Handbook of Development Economics J. Behrman, T.N. Srinivasan, 1995-08-10 For this Handbook authors known to have different views regarding the nature of development economics have been selected The Handbook is organised around the implications of different sets of assumptions and their associated research programs It is divided into three volumes each with three parts which focus on the broad processes of development This third volume of the Handbook of Development Economics employs rigorous theoretical and empirical frameworks It focuses on policy and includes material from unpublished and not generally available sources In particular it covers analytical and policy issues arising from the collapse of the paradigm of development based on import substituting industrialization in most developing countries and the demise of centrally planned economies of Eastern Europe and the Soviet Union The volume also deals with the increasing recognition of the importance of micro behavioral responses to a range of incentives and unobserved factors both for analysis and for policy formulation It discusses the ongoing process of economic reforms in developing countries by reducing state involvement in the economy through privatization opening up the economy much more to foreign trade and investment and allowing market forces and the private sector to guide resource allocation to a much greater extent As well as updating developments on topics which were included in the earlier volumes this Handbook also includes different topics such as econometric and other empirical modeling tools for development analysis and the role of technology in the development process As in the previous volumes of the series the chapters in this Handbook provide self contained surveys summarizing not only received knowledge but also recent developments Each chapter is also a definitive source reference and teaching supplement for use by researchers and advanced graduate students For more detailed information on the Handbooks in Economics series please see our home page on <http://www.elsevier.nl/locate/hes> Undernourishment and Economic Growth Jean-Louis Arcand, Food and Agriculture Organization of the United Nations, 2001-01-01 This paper investigates the effect of undernourishment on economic growth In addition to the basic relationship on health a number of other important relationships are investigated a regional differences regarding the impact of under nourishment on growth b the impact that possible errors in measuring nutritional variables may have on the robustness of the estimated nutrition growth relationship and c the existence of nutritional traps i e the vicious circle of low nutrition low economic growth low nutrition The basic conclusion of the paper that undernourishment can be a serious handicap in the efforts of countries to achieve economic growth suggests that actions taken to feed the hungry have a strong growth dimension in addition to their humanitarian character *Mathematical Models in Economics - Volume I* Wei-Bin Zhang, 2009-06-10 Mathematical Models in Economics is a component of Encyclopedia of Mathematical Sciences in which is part of the global Encyclopedia of Life Support Systems

EOLSS an integrated compendium of twenty one Encyclopedias This theme is organized into several different topics and introduces the applications of mathematics to economics Mathematical economics has experienced rapid growth generating many new academic fields associated with the development of mathematical theory and computer Mathematics is the backbone of modern economics It plays a basic role in creating ideas constructing new theories and empirically testing ideas and theories Mathematics is now an integral part of economics The main advances in modern economics are characterized by applying mathematics to various economic problems Many of today s profound insights into economic problems could hardly be obtained without the help of mathematics The concepts of equilibrium versus non equilibrium stability versus instability and steady states versus chaos in the contemporary literature are difficult to explain without mathematics The theme discusses on modern versions of some classical economic theories taking account of balancing between significance of economic issues and mathematical techniques These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
