Vector borne infectious diseases such as malaria dengue fever yellow fever and plague cause a significant fraction of the global infectious disease burden indeed nearly half of the world's population is infected with at least one type of vector borne pathogen CIESIN 2007 WHO 2004a
Vector borne plant and animal diseases including several newly recognized pathogens reduce agricultural productivity and disrupt ecosystems throughout the world These diseases profoundly restrict socioeconomic status and development in countries with the highest rates of infection many of which are located in the tropics and subtropics
Although this workshop summary provides an account of the individual presentations it also reflects an important aspect of the Forum philosophy The workshop functions as a dialogue among representatives from different sectors and allows them to present their beliefs about which areas may merit further attention These proceedings summarize only the statements of participants in the workshop and are not intended to be an exhaustive exploration of the subject matter or a representation of consensus evaluation
