Homeschooling in America Joseph Murphy, 2012-08-08. This book is the definitive study on homeschooling in the United States, delving into a movement that impacts more students nationwide than the entire charter school movement. In 2010, more than 2 million students were homeschooled. This book explores the history of homeschooling in America. How this movement has grown in credibility and enrollment exponentially. The current state of homeschooling, including questions over who gets homeschooled, why, and what is the success academically and in life of students who are homeschooled. The impact of homeschooling on the student and on American society. In the most extensive survey and analysis of research on homeschooling spanning the birth of the movement in the 1970s to today, *Homeschooling in America* shines a light on one of the most important yet least understood social movements of the last forty years and what it means for education today.

Homeschooling Michael Wenkart, 2014-03-20. Estimates suggest there are around 1.5m Americans who have turned to homeschooling for their children, and this is probably a significant underestimate. Whether this is due to a perceived failing in the state education system, religious or political convictions, or the need to accommodate some special need of the student or family, it is an issue that causes controversy and undoubtedly raises very serious questions about the state of future generations of American citizens. Advocates of the system claim it improves the education of the child, shapes it more to their needs and aptitudes, and leads to a more rounded individual experience. Critics claim it undermines the public school system, makes children more narrow and prejudiced in their outlook, and doesn't offer any significant advantages academically. So, who is right? As with all such debates, there is a high degree of subjectivity involved when assessing claims and counterclaims.

It is difficult to substantiate or disprove a lot of these and not enough objective scientific research has been conducted to come up with conclusive results either way Many who have used the system are very happy with the results though they assert it is hard work and requires lots of commitment and often cost A few are honest enough to admit there are considerable drawbacks and that the concept is not suitable for everyone adults or children A lot of its critics are opposed to it on political grounds claiming it is a reactionary idea that breeds inequality and perpetuates right wing principles Others oppose the association with religious beliefs though there is no strong evidence that this is a major factor in most decisions to homeschool Homeschooling has had a long hard road to acceptance It has been equated with truancy and illegality and has been criticized and pilloried often by people who know little about it Its practitioners have been branded as kooks religious fanatics right wing pedagogues and many other things Some of these accusations might be founded but the average homeschooler is probably none of these In fact they are probably just that average Many will agree it is a parent's right to give their children the best possible education and it is an issue of choice freedom and independent thinking Whether this is largely beneficial or detrimental will ultimately be down to the perspective of individuals as they consider the pros and cons

racial dimensions of this alternate form of education In *The Color of Homeschooling* Mahala Dyer Stewart explores why this percentage has grown exponentially in the past twenty years and reveals how families schooling decisions are heavily shaped by race class and gender Drawing from almost a hundred interviews with Black and white middle class homeschooling and nonhomeschooling families Stewart s findings contradict many commonly held beliefs about the rationales for homeschooling Rather than choosing to homeschool based on religious or political beliefs many middle class Black mothers explain their schooling choices as motivated by their concerns of racial discrimination in public schools and the school to prison pipeline Indeed these mothers often voiced concerns that their children would be mistreated by teachers administrators or students on account of their race or that they would be excessively surveilled and policed Conversely middle class white mothers had the privilege of not having to consider race in their decision making process opting for homeschooling because of concerns that traditional schools would not adequately cater to their child s behavioral or academic needs While appearing nonracial these same decisions often contributed to racial segregation *The Color of Homeschooling* is a timely and much needed study on how homeschooling serves as a canary in the coal mine highlighting the perils of school choice policies for reproducing rather than correcting long standing race class and gender inequalities in America

What Is Homeschooling, Why Children Should Always Be Homeschooled 100% Of The Time, And The Benefits Of Children Being Homeschooled

Dr. Harrison Sachs, 2024-05-18 This essay sheds light on what is homeschooling explicates why children should always be homeschooled 100% of the time and demystifies the benefits of children being homeschooled Succinctly stated homeschooling refers to providing an education to children in a home setting In the 21st century homeschooling is perceived as being an unconventional form of education The homeschool graduation requirements that children are expected to fulfill can vary from jurisdiction to jurisdiction As of May of 2024 certain jurisdiction for instance may mandate children to pass standardized tests to fulfill homeschool graduation requirements The homeschool curriculum requirements can also vary from jurisdiction to jurisdiction Homeschooling children does not need to always entail children following a structured curriculum but rather can involve children being at liberty to choose the niche topics that they want to learn about The homeschool lesson requirements can also vary from jurisdiction to jurisdiction Homeschooling children also does not need to always entail parents furnishing lessons to their children but rather can involve children engaging in learning activities on their own such as by watching educational videos watching factual documentaries reading informational articles listening to informative podcast episodes and reading insightful books Since children are capable of learning information on their own by engaging in learning activities they do not need to necessarily need to be lectured to about niche topics by a teacher in order to learn information It is eminently beneficent for children to embrace being autodidacts from a tender age since it can expedite the process of them achieving learning outcomes If children become dependent on being lectured to about niche topics by a teacher in order to learn information then it can culminate in them taking longer to achieve learning outcomes

Homeschooling children furnishes children with latitude for flexibility to achieve learning outcomes Homeschooling children is also able to provide children with the opportunity for them to avail themselves of personalized learning experiences in which they choose how to learn information By being able to choose optimum ways to learn information that are optimally tailored to their learning preferences children can more expeditiously achieve learning outcomes Homeschooling children can also provide children with the opportunity to learn information by engaging in pragmatic learning experiences By applying information amid their pragmatic learning experiences children render themselves more apt to learn information since doing so can help them to convert the applied information into knowledge Homeschooling children can render it possible for children to have a unique educational experience Homeschooling children can render people at a higher probability to become highly knowledgeable highly competent and highly adept industry experts in their niche fields at a tender age It stands to preponderantly reason that children should be homeschooled 100% of the time since doing so can cause them to circumvent succumbing to early life slavery which is the utmost deleterious form of modern slavery The practice of slavery in any form is inhumane immoral reprehensible and unvindicated Even though all forms of slavery should be abolished modern slavery is inapt to ever be abolished By homeschooling their children a parent circumvents having their children sentenced to a 13 year insalubrious K 12 compulsory concentration camp By homeschooling their children a parent also renders their children all the more poised to have successful careers By homeschooling their children a parent also renders their children all the more primed to expeditiously achieve desirable learning outcomes The mandate to attend the 13 year K 12 compulsory concentration camp that is imposed against people against their own volition is ineffably inhumane is the utmost pernicious form of modern slavery and should be abolished People should have purview over how their precious time is earmarked and their right to liberty should never be encroached on In a 13 year insalubrious K 12 compulsory concentration camp a person's inalienable right to liberty is severely encroached on in all facets **Homeschooling: Do It**
