Joseph Joyner, 2015-05-13 Since the internet speeds went above the 500kbps mark, the number of things people can do with their interconnected devices skyrocketed. Automated homes, connected cars, and internet-enabled TVs: the latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV, and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly or limiting. The alternative would be going for a TV with an HDMI port, a USB port, and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market. **Google Home**
