A painting of a street scene. In the foreground, a man with tattoos on his back and arms, wearing red and blue shorts, stands with his back to the viewer, holding a long wooden staff. In the center, a young boy in a green and white striped shirt and green shorts stands with his arms crossed. To the right, a man in a white tank top and dark pants, also with tattoos, is leaning forward, holding a long wooden staff. In the background, there is a green storefront with a sign that reads 'D.C. GROCERY'. A red and white striped awning is over the entrance. A 'DO NOT ENTER' sign is on a blue pole. The scene is set on a street with other buildings in the background.

Crime and No Punishment Marie Gottschalk, 2025-11-18 How concentrated economic and political power in America protects elites and fosters violence of all kinds The United States is an exceptionally violent country increasingly unable or unwilling to stem violence in its many forms A growing corporate crime wave has gone unprosecuted and unpunished with those in the C suites largely escaping accountability Meanwhile the country has doubled down on pursuing people accused of street and drug crimes and immigration offenses Corporate impunity the financialization of the economy militarized policing the burgeoning carceral state and the forever wars in Afghanistan Iraq and elsewhere all have fostered corporate economic and state violence in America In *Crime and No Punishment* Marie Gottschalk argues that these developments have undermined the legitimacy of American political and economic institutions Gottschalk analyzes how the concentration of economic political and military power has siphoned off vital resources preying on the most vulnerable communities and normalizing violence and death It has kept America from attacking the root causes of violent street crime and curtailing deaths of despair from suicide alcoholism drug overdoses and chronic diseases The United States continues to incarcerate more of its people than nearly every other country even as it decriminalizes or turns a blind eye to elite level corporate crime Public and scholarly attention however remains fixated on violent street crime although corporate and white collar crime and state and economic violence directly and indirectly hurt far more people in the United States Gottschalk contends that the US failure to protect its people from these harms has increased the fragility of democracy in America

Counter-Terrorism Technologies Peter Lehr, 2018-07-10 This book critically discusses the role of technology for counter terrorism in general and for securing our vulnerable open societies in particular It is set against the backdrop of the terrorist threat posed by the combined forces of Al Qaeda and ISIS Daesh in the foreseeable future The book commences by illuminating current and foreseeable tactics and weapons used by these implacable enemies weapons that may well include chemical biological radiological and potentially even nuclear CBRN devices In a second part it introduces technologies already available or in development that promise an increase in safety and security when it comes to the dangers posed by these terrorists This part also includes a critical discussion of advantages and disadvantages of such technologies that are quite often sold as a silver bullet approach in the fight against terrorism Controversies such as those triggered by the abuse of millimeter wave scanners deployed at several Western European airports will demonstrate that there are costs involved with regard to human rights The third analytical part takes the critical discussion further by arguing that the uncritical fielding of new surveillance and control technologies in parallel with the on going outsourcing and privatization of key services of the state could well lead to dystopias as envisaged in a rather prescient way by the so called cyperpunk novels of the 1980s The book concludes with the question that any liberal democracy should ask itself how far can we go with regard to hardening our societies against terrorist threats

War, Police and Assemblages of Intervention Jan Bachmann, Colleen Bell, Caroline

Holmqvist,2014-11-13 This book reflects on the way in which war and police policing intersect in contemporary Western led interventions in the global South The volume combines empirically oriented work with ground breaking theoretical insights and aims to collect for the first time thoughts on how war and policing converge amalgamate diffuse and dissolve in the context both of actual international intervention and in understandings thereof The book uses the caption WAR POLICE to highlight the distinctiveness of this volume in presenting a variety of approaches that share a concern for the assemblage of war police as a whole The volume thus serves to bring together critical perspectives on liberal interventionism where the logics of war and police policing blur and bleed into a complex assemblage of WAR POLICE Contributions to this volume offer an understanding of police as a technique of ordering and collectively take issue with accounts of the character of contemporary war that argue that war is simply reduced to policing In contrast the contributions show how both historically and conceptually the two are always already connected Contributions to this volume come from a variety of disciplines including international relations war studies geography anthropology and law but share a critical poststructuralist approach to the study of international intervention war and policing This volume will be useful to students and scholars who have an interest in social theories on intervention war security and the making of international order *Domestic Military Powers, Law and Human Rights* Michael Head,2019-12-05 This book examines the national and international law human rights and civil liberties issues involved in governments calling out the armed forces to deal with civil unrest or terrorism The introduction of domestic military powers has become an international trend Troops already have been seen on the streets in major Western democracies These developments raise major political constitutional and related problems Examining the changes underway in eight comparable countries the United States Canada Britain France Italy Germany Japan and Australia this book provides a review and analysis of this trend including its implications for legal and political rights The book will be of interest to the general public as well as students academics and policy makers in the areas of human rights and civil liberties constitutional law criminal justice and security studies *With Stones in Our Hands* Sohail Daulatzai,Junaid Rana,2018-05-15 Bringing together scholars and activists With Stones in Our Hands confronts the rampant anti Muslim racism and imperialism across the globe today After September 11 2001 the global War on Terror has made clear that Islam and Muslims are central to an imperial system of racism Prior to 9 11 white supremacy had a violent relationship of dominance with Islam and Muslims Racism against Muslims today borrows from centuries of white supremacy and is a powerful and effective tool to maintain the status quo With Stones in Our Hands compiles writings by scholars and activists who are leading the struggle to understand and combat anti Muslim racism Through a bold call for a politics of the Muslim Left and the poetics of the Muslim International this book offers a glimpse into the possibilities of social justice decolonial struggle and political solidarity The essays in this anthology reflect a range of concerns such as the settler colonial occupation of Palestine surveillance and policing blackness and radical protest traditions militarism and empire building
