Integrated Project Design Bárbara Rangel,Ana Sofia Guimarães,Jorge Moreira da Costa,João Pedro Poças Martins,2023-06-30 Integrated Project Design Delivery is not new but in recent years it has been achieving the status of yet another acronym more connected to its contractual details than to the actual meaning of the profound change in how work is to be developed This book clarifies this situation by presenting several examples in academia research and practical design situations ranging from the use of old style expression media such as handmade drawings to comprehensive digitalisation processes The IPD model is shown as an effective way to tackle the ever increasing challenges of balancing productivity with the urgent demands for designs that embrace decarbonisation net zero buildings energy efficiency modularisation and disassembly including lessons learned from Industrial Design IPD is a mindset that clashes with the traditional academic model of placing architecture and engineering in different and frequently opposite fields Actual examples of course syllabuses that disrupt this approach are also presented showing how wide collaboration from the early stages of the design process can improve the sought after result providing future professionals with a hands on experience of its efficiency as a work methodology

DESIGNING FUTURE STABILIZATION EFFORTS Stephan De Spiegeire,Peter Wijninga,Tim Sweijs, As the NATO combat mission in Afghanistan draws to an end the West is starting to take a hard look back at two decades of global stabilization efforts The lessons learned literature on these efforts is exploding One of the dominant themes in this literature is the need to embed the specifically military toolkit into a much more comprehensive integrated approach towards planning and executing In this forward looking report HCSS goes a step further by focusing not on the operational but on the strategic level of decision making Today this strategic layer is driven much more by domestic and international politicking than by creative strategic thinking This report advocates a new approach to strategic decision making which we label strategic design It summarizes and borrows some key insights from the design thinking literature in the business and public management literature and applies those to the security challenges surrounding stabilization efforts The report then illustrates this approach by developing and evaluating a few design sketches for new capability elements that even a small force provider like The Netherlands could start developing The report might be of interest to strategic planners and decision makers on both the military and civilians side

What Is Cosmopolitical Design? Design, Nature and the Built

Environment Albena Yaneva, Alejandro Zaera-Polo, 2017-05-15 The scale of ecological crises made us realize that every kind of politics has always been cosmopolitics politics of a cosmos Cosmos embraces everything including the multifarious natural and material entities that make humans act The book examines cosmopolitics in its relation to design practice Abandoning the modernist idea of nature as being external to the human experience a nature that can be mastered by engineers and scientists from outside the cosmopolitical thinking offers designers to embark in an active process of manipulating and reworking nature from within To engage in cosmopolitics this book argues means to redesign create instigate and compose every single feature of our common experience In the light of this new understanding of nature we set the questions What is the role of design if nature is no longer salient enough to provide a background for human activities How can we foster designers own force and make present what causes designers to think feel and act How do designers make explicit the connection of humans to a variety of entities with different ontology rivers species particles materials and forces How do they redefine political order by bringing together stars prions and people In effect how should we understand design practice in its relation to the material and the living world In this volume anthropologists science studies scholars political scientists and sociologists rethink together the meaning of cosmopolitics for design At the same time designers architects and artists engage with the cosmopolitical question in trying to imagine the future of architectural and urban design The book contains original empirical chapters and a number of revealing interviews with artists and designers whose practices set examples of cosmopolitically correct design

Cultural Ideals of Home Deborah Chambers, 2020-03-18 Spanning the nineteenth to twenty first centuries this book investigates how home is imagined staged and experienced in western culture Questions about meanings of home and domestic culture are triggered by dramatic changes in values and ideals about the dwellings we live in and the dwellings we desire or dread Deborah Chambers explores how home is idealised as a middle class haven managed as an investment and signified as a status symbol and expression of personal identity She addresses a range of public state commercial popular and expert discourses about home the heritage industry design exhibitions television social media home mobilities and migration smart technologies and ecological sustainability Drawing on cross disciplinary research including cultural history and cultural geography the book offers a distinctive media and cultural studies approach supported by original historically informed case studies on interior and domestic design exhibitions of model homes TV home interiors media home imaginaries multiscreen homes corporate visions of homes of tomorrow and digital smart homes A comprehensive and engaging study this book is ideal for students and researchers of cultural studies cultural history media and communication studies as well as sociology gender studies cultural geography and design studies
