Like cell phones and FM radios, wireless routers use radio waves to receive and transmit data.

An examination of the ways that digital technologies play an increasingly important role in the lives of precarious workers far beyond the gig economy apps like Uber and Lyft. Over the past three decades, digital technologies like smartphones and laptops have transformed the way we work in the US. At the same time, workers at both ends of the income ladder have experienced rising levels of job insecurity and anxiety about their economic futures. In **Left to Our Own Devices**, Julia Ticona explores the ways that workers use their digital technologies to navigate insecure and flexible labor markets. Through 100 interviews with high and low wage precarious workers across the US, she explores the surprisingly similar digital hustles they use to find work and maintain a sense of dignity and identity. Ticona then reveals how the digital hustle ultimately reproduces inequalities between workers at either end of polarized labor markets. A moving and accessible look at the intimate consequences of contemporary capitalism. **Left to Our Own Devices** will be of interest to sociologists, communication and media studies scholars as well as a general audience of readers interested in digital technologies, inequality and the future of work in the US. **Popular Science**, 2005-09

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that **Popular Science** and our readers share: The future is going to be better and science and technology are the driving forces that will help make it better. *On the Move to Meaningful Internet Systems: OTM 2015 Workshops* Ioana Ciuciu, Hervé Panetto, Christophe

Digital Humanities in Latin America Héctor Fernández L’Hoeste,Juan Carlos Rodríguez,2023-05-02 A hemispheric view of the practice of digital humanities in the Spanish and Portuguese speaking Americas As digital media and technologies transform the study of the humanities around the world this volume

provides the first hemispheric view of the practice of digital humanities in the Spanish and Portuguese speaking Americas. These essays examine how participation and research in new media have helped configure identities and collectivities in the region. Featuring case studies from throughout Latin America including the United States, Latinx community contributors analyze documentary films, television series, and social media to show how digital technologies create hybrid virtual spaces and facilitate connections across borders. They investigate how Latinx bloggers and online activists navigate governmental restrictions in order to connect with the global online community. These essays also incorporate perspectives of race, gender, and class that challenge the assumption that technology is a democratizing force. *Digital Humanities in Latin America* illuminates the cultural, political, and social implications of the ways Latinx communities engage with new technologies. In doing so, it connects digital humanities research taking place in Latin America with that of the Anglophone world. Contributors: Paul Alonso, Morgan Ames, Eduard Arriaga, Anita Say Chan, Ricardo Dominguez, Orlando Luis Pardo Lazo, Hector Fernandez L. Hoeste, Jennifer M. Lozano, Ana L. da Silva, Medeiros Gimena del Rio Riande, Juan Carlos Rodriguez, Isabel Galina Russell, Angharad Valdivia, Anastasia Valecce, Cristina Venegas.
