Barber,2020-05-12 This book argues that the two most influential theories on modern human behavior cultural determinism
and evolutionary psychology are quite inadequate Cultural deterministic theories deny personal experience and too often fall
prey to anthropocentric bias Most evolutionary psychologists argue that humans are shaped to fit our ancestral past
effectively freezing us in time Evolution in the Here and Now looks to new factors like social learning and adaptation to
explain the idiosyncrasies of human behavior in a more complete and nuanced way Evolutionary psychologist Nigel Barber
shows that human behavior is uniquely crafted by the surrounding environment in underappreciated and surprising ways For
example commerce and agriculture can be interpreted as adaptive alternatives to hunting and gathering Irrigated farming
was a response to land scarcity which ultimately permitted the rise of early cities This cross disciplinary approach unites the
missing ingredients that have for so long impeded our understanding of our own species and its variation across cultures
Evolution in the Here and Now is a bold step forward in the evolutionary understanding of human behavior that marries our
biology with our history in ways that have never been attempted before Subject Guide to Children's Books in Print 1997
