Brain On Fire:
My Month of Madness Susannah Cahalan,2012-11-13 My first serious blackout marked the line between sanity and insanity Though I would have moments of lucidity over the coming days and weeks I would never again be the same person Susannah Cahalan was a happy clever healthy twenty four year old Then one day she woke up in hospital with no memory of what had happened or how she had got there Within weeks she would be transformed into someone unrecognizable descending into a state of acute psychosis undergoing rages and convulsions hallucinating that her father had murdered his wife that she could control time with her mind Everything she had taken for granted about her life and who she was was wiped out Brain on Fire is Susannah s story of her terrifying descent into madness and the desperate hunt for a diagnosis as after dozens of tests and scans baffled doctors concluded she should be confined in a psychiatric ward It is also the story of how one brilliant man

Syria born Dr Najar finally proved using a simple pen and paper that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little known condition thought to have been the real cause of devil possessions through history saved her life and possibly the lives of many others. Cahalan takes readers inside this newly discovered disease through the progress of her own harrowing journey piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet universal book which asks what happens when your identity is suddenly destroyed and how you get it back. With eagle eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. *Brain on Fire* is a mesmerizing story. Mira Bartok, New York Times bestselling author of *The Memory Palace*. Susannah Cahalan is a reporter on the New York Post and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.

Max Your Immunity Pamela Wartian Smith, 2021-09-14 The word immunity has unfortunately become an all too common term in our vocabulary and for good reason When the pandemic hit many of the major drug companies created vaccines that offered us immunity against this specific virus Yet few of us understand that almost all these vaccines work based upon their activating our own built in systems of defense It is our very own immunity to these viruses that can make the difference between illness and health To help clarify what each of us can do to protect ourselves and our loved ones Pamela Wartian Smith MD has written Max Your Immunity Here is a complete guide to understanding and maximizing your natural defenses against various infectious diseases Max Your Immunity is divided into three parts Part One explains how our innate and adaptive immunity systems work Our innate immunity system is based on our built in barriers designed to fight or separate us from infectious agents Our adaptive immunity also called acquired immunity is composed of lymphocyte cells that are triggered when a specific pathogen enters the body These cells learn to identify the invading pathogens and hunt them down In this section each component in both systems are clearly identified and explained Part Two provides ten important things that you can do to increase and strengthen all of these components And Part Three provides specific nutritional plans to increase your body's immunity to help defend against the most common health disorders By simply having a clear understanding of how our internal defenses work and what we can do to increase our immunity we can play an important role in maintaining good health Max Your Immunity can help show you what you need to know to protect yourself and your family
