Governing Failure Provisional Expertise And The Transformation Of Global Development Finance:

Governing Failure Jacqueline Best, 2014-01-09 Jacqueline Best argues that the 1990s changes in IMF World Bank and donor policies towards what some have called the Post Washington Consensus were driven by an erosion of expert authority and an increasing preoccupation with policy failure Failures such as the Asian financial crisis and the decades of despair in sub Saharan Africa led these institutions to develop governance strategies designed to avoid failure fostering country ownership developing global standards managing risk and vulnerability and measuring results In contrast to the structural adjustment era when policymakers were confident in their solutions this is an era of provisional governance in which key actors are aware of the possibility of failure even as they seek to inoculate themselves against it Best considers the implications of this shift asking if it is a positive change and whether it is sustainable This title is available as Open Access on Cambridge Books Online and via Knowledge Unlatched

Governing Failure Jacqueline Best, 2014-01-09 Traces an important shift in international development policy as global institutions have become preoccupied with policy failure This title is also available as Open Access

Governing through Expertise Annabelle Littoz-Monnet, 2020-11-05 Littoz Monnet provides a fresh analysis of the enmeshment of expert knowledge with politics in global governance through a unique investigation of bioethical expertise an intriguing form of expert knowledge which claims authority in the ethical analysis of issues that arise in relation to biomedicine the life sciences and new fields of technological innovation She makes the case that the mobilisation of ethics experts does not always arise from a motivation to rationalise governance Instead mobilising ethics experts who are endowed with a unique double edged authority both democratic and epistemic can help policy makers manoeuvre policy conflicts on scientific and technological innovations and make their pro science and innovation agendas possible Bioethical expertise is indeed shaped in a political and iterative space between experts and those who do policy The book reveals the mechanisms through which certain global governance narratives as well as the types of expertise they rely on remain stable even when they are contested

Critical History of Poverty Finance Nick Bernards, 2022-08-20 The definitive account of the history of poverty finance Susanne Soederberg Finance mobile and digital technologies or fintech are being heralded in the world of development by the likes of the IMF and World Bank as a silver bullet in the fight against poverty But should we believe the hype A Critical History of Poverty Finance demonstrates how newfangled digital financial inclusion efforts suffer from the same essential flaws as earlier iterations of neoliberal financial inclusion Relying on artificially created markets that simply aren t there among the world s most disadvantaged economic actors they also reinforce existing patterns of inequality and uneven development many of which date back to the colonial era Bernards offers an astute analysis of the current fintech fad contextualised through a detailed colonial history of development finance that ultimately reveals the neoliberal vision of poverty alleviation for the pipe dream it is **Communities of Practice in World Politics** Maïka Sondarjee, 2024-11-25 By defining international communities of practice CoPs as domains of knowledge this book investigates the adoption of new international practices via collective learning that is the redefinition of what is acceptable and feasible Explaining how

inclusive practices at the World Bank became institutionalized it shows that while changes in presidents can influence practices of international organizations shifts in collective thinking are even more important to understand world ordering Collective learning happens at the boundaries between CoPs when practitioners interact with others inside or outside the formal walls of an organization through processes of boundary encounters boundary brokering and the use of epistemic boundary objects Since the 1980s despite stability in their technocratic political rationality World Bank employees arranged in CoPs collectively learned that program ownership and consultation in policymaking were more effective than top down practices However while learning that more democratic practices rendered their projects and policies more effective Bank employees did not fully challenge colonial epistemic hierarchies in North South relations This CoP framework draws from combines and extends various strands of cutting edge IR scholarship i e practice oriented and constructivist IR management theory communities of practice organizational studies narratives and day to day procedures as well as development and critical studies feminist and decoloniality approaches This book will be of interest not only to scholars and students interested in IR theory international organizations development practices and social theory but also to development workers and anyone interested in global governance Global Policymaking Vincent Pouliot, Jean-Philippe Thérien, 2023-03-16 This book provides a new theoretical framework for the study of global governance and applies it to three vital United Nations global policies The New Production of Expert Knowledge Sotiria Grek, 2023-11-30 This Open Access book offers a novel perspective on the role of quantification in the making of education utopias through an analysis of expert knowledge and its producers Drawing on empirical findings from the European Research Council funded project International Organisations and the Rise of a Global Metrological Field METRO 2017 2022 Education Quantification and Utopia focuses on the ways that metrological realism has constructed a well supported epistemic infrastructure built on relationships and practices that go beyond the mere objectivity and reliability of numerical evidence The book s chapters outline how the production of new forms of education expertise have led to ideational and institutional interdependencies and ultimately the making of an intricate fragmented and opaque knowledge and governance web *Global Economic Governance and the Development Practices of the Multilateral Development Banks* Susan Park, Jonathan R. Strand, 2015-08-27 As pillars of the post 1945 international economic system the Regional and Sub Regional Development Banks RSDBs have long been considered mini World Banks reiterating the policy approach of the largest official multilateral development lender in the world The main objective of the collection is to identify what role the RSDBs play in global economic governance and why This edited collection draws together cutting edge original research on these understudied institutions In the burgeoning sub field of global economic governance as well as the broader study of international organisations IOs too often the focus remains on the World Bank and the International Monetary Fund IMF Second order IOs such as the RSDBs receive much less attention despite their longevity and regional importance This volume corrects this oversight by bringing together methodologically

diverse research on the RSDBs that interrogates the role and impact of these organisations in global economic governance The book investigates the African Development Bank AfDB the Asian Development Bank AsDB the Inter American Development Bank IDB and the European Bank for Reconstruction and Development EBRD and select sub regional development banks in comparison to the World Bank Group This work will be of great interest to students and scholars of IPE IR and Development Studies

When Things Don't Fall Apart Ilene Grabel, 2017 An account of the significant though gradual uneven disconnected ad hoc and pragmatic innovations in global financial governance and developmental finance induced by the global financial crisis In When Things Don't Fall Apart Ilene Grabel challenges the dominant view that the global financial crisis had little effect on global financial governance and developmental finance Most observers discount all but grand systemic ruptures in institutions and policy Grabel argues instead that the global crisis induced inconsistent and ad hoc discontinuities in global financial governance and developmental finance that are now having profound effects on emerging

market and developing economies Grabel's chief normative claim is that the resulting incoherence in global financial governance is productive rather than debilitating In the age of productive incoherence a more complex dense fragmented and pluripolar form of global financial governance is expanding possibilities for policy and institutional experimentation policy space for economic and human development financial stability and resilience and financial inclusion Grabel draws on key theoretical commitments of Albert Hirschman to cement the case for the productivity of incoherence Inspired by Hirschman Grabel demonstrates that meaningful change often emerges from disconnected erratic experimental and inconsistent adjustments in institutions and policies as actors pragmatically manage in an evolving world Grabel substantiates her claims with empirically rich case studies that explore the effects of recent crises on networks of financial governance such as the G 20 transformations within the IMF institutional innovations in liquidity support and project finance from the national to the transregional levels and the rebranding of capital controls Grabel concludes with a careful examination of the opportunities and risks associated with the evolutionary transformations underway
