Hart, Jacqueline M. Martinez, 2020-12-23 *New Understandings of Twin Relationships* takes an experience based approach to exploring how twin attachment and estrangement are critical to understanding the push and pull of closely entwined personal relationships Based on the research expertise of each of the authors all identical twins in their own right and vignettes from twins across the globe this book describes the inner workings of the twin world showing how the twin world creates experiences that are often more intense and intricately textured than those in the singleton world Chapters debunk myths surrounding twinship and analyze the developmental stages of the twin relationship as well as the effect of being a twin on one's mental health from different perspectives The authors articulate how attachment separation anxiety loneliness estrangement and the subjective experience of the twin and non twin other impact behavior thinking and feeling Through its careful study of the many psychological challenges that twins face throughout their lifetime this text will help psychologists scholars clinicians and twins themselves attain a deeper understanding of all interpersonal relationships **Same Family, Different Colors** Lori L. Tharps, 2017-10-03 Weaving together personal stories history and analysis *Same Family Different Colors* explores the myriad ways skin color politics affect family dynamics in the United States Colorism and color bias the preference for or presumed superiority of people based on the color of their skin is a pervasive and damaging but rarely openly discussed phenomenon In this unprecedented book Lori L Tharps explores the issue in African American Latino Asian American and mixed race families and communities by weaving together personal stories history and analysis The result is a compelling

portrait of the myriad ways skin color politics affect family dynamics in the United States. Harps, the mother of three mixed race children with three distinct skin colors, uses her own family as a starting point to investigate how skin color difference is dealt with. Her journey takes her across the country and into the lives of dozens of diverse individuals, all of whom have grappled with skin color politics and speak candidly about experiences that sometimes scarred them. From a Latina woman who was told she couldn't be in her best friend's wedding photos because her dark skin would spoil the pictures to a light-skinned African American man who spent his entire childhood trying to be Black, Harps illuminates the complex and multifaceted ways that colorism affects our self-esteem and shapes our lives and relationships. Along with intimate and revealing stories, Harps adds a historical overview and a contemporary cultural critique to contextualize how various communities and individuals navigate skin color politics. Groundbreaking and urgent, *Same Family Different Colors* is a solution-seeking journey to the heart of identity politics so that this more subtle cousin to racism in the author's words will be exposed and confronted.

Psychoses of the Schizophrenic Spectrum in Twins Ernst Franzek, Helmut Beckmann, 2012-12-06 Contradictory results in schizophrenia research are generally explained as being due to genetic heterogeneity and multiple factor heredity in relationship to manifold environmental factors The book reports a short overview of all relevant twin studies on schizophrenic psychoses and provides data and case histories on a systematic twin study based on a polydiagnostic approach carried out by two independently working psychiatrists In addition to the internationally applied operational diagnostic systems of DSM III R and ICD 10 Leonhard's subclassification of schizophrenic psychoses was used Up to now this sophisticated methodological approach is unique in the world The data provide strong evidence that the spectrum of psychoses with schizophrenic and schizophrenia like symptoms is not a continuum of diseases At least in Leonhard's three major groups of cycloid psychoses unsystematic schizophrenias and systematic schizophrenias genetic somatic and psycho social factors play a completely different etiological role Cycloid psychoses and systematic schizophrenias are predominantly caused by environmental factors In unsystematic schizophrenias however genetic predisposition is the main etiological factor and environmental factors are subordinate

Not All Twins Are Alike Barbara Klein, 2003-02-28 Even twins are unique Most people idealize twins fantasizing a close perpetually loving relationship Yet Klein herself an identical twin demonstrates that twins have complicated and intense relationships that range from over identification or excessive closeness to profound estrangement and conflict Most twins who are raised as individuals deal with the significant emotional pain of separation in adolescence or young adulthood yet as mature adults can come to love and respect each other as individuals As Klein makes clear the parenting that twins receive as infants and young children affects the relationships that they have with one another and with the world they choose to function in Because
