that lead to the purchase of a company's offerings. We further discuss the ways in which companies conduct market research to gather market insights in order to make informed decisions and develop viable courses of action. Part Three covers issues pertaining to the development of a marketing strategy that will guide the company's tactical activities. Here we focus on three fundamental aspects of a company's marketing strategy: the identification of target customers, the development of a customer value proposition, and the development of a value proposition for the company and its collaborators. The discussion of the strategic aspects of marketing management includes an in-depth analysis of the key principles of creating market value in a competitive context. The next three parts of the book focus on the marketing tactics viewed as a process of designing, communicating, and delivering value. Part Four describes how companies design their offerings and specifically how they develop key aspects of their products, services, brands, prices, and incentives. In Part Five we address the ways in which companies manage their marketing communication and the role of personal selling as a means of persuading customers to choose, purchase, and use a company's offerings. Part Six explores the role of distribution channels in delivering the company's offerings to target customers by examining the value delivery process both from a manufacturer's and a retailer's point of view. The seventh part of the book focuses on the ways in which companies manage growth. Specifically, we discuss strategies used by companies to gain and defend market position and in this context address the issues of pioneering advantage, managing sales growth, and managing product lines. We further address the process of developing new market offerings and the ways in which companies manage the relationship with their customers. The final part of this book presents a set of tools that illustrate the practical application of marketing theory. Specifically, Part Eight delineates two workbooks: a workbook for segmenting the market and identifying target customers, and a workbook for developing the strategic and tactical components of a company's business model. This part also contains examples of two marketing plans: one dealing with the launch of a new offering and the other focused on managing an existing offering.

This text seeks to raise the curtain on competitive pricing strategies and asserts that businesses often miss their best opportunity for providing consumers with what they want: an experience.
