Digitalization and Economic Development Mohamed Sami Ben Ali, 2022-06-09 This book analyses the impact of Information and Communication Technologies (ICTs) on economic development. It contains theoretical and empirical studies including panel studies on various issues facing developing countries such as education, corruption, economic growth, government expenditure, financial inclusion, foreign direct investment, infrastructure, economic and social welfare, and inequality. Each chapter offers a well-conceived analysis of the most recent trends in both theory and empirics and addresses numerous policy implications related to the different aspects dealt with in the volume. Overall, this book will be an excellent guide for global graduate students at the Master and PhD levels as well as academics researching various issues related to economic development while analyzing the role of ICTs. It also addresses numerous policy implications related to economic development for policymakers, investors, and stakeholders.

DSS 2.0 - Supporting Decision Making With New Technologies Sven Carlsson, Patrick Brezillon, 2014-05-15 Advances in technology have resulted in new and advanced methods to support decision making. For example, artificial intelligence has enabled people to make better decisions through the use of Intelligent Decision Support Systems (DSS). Emerging research in DSS demonstrates that decision makers can operate in a more timely manner using real-time data more accurately due to data mining and big data methods more strategically by considering a greater number of factors more precisely and inclusively due to the availability of social networking data and with a wider media reach with video and audio technology. This book presents the proceedings of the IFIP TC8 Working Group 8.3 conference held at the Universit  Pierre et Marie Curie in Paris, France, in June 2014. Throughout its history, the conference has aimed to present the latest innovations and achievements in Decision Support Systems. This year, the conference looks to the next generation with the theme of new technologies to enable DSS 2.0. The topics covered include theoretical, empirical, and design science research; case-based approaches in decision support systems; decision models in the real world; healthcare; information technology; decision making theory; knowledge management; knowledge and resource discovery; business intelligence; group decision support systems; collaborative decision making; analytics and big data; rich language for decision support; multimedia tools for DSS; Web 2.0 systems in decision support; context-based technologies for decision making; intelligent systems and technologies in decision support; organizational decision support; research methods in DSS 2.0; mobile DSS; competing on analytics and social media analytics. The book will be of interest to all those who develop or use Decision Support Systems. The variety of methods and applications illustrated by this international group of carefully reviewed papers should provide ideas and directions for future researchers and practitioners alike.
