond green growth which assumes an unprecedented rise in the emissions efficiency of production it envisages two further policy stages vital for rich countries a progressive recomposition of consumption and a post growth ceiling on demand An essential resource for scholars and policymakers

*Employment Relations in the 21st Century*  
Valeria Pulignano, Frank Hendrickx, 2019-11-07 It cannot be denied that in recent decades for many if not most people work has become unstable and insecure with serious risk and few benefits for workers As this reality spills over into political and social life it is crucial to interrogate the transformations affecting employment relations shape research agendas and influence the policies of national and international institutions This single volume brings together thirty nine scholars both academics and experienced industrial relations actors in the fields of employment relations and labour law in a forthright discussion of new approaches theories and methods aimed at ameliorating the world of work Focusing on why and how work is changing how collective actors deal with it and the future of work from different disciplinary angles and at an international level the contributors describe and analyse such issues and topics as the following new forms of social protection and representation differences in the power relations of workers and political dynamics balancing protection of workers dignity and promotion of productivity intersection of information technology and workplace regulation how the gig economy undermines legal protections role of professional and trade associations workplace conflict management lay judges in labour courts undeclared work in the informal sector of the labour market work incapacity and disability in coherence of the work related case law of the European Court of Justice and business restructurings Derived from a major conference held in Leuven in September 2018 the book offers an in depth understanding of the changing world

of work its main transformations and the challenges posed to classical employment relations theories and methods as well as to labour law With its wide range of insights analysis and reflection this unique contribution to the study of industrial relations offers an authoritative reference guide to scholars policymakers trade unions and business associations human resources professionals and practitioners who need to deal with the future of work challenges *Rethinking Capitalism* Michael Jacobs, Mariana Mazzucato, 2016-07-21 Thought provoking and fresh this book challenges how we think about economics Gillian Tett Financial Times For further information about recent publicity events and media coverage for Rethinking Capitalism please visit <http://marianamazzucato.com/rethinking-capitalism> Western capitalism is in crisis For decades investment has been falling living standards have stagnated or declined and inequality has risen dramatically Economic policy has neither reformed the financial system nor restored stable growth Climate change meanwhile poses increasing risks to future prosperity In this book some of the world's leading economists propose new ways of thinking about capitalism In clear and compelling prose each chapter shows how today's deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it The chapters examine a range of contemporary economic issues including fiscal and monetary policy financial markets and business behaviour inequality and privatisation and innovation and environmental change The authors set out alternative economic approaches which better explain how capitalism works why it often doesn't and how it can be made more innovative inclusive and sustainable Outlining a series of far reaching policy reforms Rethinking Capitalism offers a powerful challenge to mainstream economic debate and new ideas to transform it

**Civic Capitalism** Colin Hay, Anthony Payne, 2015-04-17 As we struggle with the legacy of the crisis and with the prospect of accelerating environmental degradation it is time to ask not what we can do for capitalism but what capitalism can do for us as citizens of a democratic society In Civic Capitalism Colin Hay and Anthony Payne build on their influential analysis of the crisis of the Anglo liberal growth model to set out a coherent account of the steps required to build an alternative that is more sustainable socially economically and environmentally They argue that it is time to move on from the Anglo liberal model of capitalism whose failings were so cruelly exposed by the crisis They outline a new model that will work better in advanced capitalist societies showing how this might be achieved in Britain today They call this civic capitalism the governance of the market by the state in the name of the people to deliver collective public goods equity and social justice This reverses the long ascendant logic of Anglo liberalism in which citizens have been made to answer to the perceived logics of the capitalism they have been made to serve The crisis shows us that we can no longer be driven by the perceived imperatives of the old model and by those who have claimed for far too long and as it turns out falsely to be able to discern for us the imperatives of the market It is now time to ask what capitalism can do for us and not what we can do for capitalism

**Work in the Digital Age** Max Neufeind, Jacqueline O'Reilly, Florian Ranft, 2018-06-01 Shining a light on the very different experiences of work in the digital age this book provides a unique contribution to the reform discussion on the

consequences of the fourth industrial revolution Drawing on a wide range of international expertise contributors examine important policy challenges arising from the transformation of work as a result of the introduction of digital technology at work Authors in this volume discuss the effects of automation platform business models stagnating productivity increasing regional disparities and rising levels of inequality within and between countries They consider how to unlock the vast economic and social potential of new technologies and the implications for policy reform to meet these challenges Mastering them requires developing a new inclusive narrative and progressive reform agenda Such an agenda would be economic and political and not determined universally by technology The narrative is not only about what policymakers need to do which is rather a lot It is also about reforming established organisations and institutions understanding new emerging players and supporting disaffected citizens in how the effects of these changes are going to affect their lives The authors clearly pinpoint what needs to be done to support the transition to work in the digital era

A European Politics of Education Romuald Normand, Jean-Louis Derouet, 2016-06-10 A European Politics of Education proposes a sociology of education establishing connections between empirical data coming from European scale comparative surveys normative assumptions structuring actors representations and interpretative judgements and a specific focus on Lifelong Learning policy areas It invites readers to think about the place of standards expertise and calculations in the European space from a common perspective supported by a tradition of critical sociology and European political studies The book Addresses an important agenda how the policies and politics of supranational Europe are making a European educational space Contains a response to the emergence of new epistemic governance and instruments at European level Contains contributions from the EU and the UK which give a comprehensive selection of perspectives and analysis of the field as it concerns Europe The complexity of the contemporary European education policy space is addressed here with new lines of inquiry as well as a reflexive outlook on standardization policy making and actor engagement Students and researchers of European policy studies education policy analysts and theorists will all be particularly interested readers

The Knowledge Corrupters Colin Crouch, 2016-04-25 In principle the advanced market driven world in which we now live is fuelled by knowledge information and transparency but in practice the processes that produce this world systematically corrupt and denigrate knowledge this is the powerful and provocative argument advanced by Colin Crouch in his latest exploration of societies on the road to post democracy Crouch shows that executives in profit maximizing corporations have incentives to ignore or distort knowledge especially firms in the information business of the mass media themselves as financial knowledge increasingly trumps the other kinds of knowledge that business needs Firms also seek to take control of public knowledge and use it for their own ends often at the cost of other stakeholders in society Meanwhile the transfer of similar practices to professional public services undermines professional skills and ethics especially when these services are out sourced to the private sector Attempts to extricate ourselves from these problems involve reshaping the complex and often conflicting relationships among citizens professionals

managers and financiers This new book by one of the most incisive critics of contemporary Western societies will be of interest to a wide range of readers from students to policy makers and those who work in the public and private sectors

International Comparative Employee Relations Karl Koch,Pietro Manzella,2019 Employee relations in national contexts are significantly influenced not only by material forces but also by cultural and linguistic factors that are often highly nationally specific In this innovative book culture and language are analysed in terms of how they affect employee relations internationally demonstrating the importance of recognising and understanding these elements in the face of increasing globalisation

**Jobs with Inequality** John Peters,2022-06-29 Income inequality has skyrocketed in Canada over the past few decades The rich have become richer while the average household income has deteriorated and job quality has plummeted Common explanations for these trends point to globalization technology or other forces largely beyond our control But as Jobs with Inequality shows there is nothing inevitable about inequality Rather runaway inequality is the result of politics and policies what governments have done to aid the rich and boost finance and what they have not done to uphold the interests of workers Drawing on new tax and income data John Peters tells the story of how inequality is unfolding in Canada today by examining post democracy financialization and labour market deregulation Timely and novel Jobs with Inequality explains how and why business and government have rewritten the rules of the economy to the advantage of the few and considers why progressive efforts to reverse these trends have so regularly run aground

**The Political Economy of Italy in the Euro** Leila Simona Talani,2017-07-03 This book proposes an alternative political economy framework in which to analyse the question of the credibility of international economic agreements in general and monetary arrangements in particular The focus is on European monetary arrangements from the establishment of the European Monetary System to the crisis of the Euro zone The analysis is predicated around the political economy of Italy s access and permanence in the Economic and Monetary Union EMU The author argues that the case of Italy which made a concerted effort to join the EMU in the first wave is particularly striking Support for the single currency was widespread when it was introduced yet something went wrong Nowadays its participation to the European monetary integration process cannot be easily taken for granted especially after the vicissitudes of the Euro zone crisis

**Handbook of European Social Policy** Patricia Kennett,Noemi Lendvai-Bainton,2017-08-25 This Handbook will comprise of 29 original pieces from key contributors to the field of European social policy It is intended to capture the state of the art in European social policy and to generate and contribute to debates on the the future of European social policy in the 21st Century It will be a comprehensive and authoritative resource for research and teaching covering themes and policy areas including social exclusion pensions education children and family as well as mobility and migration multiculturalism and climate change

**Regulating Risks in the European Union** Maria Weimer,Anniek de Ruijter,2017-10-05 A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks Which chemicals are safe and should be

allowed on the market How should the EU respond to public health emergencies such as Ebola and other infectious diseases Regulatory responses to these questions confront deep uncertainty limited knowledge and societal contestation In a time where the use of scientific expertise in EU policy making is particularly contested this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power It draws on insights from law governance political sciences and science and technology studies bringing together leading scholars in this field Contributions are drawn together by a shared theoretical perspective namely by their use of co production as an analytical lens to study the intricate interplay between techno scientific expertise and EU executive power By so doing this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction This book will be useful to scholars practitioners and policy makers working on risk regulation and the role of expertise in public decision making
