Schmidl, Theodore P. Labuza, 2000-06-30 Providing overview depth and expertise Essentials of Functional Foods is the key resource for all involved in the exciting and rapidly growing arena of functional foods Every important aspect of functional foods and ingredients is covered from technology product groups and nutrition to safety efficacy and regulation The editors and their expert contributors emphasize broadly based principles that apply to many functional foods This book is essential reading for food scientists researchers and professionals who are developing researching or working with functional foods and ingredients in the food drug and dietary supplement industry *Dietary Fiber in Health and Disease* David Kritchevsky, Charles T. Bonfield, 2012-12-06 This volume carries the proceedings of the Vahouny Fiber Symposium which took place in Washington DC in March of 1996 George V Vahouny pioneered this conference which was conceived as a means of exchanging information on the latest advances in fiber research The conference was renamed in George Vahouny's honor after his untimely death In this volume we have included the reminiscences of Prof A R P Walker one of the pioneers in the field and discussion of the epidemiological findings relating dietary fiber to heart disease cancer and gastrointestinal disease As the overall definition of fiber has broadened we have included for discussion other aspects of carbohydrate chemistry and metabolism Complex carbohydrates were the subject of a full session and resistant starch and the roles of oligosaccharides were discussed later in the meeting Another area of

fiber metabolism that is beginning to burgeon is that of the short chain fatty acids and this too was the subject of presentations and discussion In addition the more familiar topics in dietary fiber were updated Workshops devoted to specific areas of fiber research have now become a mainstay of these meetings and they were repeated successfully Due to restraints on spending the attendance at this meeting was somewhat smaller than usual but the discussion was lively and pertinent We are deeply grateful to our sponsors and contributors for their continuing interest in dietary fiber research and for their generous support of this symposium

Diet and Health National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Diet and Health, 1989-01-01 Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today atherosclerotic cardiovascular diseases including heart attack and stroke cancer high blood pressure obesity osteoporosis diabetes mellitus liver disease and dental caries

Manual of Nutritional Therapeutics David H. Alpers, Beth E. Taylor, Dennis M. Bier, Samuel Klein, 2015-01-21 Meant for quick retrieval of vital information regarding the management of nutritional issues in patients with gastroenterological problems either primary or as the consequence of other medical disorders such as diabetes hyperlipidemia and obesity The book addresses normal physiology and pathophysiology and offers chapters on diseases that can lead to specific nutritional problems The clinical focus is on therapeutic nutrition and dietary management

Natural Antioxidants Rituparna Banerjee, Arun K. Verma, Mohammed Wasim Siddiqui, 2017-06-26 In the recent years considerable research has been carried out evaluating natural substances as antioxidative additives in food products leading to novel combinations of antioxidants and the development of novel food products In addition to their antioxidative capacity these natural additives have positive effects on the human body with documented health benefits This valuable new book provides an overview of natural antioxidants their sources methods of extraction regulatory aspects and application techniques specifically focusing on different foods of animal origin to improve their oxidative stability

New Developments in Dietary Fiber Ivan Furda, Charles J. Brine, 2013-04-09 It has been acknowledged that the physiological effects of dietary fiber are an exceedingly complex matter which requires a multidisciplinary research effort The increased scientific involvement of the medical community nutritionists chemists and physicists is not only warranted but it has become mandatory This is because we are entering a more advanced research phase in which the observed in vivo effects should not be only recorded but they should be systematically correlated with the physicochemical and analytical properties of the individual dietary fibers The Division of Agricultural and Food Chemistry of the American Chemical Society has recognized this for some time and has asked us to organize another International Symposium similar to one in 1982 which would address the latest developments in this field We decided to ask a cross section of leading experts from industrial and academic research institutions to assess the state of the art in dietary fiber namely in the areas of the physiological effects physicochemical attributes and in existing

and proposed analytical methods We also felt that chemistry and physical chemistry should play a greater role in fiber research to complement and better explain the existing in vivo data There is a large volume of animal and human physiological and nutritional data available Unfortunately the generated information is frequently confusing One reason is that this research is not conducted with well characterized compounds but rather with loosely defined complex mixtures or entities *Guide to Nutritional Supplements*, 2009-09-02 The rapidly expanding world of nutrition functional foods and nutraceuticals is increasingly complex This Guide to Nutritional Supplements provides a concise and complete reference to the most common nutritionally significant elements Including dietary guidelines intake measurements and other contextual information this Guide is the ideal reference for nutritionists and dieticians facing an increasing public awareness of supplements and who may be augmenting their diets with OTC supplements Focused on the nutritional values impacts and interactions of supplements Provides a science based approach to determining the appropriate selection and application of supplements for improved diet and nutrition **Diet Manual** Veterans Administration Hospital (Hines, Ill.), 1986
