Automotive User Interfaces Gerrit Meixner, Christian Müller, 2017-02-27. This book focuses on automotive user interfaces for in-vehicle usage, looking at car electronics, its software, and hidden technologies, e.g., ASP, ESP, comfort functions, e.g., navigation, communication, entertainment, and driver assistance, e.g., distance checking. The increased complexity of automotive user interfaces, driven by the need for using consumer electronic devices in cars as well as autonomous driving, has sparked a plethora of new research within this field of study. Covering a broad spectrum of detailed topics, the authors of this edited volume offer an outstanding overview of the current state of the art, providing deep insights into usability and user experience, interaction techniques and technologies, as well as methods, tools, and its applications, exploring the increasing importance of Human-Computer Interaction (HCI) within the automotive industry. *Automotive User Interfaces* is intended as an authoritative and valuable resource for professional practitioners and researchers alike, as well as computer science and engineering students who are interested in automotive interfaces.

Cultural and Ethnic Diversity Alexander Thomas, 2018-03-13. Cultural diversity: how psychologists can meet the challenges and grasp the opportunities. Culture and diversity are both challenge and opportunity. This volume looks at what psychologists are and can be doing to help society meet the challenges and grasp the opportunities in education, at work, and in clinical practice. The increasingly international and globalized nature of modern societies means that psychologists in particular face new challenges and have new opportunities in all areas of practice and research. The contributions from leading European experts cover relevant intercultural issues and topics in areas as diverse as personality, education, and training, work, and organizational psychology, clinical and counselling psychology, migration, and international youth exchanges. As well as looking at the new challenges and opportunities that psychologists face in dealing with people from increasingly varied cultural backgrounds, perhaps more importantly, they also explain and discuss how psychologists can deepen and acquire the intercultural competencies that are now needed in our professional lives.

Cultural Competence in Applied Psychology Craig L. Frisby, William T. O'Donohue, 2018-07-25. The first volume of its kind, this provocative book evaluates the construct of cultural competence from multiple perspectives. At the intersection of diverse disciplines and domains, contributors argue for greater clarity in understanding the cultural competence construct, a deeper level of analysis as to its multifaceted components, and call for concrete, practical objectives and science-based means of measurement. Serious, nuanced discussion addresses challenges, strengths, and limitations of current cultural competence practice in terms of sociocultural concepts, e.g., race, ethnicity, and practical concepts, e.g., sensitivity in the therapeutic relationship, treatment efficacy. In addition, contributors identify future directions for research, training, and practice with the potential to spur the further evolution of this clinically important construct. This timely book critiques the cultural competence construct and its

evaluation as it is currently disseminated within applied psychology Compares and contrasts how cultural competence is defined within clinical school and counseling psychology Analyzes difficulties and challenges in understanding the cultural competence construct as evaluated through the lens of closely related fields outside of applied psychology Spotlights complexities in cultural competence issues pertaining to specific populations Sets out implications for education and training offering a detailed outline for an ideal college course in cultural competence With this level of reasoning and rigor Cultural Competence in Applied Psychology is sure to stimulate long overdue dialogue and debate among professionals across a wide variety of fields such as clinical psychology social work child and social psychology psychotherapy school psychology and counseling
