How Do You Feel An Interoceptive Moment With Your Neurobiological Self:

How Do You Feel? A. D. Craig, 2020-06-23 Craig believes we do not have a genuine understanding of what a feeling is or how we experience a feeling Emotional feelings though are even less tangible and more ephemeral Bodily awareness has been called interoceptive awareness by investigators interested in the effects of cardiorespiratory or visceral sensory activity on human mood emotion and performance Craig's goal here is to provide a clear and accessible explanation of the ideas that emerged from his work on the lamina I projection map that he has been developing for the last twenty five years adapted from Introduction pages 1-15 [Touch is Really Strange](#) Steve Haines, 2021-04-21 Why can't we tickle ourselves How can slow touch convey more powerful emotions than fast touch How does touch shape our perception of the world The latest addition to the Really Strange series this science based graphic comic addresses these questions and more revealing the complexity of touch and exploring its power and limits Used positively touch can change pain and trauma communicate compassion and love and generate social bonding Get it wrong and it can be abusive and terrifying Touch helps us feel real Knowledge comes through our body as we engage with space and with others Before we have language our concepts are formed as we meet a world full of edges and textures Touch is Really Strange celebrates the power of inward touch interoception and looks at how we can use skilful contact to promote feelings of joy connection and vitality [Einstein vs. Bergson](#) Alessandra Campo, Simone Gozzano, 2021-11-08 This book brings together papers from a conference that took place in the city of L'Aquila 4-6 April 2019 to commemorate the 10th anniversary of the earthquake that struck on 6 April 2009 Philosophers and scientists from diverse fields of research debated the problem that on 6 April 1922 divided Einstein and Bergson the nature of time For Einstein scientific time is the only time that matters and the only time we can rely on Bergson however believes that scientific time is derived by abstraction even in the sense of extraction from a more fundamental time The plurality of times envisaged by the theory of Relativity does not for him contradict the philosophical intuition of the existence of a single time But how do things stand today What can we say about the relationship between the quantitative and qualitative dimensions of time in the light of contemporary science What do quantum mechanics biology and neuroscience teach us about the nature of time The essays collected here take up the question that pitted Einstein against Bergson science against philosophy in an attempt to reverse the outcome of their monologue in two voices with a multilogue in several voices **Performing Time** Clemens Wöllner, Justin London, 2023-06-20 Music and dance can change our sense of time Both rely on synchronizing our attention and actions with sounds and with other people both involve memory and expectation and both can give rise to experiences of flow and pleasure Performing Time explores our experience of time in dance and music from the perspectives of performers and audiences and informed by the most recent research in dance science musicology neuroscience and psychology It includes discussions of tempo and pacing coordination and synchrony the performer's experience of time audiences temporal expectations the effect of extreme slowness and our individual versus

collective senses of time At its core the book addresses how time and temporality in music and dance relate to current psychological and neuroscientific theories as well as to the aesthetic aims of composers choreographers and performers Bringing together new research on rhythm time and temporality in both music and dance in one volume the book contains overview chapters on the state of the art from leading researchers on topics ranging from the psychology neuroscience and philosophy of musical time to embodied timing in dance In addition numerous case studies regarding our temporal experience of music and dance are provided in shorter focus chapters with their implications for further scientific study and artistic enquiry Performing Time is an invaluable and comprehensive resource for students researchers educators and artists alike and for any reader interested in how the performing arts construct and play with time in our minds and bodies Some chapters in this title are open access and available under the terms of a CC BY NC ND 4 0 International licence

The Therapeutic Pause in Osteopathy and Manual Therapy Louise Tremblay, 2015-11-01 Osteopathy and Bowen therapy in particular emphasises the importance of making therapeutic pauses during treatments But it is not explained why a pause should be incorporated into the treatment session just that it is important to do so This book is based on research which attempted to understand and identify the physiology that might justify the inclusion of pauses during treatment It also looked at how much the pause was used within osteopathic treatment in general **Living machines** Tony J.

Prescott, Nathan Lepora, Paul F. M. J Verschure, 2018-04-13 Contemporary research in science and engineering is seeking to harness the versatility and sustainability of living organisms By exploiting natural principles researchers hope to create new kinds of technology that are self repairing adaptable and robust and to invent a new class of machines that are perceptive social emotional perhaps even conscious This is the realm of the living machine Living machines can be divided into two types biomimetic systems that harness the principles discovered in nature and embody them in new artifacts and biohybrid systems in which biological entities are coupled with synthetic ones Living Machines A handbook of research in biomimetic and biohybrid systems surveys this flourishing area of research capturing the current state of play and pointing to the opportunities ahead Promising areas in biomimetics include self organization biologically inspired active materials self

assembly and self repair learning memory control architectures and self regulation locomotion in air on land or in water perception cognition control and communication Drawing on these advances the potential of biomimetics is revealed in devices that can harvest energy grow or reproduce and in animal like robots that range from synthetic slime molds to artificial fish to humanoids Biohybrid systems is a relatively new field with exciting and largely unknown potential but one that is likely to shape the future of humanity This book surveys progress towards new kinds of biohybrid such as robots that merge electronic neurons with biological tissue micro scale machines made from living cells prosthetic limbs with a sense of touch and brain machine interfaces that allow robotic devices to be controlled by human thought The handbook concludes by exploring some of the impacts that living machine technologies could have on both society and the individual exploring questions about how we will see and understand ourselves in a world in which the line between the natural and the artificial is increasingly blurred With contributions from leading researchers from science engineering and the humanities this handbook will be of broad interest to undergraduate and postgraduate students Researchers in the areas of computational modeling and engineering including artificial intelligence machine learning artificial life biorobotics neurorobotics and human machine interfaces will find *Living Machines* an invaluable resource **Yoga Therapy for Children and Teens**
