**Distortions to Agricultural Incentives in Europe's Transition Economies** Kym Anderson, Johan Swinnen, 2008-06-05 The vast majority of the world's poorest households depend on farming for their livelihood During the 1960s and 1970s most developing countries imposed pro urban and anti agricultural policies while many high income countries restricted agricultural imports and subsidized their farmers Both sets of policies inhibited economic growth and poverty alleviation in developing countries Although progress has been made over the past two decades to reduce those policy biases many trade and welfare reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago Since then the OECD has provided estimates each year of market distortions in high income countries but there has been no comparable estimates for the world's developing countries This volume is the first in a series other volumes cover Africa Asia and Latin America that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half century Distortions to Agricultural Incentives in Europe's Transition Economies provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the European

Union in 2004 or 2007 of seven other large member countries of the Commonwealth of Independent States and of Turkey Together these countries comprise over 90 percent of the Europe and Central Asia region s population and GDP Sectoral trade and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991 but price distortions remain The new empirical indicators in these country studies provide a strong evidence based foundation for evaluating policy options in the years ahead

**Feeding the World** Giovanni Federico,2010-12-16 In the last two centuries agriculture has been an outstanding if somewhat neglected success story Agriculture has fed an ever growing population with an increasing variety of products at falling prices even as it has released a growing number of workers to the rest of the economy This book a comprehensive history of world agriculture during this period explains how these feats were accomplished Feeding the World synthesizes two hundred years of agricultural development throughout the world providing all essential data and extensive references to the literature It covers systematically all the factors that have affected agricultural performance environment accumulation of inputs technical progress institutional change commercialization agricultural policies and more The last chapter discusses the contribution of agriculture to modern economic growth The book is global in its reach and analysis and represents a grand synthesis of an enormous topic

**Beyond the City** David M. De Ferranti,2005-01-01 The rural economy s contribution to development summary of findings and policy implications The rural contribution to development analytical issues The rural contribution to development policy issues

*Clean Development Mechanism (Cdm), The: An Early History Of Unanticipated Outcomes* Ariel Dinar,Donald F Larson,Shaikh Mahfuzur Rahman,2013-03-25 Following the Earth Summit in Rio de Janeiro in 1992 countries took up the difficult task of finding a common approach that would slow down the build up of greenhouse gas emissions in the atmosphere and delay changes to the planet s climate A widespread concern among many of the participants in the newly formed United Nations Framework Convention on Climate Change was that the emission reductions needed to significantly affect climate change would cost so much that it could jeopardize the chances of a coordinated international solution To address this concern several flexible mechanisms were designed including the CDM While many applaud the CDM others are concerned with its performance and achievements and whether or not it will be continued beyond 2012 Critics argue among other things that it has not delivered on the sustainable development objective for which it was established and that projects are unevenly distributed both geographically and sectorally Much analysis is available on CDM but very little comprehensive analysis addressing various aspects of CDM is available With a major decision for its continuation a multi dimensional analysis would be needed This book is about the economic assessment of certain not certain CDM performances and its future sustainability and trajectory

**The Clean Development Mechanism (CDM)** Ariel Dinar,Donald F. Larson,Shaikh M. Rahman,2013 Following the Earth Summit in Rio de Janeiro in 1992 countries took up the difficult task of finding a common approach that would slow down the build up of greenhouse gas emissions in the atmosphere and delay changes to the planet s climate A

widespread concern among many of the participants in the newly formed United Nations Framework Convention on Climate Change was that the emission reductions needed to significantly affect climate change would cost so much that it could jeopardize the chances of a coordinated international solution To address this concern several flexible mechanisms were designed including the CDM While many applaud the CDM others are concerned with its performance and achievements and whether or not it will be continued beyond 2012 Critics argue among other things that it has not delivered on the sustainable development objective for which it was established and that projects are unevenly distributed both geographically and sectorally Much analysis is available on CDM but very little comprehensive analysis addressing various aspects of CDM is available With a major decision for its continuation a multi dimensional analysis would be needed This book is about the economic assessment of certain not certain CDM performances and its future sustainability and trajectory *The Routledge Handbook of Post-Reform Indian Economy* Rajesh Raj S. N.,Komol Singha,2021-11-25 This handbook presents a comprehensive study of the post reform Indian economy three decades after the economic liberalization started in the early 1990s It studies the broad range of changes that were introduced in the reforms era assessing their impact on sectors like manufacturing agriculture banking and finance among others It also assesses the performance of these sectors amid globalization and the socio economic shifts in the country The volume evaluates the contribution of the reforms to social transformation social inclusion sustainability and human development and deliberates on the gains blind spots and limitations With contributions from scholars across the country case studies and comparative analyses that draw on data analysis econometric evidence and historical sensibility this is an authoritative volume on the reforms of the 1990s and their impact on the Indian economy and people Topical and the first of its kind the book will be a useful resource for scholars and researchers of economics development studies political economy management studies public policy and political studies

*Rural Development in Punjab* Autar S. Dhesi,Gurmail Singh,2020-11-29 For many years agricultural development in Punjab symbolised one of the most successful experiments in rural development However this success story seems to be going astray The crux of the problem this volume suggests is that externally driven modernization to meet national food needs pushed Punjab into highly specialized production of wheat and rice resulting in over utilisation of natural resources with adverse environmental consequences that jeopardizing the long term viability and sustainability of the agrarian economy Stagnating productivity reduced farm size falling household incomes depleting groundwater resources are only a few of the problems that characterise Punjab s agriculture today The book establishes clearly that rural development implies more than transformation of traditional agriculture Apart from ensuring efficient use of limited resources to sustain agricultural production rural policy should encompass promotion of non farm activities investments in social and economic structure and civic amenities *Community, Commons and Natural Resource Management in Asia* Haruka Yanagisawa,2015-08-14 Managing the commons natural resources held in common by particular communities is a complex

challenge How have Asian societies handled resources of this sort in the face of increasing marketization and quickly growing demand for resources And how have resource management regimes changed over time with state formation modernization development and globalization Community Commons and Natural Resource Management in Asia brings clarity detail and historical understanding to these questions across a variety of Asian societies and ecological settings Case studies drawn from Japan Korea Thailand India and Bhutan examine fisheries forests and other environmental resources held in common There is a tendency to imagine that traditional communities had socially equitable and environmentally friendly systems for managing the commons but natural resources in Asia were often under free access regimes Resource management developed in response to social and economic pressures and the state has been at various times both a beneficial and a negative influence on the development of community level systems of managing the commons The chapters in this volume show that a simple modernist framework cannot adequately capture this process and the institutional changes it involved Local Societies and Rural Development Shinichi Shigetomi,Ikuko Okamoto,2014-07-31 The importance of community based and participatory approaches to rural development in developing countries has long been emphasized Rural people who are economically and politically weak as individuals can only participate in development projects w

**Green metamorphoses: agriculture, food, ecology** B. Torquati,A. Marchini,2023-08-07 This book offers a wide selection of contributions presented at the LV Conference of Italian society of agricultural economics SIDEA Studies Agricultural economists and sociologists reflect on the change processes that are affecting the agri food systems and take a small step towards an improved understanding of the complexity of green metamorphosis and the interplay between agriculture food and ecology The key message is that a green metamorphosis has been taking place increasingly involving more and more aspects and dimensions from environment to consumers preferences from social value to human health from profitability to governance issues Furthermore this book tries to shed a light on the complexity of the new agricultural paradigm which involves technology as well as traditions trying to understand the ongoing metamorphosis taking into account that nothing is created nothing is destroyed everything is transformed This volume intends to guide the new generations of agricultural economists who have the hard task of leading the green metamorphosis across the four main axes of sustainability economic socio cultural environmental and political **Food Policy and the Environmental Credit**

**Crunch** Julie Hudson,Paul Donovan,2013-09-11 The changing economic environment for the consumer that is emerging from the wreckage of the financial credit crunch plays directly into the importance of food spending This is certainly true from the perspective of food prices in the short run but also from the perspective of sustainability and reducing the impact of the environmental credit crunch The economic changes we experience now have a bearing on our ability to manage the environmental credit crunch that looms Food Policy and the Environmental Credit Crunch From Soup to Nuts elaborates on the issues addressed in the authors first book From Red to Green and asks whether the financial credit crunch could

ameliorate or exacerbate the emergent environmental credit crunch The conclusion drawn here is that a significant and positive difference could be made by changing some of the ways in which we procure prepare and consume our food Written by an economist and an investment professional this book addresses the economic and environmental implications of how we treat food The book examines each aspect of the food chain from agriculture to production and processing retail preparation consumption and waste

*The World of Agricultural Economics* Carin Martiin, 2013-04-12 This textbook takes a truly international approach towards agricultural economics uniting many different perspectives on the subject and providing insight into agriculture in general and into how practical farming works in particular The book is laced throughout with real world examples and other pedagogical features Topics covered are wide ranging and include world food production and population the food chain and food safety non foods derived from farming land and soil issues arable and animal production and management at farm level The World of Agricultural Economics an introduction is primarily an introductory textbook for students in agricultural economics agronomy and adjacent fields However its accessible approach means that it is also suitable for readers without any previous knowledge in the field who are seeking an introduction to agriculture

*Engaged Scholarship and Emancipation* Toon van Meijl, Frans Wijzen, 2023-06-26 This collective volume celebrates that 75 years ago the foundation was laid for the Department of Anthropology and Development Studies at Radboud University Nijmegen the Netherlands The contributions to this volume exemplify the evolution of the academic disciplines of anthropology and development studies at Radboud University in the course of its history Radboud University itself celebrates its centenary in the year 2023 Originally this university was established for the emancipation of the Catholic population in the Netherlands Emancipation continues to be a distinctive feature of the university's policy also of the scholarship as it is conducted in the department of anthropology and development studies As emancipation and engagement are key concepts in the disciplines of anthropology and development studies at Radboud University former and current staff members focus their contributions to this anniversary volume on the various meanings of the concepts of emancipation and engagement in their academic practices They reflect on changes in the meaning of engaged scholarship in their own work especially in relation to emancipatory issues The outcome is a rich variety of contributions centering on the shifting tension between engagement and scholarship in the disciplines of anthropology and development studies Thus they not only exemplify the evolution of these academic disciplines at Radboud University but also offer a topical and innovative perspective on a highly dynamic field
