Changing Face of Information: Support Services for Scientific Research David J. Brown, 2020-01-20 The health of scientific enterprise has become a critical political and social issue as nation states tackle austerity diversity global challenges whilst simultaneously supporting a competitive and innovative national economy A key asset in achieving such ambitions is for a scholarly information system which enables the fruits of the research effort to be disseminated efficiently As the information support system struggles with adapting from a print based to a digital process the dysfunctionality current within STEM publishing in particular becomes evident New ways of supporting research are emerging which require a new approach to publishing an approach which takes on board the many demographic social technical and administrative changes taking place in both science itself and society A radical strategic assessment is required and this book tracks key aspects required for any new future strategy This book provides a catalogue of issues to which a future STEM information industry will need to adapt They range from the effects of technology on the neurological processes of research to the growing use of technology to speed up the exchange of information among groups and laboratories from considerations about quality control yet maintaining intellectual ownership from changing from an elitist STEM system favouring academics to a more democratic process with wider appeal There is the neglected non academic market and its need to share in the results of the research effort often through partnership and being part of a hive mind This is the large world of the unaffiliated knowledge workers of which academia is numerically but a small part The many changes taking place in scholarly information dictate that the future is unlikely to be a smooth and gradual evolution from the past Radical new approaches are required a revolution which takes on board the perfect storm of changes listed in this book Just as such changes have changed the face of industries such as music and retail in recent years so similar dramatic changes are likely to result in a restructuring of STEM into a more technologically focused industry within the next decade The implications for the current STEM stakeholders are profound

Digital Media and Reporting Conflict Daniel Bennett, 2013-07-18 This book explores the impact of new forms of online reporting on the BBC s coverage of war and terrorism Informed by the views of over 100 BBC staff at all levels of the corporation Bennett captures journalists shifting attitudes towards blogs and internet sources used to cover wars and other conflicts He argues that the BBC s practices and values are fundamentally evolving in response to the challenges of immediate digital publication Ongoing challenges for journalism in the online media environment are identified maintaining impartiality in the face of calls for more open personal journalism ensuring accuracy when the power of the former audience allows news to break at speed and overcoming the limits of the scale of the BBC s news operation in order to meet the demands to present news as conversation While the focus of the book is on the BBC s coverage of war and terrorism the conclusions are more widely relevant to the evolving practice of journalism at traditional media organizations as they grapple with a revolution in publication
