Oversight Hearing[s] on Older Americans United States. Congress. House. Committee on Education and Labor. Select Subcommittee on Education, 1973 *The Caveman Mystique* Martha McCaughey, 2008 Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men's irrepressible heterosexuality have become increasingly common and increasingly common excuses for men's sexual aggression *The Caveman Mystique* traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of

pop Darwinism's assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory *The Caveman Mystique* offers a fresh understanding of science science popularization and the impact of science on men's identities making a convincing case for deconstructing rather than defending the caveman **Thin for**

Male Life Expectancy Anthony Ekanem, 2016-08-20 It is the desire of all humans to live long on earth and fulfil their purpose for existence Many have desired to live up to 80 90 100 and some even wish to live longer While this desire to live long is a legitimate one it often happens that people die when they least wished or expected Historically women live longer than men and this trend may continue for centuries and perhaps longer Even with the sizable risk conferred by childbirth women lived longer than men in 1900 and it appears that women have out survived men at least since the 1500s when the first reliable mortality data were kept Sweden was the first country to collect data on death rates nationally in that country's earliest records between 1751 and 1790 the average life expectancy

at birth was 36 6 years for women and 33 7 years for men Death rates in less developed countries whose citizens have limited access to cars guns and maternal care also provide a measure of mortality before modernity At present the only countries in which male life expectancy exceeds that for females are those with long standing sexual discrimination including Bangladesh India and Pakistan where social pressures and practices such as female infanticide and bride burning result in unique losses of females The fact that women live longer than men does not necessarily mean that they enjoy better health than men It could be that women live with their diseases while men die from them Indeed there is a difference between the sexes in disease patterns with women having more chronic non fatal conditions such as arthritis osteoporosis and autoimmune disorders and men having more fatal conditions such as heart disease and cancer

Harper's Weekly John Bonner, George William Curtis, Henry Mills Alden, Samuel Stillman Conant, Montgomery Schuyler, John Foord, Richard Harding Davis, Carl Schurz, Henry Loomis Nelson, John Kendrick Bangs, George Brinton McClellan Harvey, Norman Hapgood, 1902 *The Evolution of Modern Capitalism: A Study of Machine Production* J. A. Hobson, 2022-09-16 In The Evolution of Modern Capitalism A Study of Machine Production J A Hobson meticulously analyzes the transformative impact of machine production on the fabric of capitalism Written in a period marked by rapid industrialization and burgeoning economic theories Hobson employs a critical and analytical literary

style that blends empirical observations with theoretical discourse. He articulates how technological advancements and mass production are not merely economic phenomena but also deeply intertwined with social structures, labor conditions, and political dynamics, thus placing his work within the larger context of social science and economic thought of the late 19th and early 20th centuries. J. A. Hobson, a prominent English economist and social critic, was heavily influenced by the industrial environment of his time, fostering his exploration of capitalism and its implications. His interdisciplinary background, combining elements of sociology, economics, and politics, informed his perspective on modern capitalism, leading him to engage with critiques of imperialism and social inequality. Hobson's intellect and advocacy for social reform are palpable throughout his writings, revealing a commitment to understanding and addressing the complexities of his era. This insightful examination is highly recommended for scholars and students alike, providing a profound understanding of the historical and social dimensions of capitalism. Hobson's work challenges readers to reconsider the ramifications of industrialization, making it essential for anyone interested in the evolution of economic systems and their societal impacts.

How Men Age Richard G. Bribiescas, 2018-05-08. A groundbreaking book that examines all aspects of male aging through an evolutionary lens. While the health of aging men has been a focus of biomedical research for years, evolutionary biology has not been part of the conversation until now. *How Men Age* is the first book to explore how natural selection has shaped male aging, how evolutionary theory can inform our understanding of male health and well-being, and how older men may have contributed to the evolution of some of the very traits that make us human. In this informative and entertaining book, renowned biological anthropologist Richard Bribiescas looks at all aspects of male aging through an evolutionary lens. He describes how the challenges males faced in their evolutionary past influenced how they age today and shows how this unique evolutionary history helps explain common aspects of male aging, such as prostate disease, loss of muscle mass, changes in testosterone levels, increases in fat, erectile dysfunction, baldness, and shorter life spans than women. Bribiescas reveals how many of the physical and behavioral changes that we negatively associate with male aging may have actually facilitated the emergence of

positive traits that have helped make humans so successful as a species including parenting long life spans and high fertility Popular science at its most compelling How Men Age provides new perspectives on the aging process in men and how we became human and also explores future challenges for human evolution and the important role older men might play in them
