Service Quality Measurement: Issues and Perspectives

Lewlyn L. R. Rodrigues, 2013-05-22 This book is very useful for it is not just descriptive in its nature but prescriptive too It is descriptive in the sense that it describes the process of developing or using a metric in a problem situation and prescriptive as it clearly prescribes how a beginner can put the theory into practice In this globalized economy maintaining quality of products and services has been the thrust area of interest among academicians and practitioners Today there are quite a good number of books and research articles available Nevertheless service quality measurement has always posed problems particularly in the context of service industries due to the difficulty in the measurement of the intangibles and implied needs of the customers The research literature is filled with articles on how to quantify the services and there are several streams of arguments on the choice of the most ideal approach However the research gap lies in the answer to the question Do these measurement instruments concur in their measurement outcomes or do they give different results in the same situation This book primarily makes an attempt to answer this question through a case study approach Even though there are several instruments for the measurement of service quality the two most widely used instruments are SERVQUAL and SERVPERF metrics Comprehensively this book explains the systematic procedure of using both the instruments in a service sector and further the procedure for conducting a statistical analysis so that one will be able to apply the same in any service sector It then takes the reader through a series of tests in order to compare the two metrics and to prove statistically if there is the same outcome in a problem situation The results are sure to surprise the reader and trigger the research bent of mind to undertake a similar study of such metrics and gain mastery over performing an independent research with very minimal guidance from a professional gu

Preach the Word Myles MacBean, 2019-11-11 How should we help equip the church leaders of Africa today There remains a well documented lack of theologically sound Bible centric preaching in Sub Saharan Africa The majority of sermons are preached by untrained or undertrained church leaders Following a practical theology

praxis this book develops a conceptual framework for the evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner *Research strategies discussed by Martyn Denscombe in his book 'The Good Research Guide for small - scale social research projects* Rene Tetzner,2006-04-09 Essay from the year 2004 in the subject English Language and Literature Studies Literature grade A University of Bedfordshire Luton Business School 4 entries in the bibliography language English abstract When we carry out surveys we can not include everyone who belongs to the research group That is why we select a portion of the group and assume this portion applies equally to others of the group Mainly two groups of research techniques are used in the social research namely probability sampling and non probability sampling To the group of probability sampling belongs random sampling systematic sampling stratified sampling quota sampling cluster sampling and multi stage sampling They rely on the idea that the researcher has some notion the chosen sample represents the whole of the selection Included in the group of non probability sampling are purpose sampling snowball sampling theoretical sampling and convenience sampling basically it means we do not have enough information for the samples to represent a particular portion *Handbook on Gender and Digital Media* Dustin Harp,Ingrid Bachmann,Jaime Loke,2025-09-10 This timely Handbook explores the intersection between gender and digital media examining how virtual platforms both challenge and reinforce traditional gender norms and inequalities Taking an interdisciplinary approach it reflects on key issues such as gendered digital labor self expression and intersectionality in cyberspaces **Product Intervention** Biswajeet Mukherjee,2023-08-10 This book covers all aspects of design thinking and its intervention as needed for developing products for the elderly The book deals with the Universal Principles of Design and how they can be included with Technological Interventions for showcasing the product lifecycle The main technical features include the Anthropometry calculations Design Thinking approach on the healthcare products and selection of target group which is elderly in the presented context Further the complete product development cycle the choice of materials assessment of the designs prototyping phases and the final product are all discussed in detail The various fabrication strategies to reduce

the cost of the product ideation stages and Feedback and Assessment right from design to product development stage are discussed All the Anthropometry details are included specifically for the target group chosen its mathematical understanding error etc are all discussed in the book The ideations rendering and conceptualization based on Cognitive Ergonomics or Hawthorne and various other effects are also discussed in detail A Student's Guide to Presentations Barbara Chivers, Michael Shoolbred, 2007-09-27 Are you daunted by the prospect of doing a presentation or just keen to improve your presentation skills This book gives you a detailed guide to the preparation and delivery of both individual and group presentations It takes you through all the practical stages necessary to complete a presentation and obtain excellent marks Key features include Real life examples illustrating effective presentation techniques Helpful tips and illustrations throughout A 10 step guide to preparing your presentation Tips on using PowerPoint effectively A companion website complete with a student resource centre Written in a clear and accessible style this book is essential reading for both undergraduate and postgraduate students who have to conduct graded presentations Visit the companion website for free online support resources SAGE Study Skills are essential study guides for students of all levels From how to write great essays and succeeding at university to writing your undergraduate dissertation and doing postgraduate research SAGE Study Skills help you get the best from your time at university Visit the SAGE Study Skills website for tips quizzes and videos on study success
