the invention of the telegraph early in the nineteenth century Never before had people been able to communicate over long distances faster than a horse could travel Along with the development of the world s first high speed network the railroad the telegraph upended centuries of stability and literally redrew the map of the world Wheeler puts these past revolutions into the perspective of today when rapid fire changes in networking are upending the nature of work personal privacy education the media and nearly every other aspect of modern life But he doesn t leave it there Outlining What s Next he describes how artificial intelligence virtual reality blockchain and the need for cybersecurity are laying the foundation for a third network revolution Hydraulic manual consisting of working tables and explanatory text Lowis D'Agullar Jackson,1883 **Crisis**
