Patricia O'Hara, 1998-06-01 In Ireland family farming retains enormous ideological and cultural significance As a social form it is one of the last preserves of male dominance in which women's contributions and concerns are largely overlooked This book breaks new ground as the first major study of Irish farm families in which women are the focus of attention Little is known of how gender relations actually work themselves out within farm families or of farm women's understanding of their situation but even a casual observer would conclude that Irish farm women are not without influence This volume reveals how contemporary farm women experience life on the family farm often through their own voices and how they have managed to create their own spheres of influence despite their apparent unequal status and invisibility in the male world of agriculture's This study not only makes farm women's subordination explicit but in discerning the sources and force of their influence within and outside the farm family it offers a challenge to existing explanations of the evolution of Irish rural social structures It also suggests that feminist theories of the family need to pay closer attention to the mother's influence on social reproduction      *Products and Priorities* United States. Forest Department, 1907      *The Power of the Past* Jessi Streib, 2015-01-05 In an era in which class divisions are becoming starker than ever some individuals are choosing to marry across class The Power of the Past traces the lives of a subset of these individuals highly educated adults who married a partner raised in a class different from their own primarily between those from blue and white color backgrounds Drawing upon detailed interviews with spouses who revealed the inner workings of their marriages Jessi Streib shows that crossing class lines is not easy and that even though these couples shared bank accounts mortgages children and friends each spouse was still shaped by the class of their past and consequently so was their marriage Streib reveals what was rarely apparent to the husbands and wives she interviewed The class of their past did not only matter in determining the amount of money they had as children or what job their parents went off to each morning

It also mattered in more subtle ways by systematically shaping their ideas of how to go about their daily lives Upwardly mobile spouses who grew up in blue collar families learned to take a laissez faire approach to the world around them they preferred to go with the flow make the most of the moment and avoid self imposed constraints Their spouses who grew up in professional white collar families however wanted to manage the world around them they organized planned monitored and oversaw Living with a spouse who was born into a different class means navigating these differences differences that appeared across nearly every aspect of their lives from how they manage their finances to how they manage their time both at home and on vacation to ideas about how their children should be raised The Power of the Past illustrates that when individuals are raised in different classes merged lives do not lead to merged ideas about how to lead those lives Individuals can come together across class lines but their enduring class characteristics cannot be left behind
