Using the Biological Literature Diane Schmidt, 2014-04-14 The biological sciences cover a broad array of literature types from younger fields like molecular biology with its reliance on recent journal articles genomic databases and protocol manuals to classic fields such as taxonomy with its scattered literature found in monographs and journals from the past three centuries Using the Biological Literature A Practical Guide Fourth Edition is an annotated guide to selected resources in the biological sciences presenting a wide ranging list of important sources This completely revised edition contains numerous new resources and descriptions of all entries including textbooks The guide emphasizes current materials in the English language and includes retrospective references for historical perspective and to provide access to

the taxonomic literature It covers both print and electronic resources including monographs journals databases indexes and abstracting tools websites and associations providing users with listings of authoritative informational resources of both classical and recently published works With chapters devoted to each of the main fields in the basic biological sciences this book offers a guide to the best and most up to date resources in biology It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians The guide includes a supplementary website dedicated to keeping URLs of electronic and web based resources up to date a popular feature continued from the third edition

PAHs Peter E. T. Douben, 2003-07-25 Polycyclic aromatic hydrocarbons PAHs or polyarenes are one of the largest and most structurally diverse class of organic molecules known High percentages of polyarenes representing a wide range of molecular sizes and structural types are present in coal tars and petroleum residues The major sources of PAHs are crude oil coal and oil shale The fuels produced from these fossil sources constitute the primary source of energy for the industrial nations of the world and the petrochemicals from these raw materials are the basis of the synthetic fibre and plastics industries PAHs are however widespread pollutants and their impact on the environment and human health must be monitored and controlled This book will review and assess our scientific understanding of the ecological exposure and effects PAHs have in different environments and habitats It will accomplish this by taking the recipients of the pollution in the environment as starting points and working its way back through pathways to access what is required for our understanding of effects and rationale for control Although this book will concentrate on ecological exposure of PAHs the general impacts of PAHs on human populations will be touched upon It is thought to be the first book to focus on the ecological aspects of PAHs
