

Lab 5 – Diffusion and Osmosis – Study Guide

I. Diffusion across a selective permeable membrane

1. Diffusion is a passive process that moves substances from an area of **higher** concentration to an area of **lower** concentration.

2. How do we test for the presence of starch using iodine (IKI)?

When Iodine (IKI) reagent is added to a starch solution, A blue-black color results if starch is present.

3. Dialysis tubing is a selectively permeable membrane made with cellulose. The only selective criterion for a dialysis membrane is the size of the molecule.

- Between iodine (IKI), glucose ($C_6H_{12}O_6$), and starch, which molecule(s) are considered small and therefore likely to pass through a dialysis membrane?

Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources
Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered
curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent
students and expand their understanding of the world around them Resources for Teaching Middle School Science developed
by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum
materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are
aligned with the National Science Education Standards This completely new guide follows on the success of Resources for
Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered
curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five
chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and
Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity
books Each annotation of curriculum material includes a recommended grade level a description of the activities involved
and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The
curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria
developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards
The annotations designate the specific content standards on which these curriculum pieces focus In addition to the
curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science
Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching
directories and guides to science trade books and periodicals for teachers and students Another section features institutional
resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for
interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies
that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources
for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators

Research and the Question(s) of Time David R. Cole, Mehri Mirzaei Rafe, Gui Ying Annie Yang-Heim, 2024-06-24 This book

fully explores the question s of time in educational research and achieves the acceleration and merging of inquiry with action to understand change and implement these findings through practice It deals with the philosophy of education higher education schooling the curriculum time displacement technology the environment and policy This book focuses on time revolution s It explores new ways of thinking about time that question a linear arrow in time and sets into motion an educational research agenda to extract revolutions of time Furthermore this book figures the dimension of time in teaching and learning by extending and deepening the engagement with time in education For example it analyzes the climate crisis in terms of education and how the realization that the climate is changing sits parallel and adjacent to pedagogy The climate crisis and how to do anything about it through education is an example of how considering the dimension of time opens up education beyond quick or narrow fixes and introduces a profound synthesis for the future
