Governance Regieren In Komplexen Regelsystemen Eine Einfhrung German Edition:

Analysis of the German EXIST-II-Program and Its Transferability to Mexico Claudia Erika Gutiérrez Díaz, 2013

The promotion of entrepreneurship in higher education appears in the political spectrum as a new economic policy arena. In this field, policy blanks and new kinds of problems need to be addressed. Scholars agree that many of the current structures and models in higher education do not fit the necessary requirements for the development of entrepreneurship training. New perspectives in this field can be gained through an analysis of the feasibility of a policy transfer of the German EXIST II Program to Mexico. This program was developed to address the entrepreneurial potential within higher educational institutions through the coordination of entrepreneurial efforts carried out by regional, national, and supranational actors. An empirical analysis of the objectives, regulations, actors, and governance personnel, staff, financial resources, beneficiaries, and output of the program, as well as a comparative study of Germany versus Mexico in this book, demonstrates under what conditions the transfer of know-how from Germany, specifically from the EXIST II Program to universities in Mexico, could be implemented. The research offers alternatives to improve the current ongoing initiatives in Mexico.

Global Environmental Governance Louis J. Kotzé, 2012-01-01. This book is a novel, sophisticated, broad-ranging, and insightful study of the idea of global environmental governance, but from a legal dimension and perspective. While recognising that concepts and ideas used to describe governance are generally abstract, vague, and slippery, this project brings clarity to the field by being theoretically informed, contextually sensitive, and pragmatically circumscribed. Its conclusions and arguments open up a field of inquiry that has to be genuinely interdisciplinary and in that sense has great potential to contribute to a better understanding of environmental themes and issues. This book is destined to become a landmark for legal academics who will write about environmental governance, in that its concern is with the global governance of nature rather than a text that uses the environment as a pretext for understanding governance. It is well-written, easy, and enjoyable to read, and while it traverses through diverse bodies of literature, it manages to effectively communicate with a variety of scholarly communities.

Afshin Akhtarkhvari, Griffith Law School, Australia. Fourth-generation global environmental regulation attempts to address the complex realities of an interconnected environment: global environmental problems and collective regulatory responses. It merits conceptual clarity. Louis Kotz reveals the legal contours and content of global environmental governance by chipping away such parts of the conceptual marble block as are not needed. For the environmental lawyer, it is a welcome and much-needed process of elimination. This book provides a toolkit for lawyers to engage critically with the extra-legal concept of environmental governance. Its scrutiny and careful analysis contribute meaningfully to the environmental discourse.

Christine Voigt, University of Oslo, Norway. Global Environmental Governance is a truly important book. Drawing on a multitude of disciplines, award-winning environmental law Professor Louis Kotz masterfully explains the emerging concept of global environmental governance and its elements of globalism, environmental law, regulation, and governance theory. He makes a

compelling case that the world has outgrown the sustainability model and moved toward this more all encompassing approach to environmental regulation This admirable book makes global environmental governance theory understandable and pertinent so environmental leaders lawyers and regulators can engage comfortably with this new vision for an ecologically and economically healthy world George Rock Pring University of Denver Sturm College of Law US This book in examining the relationship between global environmental governance and environmental law provides an important and timely contribution to the quest to fashion a more viable approach to regulating the relationship between humanity and the environment While the term governance is much employed in international environmental law scholarship its conceptual underpinnings have not on the whole been adequately addressed in the legal sphere and understanding of the symbiotic relationship between the two areas has suffered as a result This book makes a welcome start to tackling these issues and it is to be hoped will trigger renewed vigour in this socially and legally vital area of inquiry Karen Morrow University of Swansea Wales UK For years scholars of international law and international relations have developed parallel literatures In Global Environmental Governance Louis Kotz offers a common conceptual theoretical and normative ground in the global environmental field As a skillful lawyer he dissects terminology explains core assumptions and constructs causal chains But he does not stop there His shrewd analysis of power and authority individual incentives and collective action management and regulation builds a bridge between law and politics as disciplines concerned about what global environmental governance is and how it can be improved Maria Ivanova University of Massachusetts US In search of shelter from the buffeting blasts of climate change biodiversity loss resource depletion famine and disease states and public agencies community representatives resource users advocacy networks and citizens huddle together under the vast and varied institutional umbrellas of environmental governance Louis Kotz s innovative study systematically describes the role of environmental law as the springs stretchers ribs and handles of the decision making umbrellas we so desperately hope will hold firm when they are opened up in times of need Jamie Benidickson University of Ottawa Canada The concept of global environmental governance has been part of the lexicon in accounts of global environmental politics for some time Yet to date it has escaped comprehensive assessment from a legal perspective This groundbreaking work fills this gap in the literature It offers a masterful analysis of the theoretical underpinnings of the environmental governance and highlights the critical importance of environmental regulation in ensuring that environmental governance lives up to its promise as a means for achieving truly ecologically sustainable development Tim Stephens University of Sydney Australia This timely book brings much needed clarity to the concept of environmental governance as manifested in the global regulatory domain The author argues that despite being used as a fashionable term by many including economists political scientists environmentalists and increasingly lawyers its theoretical contours and conceptual content remain unclear incoherent and inconsistent In addressing this problem the book begins by describing globalization as a general context of governance It comprehensively

interrogates and clarifies both the governance and global governance concepts and then explains aspects and components of global environmental governance Finally it investigates the role of law in global environmental governance Providing a much needed definition of environmental governance and global environmental governance this comprehensive study will appeal to academics and researchers post graduate and under graduate students intergovernmental organizations such as UNEP WTO IUCN as well as governments and governmental agencies involved with environmental regulation National Action Plans in the Global Governance of Business and Human Rights Yannick Poullie,2022-05-31 Diese Arbeit analysiert Nationale Aktionspläne für Wirtschaft und Menschenrechte als bedeutsamen Schritt in der Entwicklung unternehmerischer Menschenrechtsverantwortung Angeleitet vom diskursiven Institutionalismus und gerahmt von einer Interpretation des Politikfeldes als Wettbewerb konkurrierender Ideen wird am Beispiel von Schweden und Deutschland detailliert der Einfluss staatlicher und nichtstaatlicher Akteure im Politikprozess beleuchtet und aufgezeigt unter welchen Bedingungen unternehmerische Menschenrechtsverantwortung größere Verbindlichkeit gewinnt Die Studie leistet theoretisch und empirisch einen innovativen Beitrag zur politikwissenschaftlichen Menschenrechtsforschung *Assessment Policy Reform* Tina Isaacs,Iasonas Lamprianou,2020-05-21 This book highlights the impact of policy and politics on assessment across the globe With contributions from England the Irish Republic Northern Ireland Norway Sweden Switzerland and Wales it explores state led assessment policies and practices that have been the subject of much debate We are experiencing a shift from using assessments especially national tests as measurement instruments designed to produce information to a reliance on tests to influence policy and instruction Once tests become high stakes for students teachers and schools even those that might have been reasonable monitors of educational success can lose dependability and credibility However not all countries assessment policies follow the same model and the contributors explore and analyse a range of different national and supra national assessment policy approaches and perspectives The chapters identify the impetus behind changing assessment policies and practices and analyse ways forward and innovative approaches Readers can draw their own conclusions about which models can provide the best outcomes for learners surely the most important part of the equation This book was originally published as a special issue of *Assessment in Education Principles Policy Practice* *The Law of Development Cooperation* Philipp Dann,2013-11-07 This comparative study of rules governing development assistance asks how accountability human rights and sovereignty are preserved while combating poverty Shaping the Futures of Young Europeans Marcelo Parreira do Amaral,Roger Dale,Patricia Loncle,2015-10-01 This book discusses how the ways that young people's educational trajectories into and beyond lower secondary education are regulated can influence their future lives It draws on the results of empirical studies in eight European countries Finland France Germany Italy Netherlands Poland Slovenia and the United Kingdom England and Northern Ireland carried out under the EU funded GOETE project The book explores the different ways that educational trajectories are actively or passively conceptualised negotiated and organised in

the individual countries and the ways that these shape educational opportunities and life chances Its central aims are to elaborate the different ways in which educational trajectories are governed in the eight countries and to compare the differences between those approaches and their outcomes in the eight countries It focuses on the relationships between the different national and local forms and outcomes of interactions between collective and individual actors structures institutions mechanisms and discourses that exert influence on education policy and practice at various levels inter and trans national nation state regional local or school levels The chapters are organised in two parts Part One develops and discusses the conceptual framework that drove the empirical analyses of the governance of educational trajectories Part Two discusses different ways in which the spatial scalar discursive and institutional dimensions of the governance of educational trajectories affect the educational experiences and life courses of the young people in the eight countries These chapters focus on different aspects of those experiences such as issues of access to and coping within educational settings the role of parents and students in the processes and consequences of transitions provision for supporting migrant students and conceptions of the relevance of education Overall the comparative approach to governance adopted in the volume makes it possible to identify key sources and consequences of the similarities and differences of the approaches to and practices of educational transitions adopted in the eight countries

Protected Areas and Regional Development in Europe Ingo Mose, 2016-04-15 While originally created as reserves for beautiful landscapes and endangered species protected areas in Europe were subsequently used as a means to preserve whole ecosystems with restrictions on human activities and impacts More recently protected areas are also being considered as instruments for regional development particularly in marginal regions facing severe economic and socio cultural problems Contrary to previous conservation focused policies new approaches aim to blend conservation and development functions making protected areas real living landscapes and integrating activities such as agriculture forestry handicrafts tourism and education with the conservation and sustainability aspects The past decade has seen a marked increase in these innovative and dynamic types of protected areas However the policies of individual European countries are very varied This volume provides a comprehensive overview of the relationship between protected areas and regional development policies both in theory and practice Illustrated with a wide range of case studies from across Europe it compares the different concepts strategies and instruments being used In conclusion it suggests the most innovative and successful ways to use protected areas for regeneration and sustainable regional development

Challenging the 'European Area of Lifelong Learning' George K. Zarifis, Maria N. Gravani, 2013-10-29 This book critically reflects on the context in which lifelong learning policies and practices are organized in Europe with contributions of researchers and policy makers in the field. Through a critical lens, the book reinterprets the core content of the messages that are conveyed by the European Commission in the Memorandum for Lifelong Learning, the most important policy document in the area which, after a decade from its publication, still remains the vehicle for all current developments in lifelong learning in Europe. With references to research findings, proposed actions and applications to immediate practice that have an added value for Europeans but which either do not appear to correspond directly to what is stipulated by the European Commission or are completely ignored as part of the lifelong learning process, the book offers an analytic and systematic outlook of the main challenges in creating the European Area of Lifelong Learning. In times as decisive as the ones we are going through today, both in social and economic terms, a critical perspective of the practices and policies adopted by the EU Member States is essential. The book follows the same structure as the Memorandum in order to debate and critically approach, in separate sections, the core issues that Europe faces today in relation to the idea of making a European area of Lifelong Learning.

A Research Agenda for Multilevel Governance Benz, Arthur, Broschek, Jörg, Lederer, Markus, 2021-12-10 This Research Agenda provides a broad and comprehensive overview of the field of multilevel governance. Illustrating theoretical and normative approaches and identifying prevailing gaps in research, it offers a cutting edge agenda for future investigations.

Belief and Religion in Barbarian Europe c. 350-700 Marilyn Dunn, 2013-11-28 This ground-breaking study offers a new paradigm for understanding the beliefs and religions of the Goths, Burgundians, Sueves, Franks and Lombards as they converted from paganism to Christianity between c. 350 and c. 700 CE. Combining history and theology with approaches drawn from the cognitive science of religion, *Belief and Religion in Barbarian Europe* uses both written and archaeological evidence to challenge many older ideas. Beginning with a re-examination of our knowledge about the deities and rituals of their original religions, it goes on to question the assumption that the Germanic peoples were merely passive recipients of Christian doctrine, arguing that so-called Arianism was first developed as an entry-level Christianity for the Goths. Focusing on individual ethnic groupings, in turn, it presents a fresh view of the relationship between religion and politics as their rulers attempted to opt for Catholicism. In place of familiar debates about post-conversion pagan survivals, contemporary texts and legislation are analysed to create an innovative cognitive perspective on the ways in which the Church endeavoured to bring the Christian God into people's thoughts and actions. The work also includes a survey of a wide range of written and archaeological evidence, contrasting traditional conceptions of death, afterlife and funerary ritual with Christian doctrine and practice in these areas, and exploring some of the techniques developed by the Church for assuaging popular anxieties about

Christian burial and the Christian afterlife **Perspectives on Educational Governance** S. Karin Amos, Felix Masarovic, Anne Rohstock, Alexander W. Wiseman, 2022 In March 2019 students and researchers from Germany the USA China Kenya and South Africa came together at the University of Tuebingen to discuss Educational Governance from an international perspective The group was mainly comprised of Ph D and Master students from various disciplines Education Literature Philosophy Political Science and debated questions such as What are the distinctive and different rationales underlying the discourse of Educational Governance and its political economic academic and pedagogic objectives How can we make these rationales visible and which theories and analytic tools can help us to decipher the meanings attached to them Are there different local and national trajectories in education discourse and practice with regard to Educational Governance and which role do international organizations and transnational transfer play This edited volume displays these discussions and aims at initiating a broader communication about Educational Governance between previously separated spaces International Education Governance S. Karin Amos, 2010-09-27 Intends to sharpen our analytical tools in order to better appreciate the term governance in the educational field This title also addresses the marginally studied issue of change in the educational science order **Potentials for forestry and political drivers in integrated rural development policy** Lukas Giessen, 2010 Die Arbeit befasst sich mit dem regionalisierten und sektor bergreifenden Steuerungsansatz von Regional Governance und der Einbeziehung der Forstwirtschaft als Politiksektor Am Beispiel der integrierten l ndlichen Entwicklung kl rt sie einerseits die Frage nach forstwirtschaftlichen Potentialen in Regional Governance Initiativen und analysiert andererseits allgemeine politische Kr fte die Regional Governance bestimmen Es wird gezeigt dass im Rahmen von Regional Governance Initiativen konventionelle und innovative Potentiale f r die Forstwirtschaft bestehen Diese k nnen jedoch aufgrund unterschiedlicher Informationsst nde verschiedener Kapazit ten sowie unterschiedlicher Anreizwirkungen nicht von allen Akteursgruppen gleicherma en realisiert werden Die vorgefundenen politischen Determinanten von Regional Governance umfassen die Konkurrenz zwischen Regional Governance Institutionen und demokratisch legitimierten Institutionen die Strategie h herer politischer Ebenen zur Erlangung von Einfluss auf Regionalpolitik sowie die Pr gung von Regional Governance durch die Interessen von starken Akteuren und deren Koalitionen In diesem Zusammenhang wird gezeigt dass der sektor bergreifende Anspruch von Regional Governance aufgrund sektoraler Interessenlagen sowohl in der Formulierung als auch im regionalen Vollzug nicht erf llt wird und sich lediglich punktuelle Integrationserfolge auf Projektebene erreichen lassen Diese Ergebnisse lassen sich durch zweierlei Machtstrategien erkl ren Einerseits das Bem hen bergeordneter politischer Ebenen ihren Einfluss auf Regionalpolitik auszuweiten und andererseits die Strategie von konkurrierenden Politiksektoren ihren Einflussbereich zu verteidigen bzw zu Lasten anderer Sektoren auszudehnen *German Federalism in Transition* Carolyn Rowe, Wade Jacoby, 2013-10-18 Federalism in Germany has come to be viewed as the root cause of the country s current economic and social malaise The federal political system which

contributed enormously to the economic success and political stability of West Germany is now said to be outdated overburdened and unworkable German federalism is now widely seen as being synonymous with Reformstau reform blockage and Stillstand inertia Critics argue that the system urgently needs to change if Germany is to continue to compete in the global system This major new text offers a unique scholarly evaluation of the major recent attempts to overhaul Germany's federal political architecture It brings together thematic chapters by leading authorities on German federalism to provide a comprehensive assessment of the reform processes to date their inception scope objectives and outputs The contributions provide new insights into the dynamics of reform in key policy areas such as economic policy Europe and the tax equalisation system as well as in the institutional frameworks for decision making It will be essential reading for students of Germany its politics law and economics This book was published as a special issue of the German Politics

Water Governance: Retheorizing Politics Nicole J. Wilson, Joanne Nelson, Sameer H. Shah, Leila M. NGOs in Foreign Policy Andreas Werner, 2016 NGOs are seen as important actors of international relations and foreign policy by many scholars However such a perspective has rarely been empirically examined This book therefore takes a look at the access granted to NGOs by the state to the planning and decision making processes in foreign and security policy By applying the theoretical concept of security governance the author takes a look at frameworks such as the German Action Plan Civil Crisis Prevention the Coordination Committee Humanitarian Aid the Dutch PSD Network and the National Action Plan 1325 In conclusion a comparison between Germany and the Netherlands reveals where NGOs can gain more access to foreign security policy It eventually enables the author to argue how big or small the role of these non-state actors really is and what consequences this implies for both the empirical and theoretical side of foreign policy Andreas Werner M.A. studied Political Science International Relations Philosophy as well as Peace and Conflict Studies at the University of Marburg and at the Mount Allison University Canada He successfully defended his PhD thesis at the University of Münster in 2015 He currently works as a research associate at the German Police University

Water Governance in the Face of Global Change Claudia Pahl-Wostl, 2015-09-04 This book offers the first comprehensive treatment of multi-level water governance developing a conceptual and analytical framework that captures

the complexity of real water governance systems while also introducing different approaches to comparative analysis Applications illustrate how the ostensibly conflicting goals of deriving general principles and of taking context specific factors into account can be reconciled Specific emphasis is given to governance reform adaptive and transformative capacity and multi level societal learning The sustainable management of global water resources is one of the most pressing environmental challenges of the 21st century Many problems and barriers to improvement can be attributed to failures in governance rather than the resource base itself At the same time our understanding of complex water governance systems largely remains limited and fragmented The book offers an invaluable resource for all researchers working on water governance topics and for practitioners dealing with water governance challenges alike

Resistance and Change in World Politics Svenja Gertheiss, Stefanie Herr, Klaus Dieter Wolf, Carmen Wunderlich, 2017-03-07 This edited volume analyses different forms of resistance against international institutions and charts their success or failure in changing the normative orders embodied in these institutions Non state groups and specific states alike advocate alternative global politics at the same time finding themselves demonized as pariahs and outlaws who disturb established systems of governance However over time some of these actors not only manage to shake off such allegations but even find their normative convictions accepted by international institutions This book develops an innovative conceptual framework to understand and explain these processes using seven cases studies in diverse policy fields including international security health migration religion and internet politics This framework demonstrates the importance of coalition building and strategic framing in order to form a successful resistance and bring change in world politics
