**Grid Computing - GRID 2000** Rajkumar Buyya, Marc Baker, 2003-07-31 Welcome to GRID 2000 the first annual IEEE ACM international workshop on grid computing sponsored by the IEEE Computer Society's Task Force on Cluster Computing TFCC and the Association for Computing Machinery ACM

The workshop has received generous sponsorship from the European Grid Forum eGrid the EuroTools SIG on Metacomputing Microsoft Research USA Sun Microsystems USA and the Centre for Development of Advanced Computing India It is a sign of the current high levels of interest and activity in Grid computing that we have had contributions to the workshop from researchers and developers in Australia Austria Canada France Germany Greece India Italy Japan Korea The Netherlands Spain Switzerland UK and USA It is our pleasure and honor to present the first annual international Grid computing meeting program and the proceedings The Grid A New Network Computing Infrastructure The growing popularity of the Internet along with the availability of powerful computers and high speed networks as low cost commodity components are helping to change the way we do computing These new technologies are enabling the coupling of a wide variety of geographically distributed resources such as parallel supercomputers storage systems data sources and special devices that can then be used as a unified resource and thus form what is popularly known as the Grids
