Hand And Mind What Gestures Reveal About Thought:

Hand and Mind David McNeill, 1992-08-15 A research subject is shown a cartoon like the 1950 Canary Row a classic Sylvester and Tweedy Bird caper that features Sylvester climbing up a downspout swallowing a bowling ball and slamming into a brick wall After watching the cartoon the subject is videotaped recounting the story from memory to a listener who has not seen the cartoon Painstaking analysis of the videotapes revealed that although the research subjects children as well as adults some neurologically impaired represented a wide variety of linguistic groupings the gestures of people speaking English and a half dozen other languages manifest the same principles Relying on data from more than ten years of research McNeill shows that gestures do not simply form a part of what is said and meant but have an impact on thought itself

Hand and Mind David McNeill, 1995 **Hand and Mind** David McNeill, 1992 **Gesture and Thought** David McNeill, 2008-09-15 Gesturing is such an integral yet unconscious part of communication that we are mostly oblivious to it But if you observe anyone in conversation you are likely to see his or her fingers hands and arms in some form of spontaneous motion Why David McNeill a pioneer in the ongoing study of the relationship between gesture and language set about answering this question over twenty five years ago In *Gesture and Thought* he brings together years of this research arguing that gesturing an act which has been popularly understood as an accessory to speech is actually a dialectical component of language *Gesture and Thought* expands on McNeill s acclaimed classic *Hand and Mind* While that earlier work demonstrated what gestures reveal about thought here gestures are shown to be active participants in both speaking and thinking Expanding on an approach introduced by Lev Vygotsky in the 1930s McNeill posits that gestures are key ingredients in an imagery language dialectic that fuels both speech and thought Gestures are both the imagery and components of language The smallest element of this dialectic is the growth point a snapshot of an utterance at its beginning psychological stage Utilizing several innovative experiments he created and administered with subjects spanning several different age gender and language groups McNeill shows how growth points organize themselves into utterances and extend to discourse at the moment of speaking An ambitious project in the ongoing study of the relationship of human communication and thought *Gesture and Thought* is a work of such consequence that it will influence all subsequent theory on the subject

Gesture and the Dynamic Dimension of Language Susan D. Duncan, Justine Cassell, Elena Terry Levy, 2007 Each of the 21 chapters in this volume reflects a view of language as a dynamic phenomenon with emergent structure and in each gesture is approached as part of language not an adjunct to it In this all of the authors have been influenced by David McNeill s methods for studying natural discourse and by his theory of the human capacity for language The introductory chapter by Adam Kendon contextualizes McNeill s research paradigm within a history of earlier gesture studies Chapters in the first section Language and Cognition emphasize what McNeill refers to as the intrapersonal plane Many of the chapters adduce evidence for McNeill s claim that gestures can serve as a window onto the speaker s mind Chapters in the second

section Environmental Context and Sociality emphasize the interpersonal plane and exemplify McNeill's focus on how moment to moment language use is determined by contextual factors The final section of the volume Atypical Minds and Bodies concerns lessons to be learned from studies of aphasic patients autistic children and artificial humans Advances in Visual Semiotics Thomas Albert Sebeok, Donna Jean Umiker-Sebeok, 1995 No detailed description available for Advances in Visual Semiotics **Ten Lectures on Spoken Language and Gesture from the Perspective of Cognitive Linguistics**

Alan Cienki, 2017-04-11 Cognitive linguistics is purported to be a usage based approach yet only recently has research in some of its subfields turned to spontaneous spoken versus written language data The collection of Alan Cienki's Ten Lectures on Spoken Language and Gesture from the Perspective of Cognitive Linguistics considers what it means to apply different approaches from within this field to the dynamic multimodal combination of speech and gesture The lectures encompass such main paradigms as blending and mental space theory conceptual metaphor and metonymy construction and cognitive grammars image schemas and mental simulation in relation to semantics Overall Alan Cienki shows that taking the usage based commitment seriously with audio visual data raises new issues and questions for theoretical models in cognitive linguistics The lectures for this book were given at The China International Forum on Cognitive Linguistics in May 2013

The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 1 ISLS, 2014-04-23 The Computer Supported Collaborative Learning CSCL Conference 2013 proceedings Volume 1 **Choral Conducting and the Construction of Meaning** Liz Garnett, 2017-07-05 It is a truism in teaching choral conducting that the director should look like s/he wishes the choir to sound The conductor's physical demeanour has a direct effect on how the choir sings at a level that is largely unconscious and involuntary It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery but also different gestural vocabularies which are shared not only between conductors within that tradition but also with the singers It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening But how can these forms of physical communication be explained Do they belong to a pre-cultural realm of primate social bonding or do they rely on the context and conventions of a particular choral culture Is body language an inherent part of musical performance styles or does it come afterwards in response to music At a practical level to what extent can a practitioner from one tradition mandate an approach as good practice and to what extent can another refuse it on the grounds that we don't do it that way This book explores these questions at both theoretical and practical levels It examines textual and ethnographic sources and draws on theories from critical musicology and nonverbal communication studies to analyse them By comparing a variety of choral traditions it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level and in what ways they are constructed within a specific idiom Its findings will be of interest both to those engaged in the study of music as a cultural practice and to practitioners involved in a choral conducting context that

increasingly demands fluency in a variety of styles

Encyclopedia of Media and Communication Marcel

Guendouzi, Filip Loncke, Mandy J. Williams, 2023-06-02 This handbook provides a comprehensive overview of the theories of cognition and language processing relevant to the field of communication disorders Thoroughly updated in its second edition the book explores a range of topics and issues that illustrate the relevance of a dynamic interaction between both theoretical and applied clinical work Beginning with the origins of language evolution the authors explore a range of both developmental and acquired communication disorders reflecting the variety and complexity of psycholinguistics and its role in extending our knowledge of communication disorders The first section outlines some of the major theoretical approaches from psycholinguistics and cognitive neuroscience that have been influential in research focusing on clinical populations while Section II features examples from researchers who have applied this body of knowledge to developmental disorders of communication Section III features examples focusing on acquired language disorders and finally Section IV considers psycholinguistic approaches to gesture sign language and alternative and augmentative communication AAC The new edition features new chapters offering fresh perspectives further reading recommendations and a new epilogue from Jackie Guendouzi This valuable text serves as a single interdisciplinary resource for graduate and upper level undergraduate students in cognitive neurosciences psychology communication sciences and disorders as well as researchers new to the field of communication disorders or to psycholinguistic theory Gesture Steven G. McCafferty, Gale Stam, 2009-06-02 This book demonstrates the vital connection between language and gesture and why it is critical for research on second language acquisition to take into account the full spectrum of communicative phenomena The study of gesture in applied linguistics is just beginning to come of age This edited volume the first of its kind covers a broad range of concerns that are central to the field of SLA The chapters focus on a variety of second language contexts including adult classroom and naturalistic learners and represent learners from a variety of language and cultural backgrounds Gesture Second Language Acquisition and Classroom Research is organized in five sections Part I Gesture and its L2 Applications provides both an overview of gesture studies and a review of the L2 gesture research Part II Gesture and Making Meaning in the L2 offers three studies that all take an explicitly sociocultural view of the role of gesture in SLA Part III Gesture and Communication in the L2 focuses on the use and comprehension of gesture as an aspect of communication Part IV Gesture and Linguistic Structure in the L2 addresses the relationship between gesture and the acquisition of linguistic features and how gesture relates to proficiency Part V Gesture and the L2 Classroom considers teachers gestures students gestures and how students interpret teachers gestures Although there is a large body of research on gesture across a number of disciplines including anthropology

communications psychology sociology and child development to date there has been comparatively little investigation of gesture within applied linguistics This volume provides readers unfamiliar with L2 gesture studies with a powerful new lens with which to view many aspects of language in use language learning and language teaching **Metaphorical**

Conceptualizations Ulrike Schröder, Milene Mendes de Oliveira, Adriana Maria Tenuta, 2022-03-07 The book deals with the important shift that has been heralded in cognitive linguistics from mere universal matters to cultural and situational variation The discussions examine cognitive and cultural linguistics theories in relation to the following areas of research i metaphorical conceptualization ii the influence of culture on metaphor metonymy and conceptual blends iii the impact of culture and cognition on metaphorical lexis iv the interface of pragmatics and cognition when metaphor is studied in situ that is in face to face as well as in virtual multimodal interaction v the application of insights from metaphorical conceptualizations to language teaching and vi recent methods for revealing inter cultural metaphorical conceptualizations corpus based approaches gesture studies etc The book brings together cognitive functional and inter cultural approaches

Multimodality and Performance Carla Fernandes, 2016-08-17 The chapters in this book are the product of an international conference organised in Lisbon to mark the closure of the TKB project A Transmedia Knowledge Base for Performing Arts Under the title Multimodal Communication Language Performance and Digital Media this conference provided a forum for researchers and artists from different research fields interested in the study and documentation of the performing arts The book offers contributions on issues of multimodality in human interaction and performance embodied cognition and metaphor gesture studies video annotation for creative processes and performance and digital media

Visual language Wendy Sandler, Marianne Gullberg, Carol Padden, 2019-11-04 Traditionally research on human language has taken speech and written language as the only domains of investigation However there is now a wealth of empirical studies documenting visual aspects of language ranging from rich studies of sign languages which are self contained visual language systems to the field of gesture studies which examines speech associated gestures facial expressions and other bodily movements related to communicative expressions But despite this large body of work sign language and gestures are rarely treated together in theoretical discussions This volume aims to remedy that by considering both types of visual language jointly in order to transcend artificial theoretical divides and to arrive at a comprehensive account of the human language faculty This collection seeks to pave the way for an inherently multimodal view of language in which visible actions of the body play a crucial role The 19 papers in this volume address four broad and overlapping topics 1 the multimodal nature of language 2 multimodal representation of meaning 3 multimodal and multichannel prosody and 4 acquisition and development of visual language in children and adults Performing the Remembered Present Pil

Hansen, Bettina Bläsing, 2017-12-28 This international collection brings together scientists scholars and artist researchers to explore the cognition of memory through the performing arts and examine artistic strategies that target cognitive processes

of memory The strongly embodied and highly trained memory systems of performing artists render artistic practice a rich context for understanding how memory is formed utilized and adapted through interaction with others instruments and environments Using experimental interpretive and Practice as Research methods that bridge disciplines the authors provide overview chapters and case studies of subjects such as collectively and environmentally distributed memory in the performing arts autobiographical memory triggers in performance creation and reception the journey from learning to memory in performance training the relationship between memory awareness and creative spontaneity and memorization and embodied or structural analysis of scores and scripts This volume provides an unprecedented resource for scientists scholars artists teachers and students looking for insight into the cognition of memory in the arts strategies of learning and performance and interdisciplinary research methodology

Emerging Perspectives on Gesture and Embodiment in Mathematics Laurie D. Edwards, Deborah Moore-Russo, Francesca Ferrara, 2014-07-01 The purpose of the book is to establish a common language for and understanding of embodiment as it applies to mathematical thinking and to link mathematics education research to recent work in gesture studies cognitive linguistics and the theory of embodied cognition Just as in past decades mathematics education experienced a turn to the social in which socio cultural factors were explored in recent years there has been a nascent turn to the body An increasing number of researchers and theorists in mathematics education have become interested in the fact that although mathematics may be socially constructed this construction is not arbitrary or unconstrained but rather is rooted in and shaped by the body All those who engage with mathematics whether at an elementary or advanced level share the same basic biological and cognitive capabilities as well as certain common physical experiences that come with being humans living in a material world In addition the doing and communicating of mathematics is never a purely intellectual activity it involves a wide range of bodily actions from committing inscriptions to paper or whiteboard to speaking listening gesturing and gazing This volume will present recent research on gesture and mathematics within a framework that addresses several levels of mathematical development The chapters will begin with contributions that examine early mathematical and proto mathematical knowledge for example the conservation of volume and counting The role of gesture in teaching and learning arithmetic procedures will be addressed Core concepts and tools from secondary level mathematics will be investigated including algebra functions and graphing And finally research into the embodied understanding of advanced topics in geometry and calculus will be presented The overall goal for the volume is to acknowledge the multimodal nature of mathematical knowing and to contribute to the creation of a model of the interactions and mutual influences of bodily motion spatial thinking gesture speech and external inscriptions on mathematical thinking communication and learning The intended audience is researchers and theorists in mathematics education as well as graduate students in the field

Signed Language and Gesture Research in Cognitive Linguistics Terry Janzen, Barbara Shaffer, 2023-07-24 This volume represents the first time that researchers on signed language and gesture have come

together with a coherent focus under the framework of cognitive linguistics. The pioneering work of Sherman Wilcox is highlighted throughout, scaffolding much of the research of these contributors. The five sections of the volume reflect critical areas of Dr Wilcox's own research in cognitive linguistics: Guiding research principles in signed language gesture and cognitive linguistics; iconicity across signed and spoken linguistics; multimodality, blending, depiction and metaphor in signed languages; and specific grammatical constructions as form-meaning pairings. The authors of this volume exemplify and continue Dr Wilcox's work of bridging signed and spoken language disciplines by contributing chapters that represent a multiplicity of perspectives on signed, spoken and gesture data. This volume presents a unified collection of cognitive linguistics research by leading authors that will be of interest to readers in the fields of signed and spoken language linguistics, gesture studies and general linguistics.
