Software codes of mantra, tantra, witchcraft, black magic, evil eye, evil tongue &c. VED from VICTORIA INSTITUTIONS, This book can be downloaded as a PDF file from here Prologue This is not a guide book for studying any occult art Instead it is a writing that proposes to take up the possibility of there being a real machinery behind the working of so called mantra tantra evil eye black magic voodoo etc This book does not teach any of the above mentioned arts Yet it does try to find a pathway or opening by which we can find or enter the supernatural arena from where the supernatural software codes of reality and life is designed and maintained It is a writing that tries to discuss a probability that is not connected to material sciences Instead it proposes to examine the possibility of there being a supernatural software application location wherein reality might be seen in the code view as well as the design view These two views are apart from the real view which is the physical reality The ultimate aim of this book is to propose a pathway via which we can approach the supernatural software location where all of reality life living organisms brain software English versus the feudal languages around 1989 The final version of the book was completed around 2000 In the concluding part of that book I did hint about the possibility of there being something akin to a software background to reality And that languages are software applications with varied capacities In around the year 2005 I wrote a series of posts in a GB website on the same subject It was basically a lot of unconnected themes all pointing to the same theme This I later published as a digital book under the name Software codes of reality life and languages Then my next major book on the subject came out with the name Codes of reality What is language Here again the same theme of connecting the idea of there being a software realm behind reality and that languages have software codes which can directly connect to the software of reality was elaborated The focus was on languages being sort of software applications through which physical reality could be influenced Still the theme was going forward only in very brief paces A few years ago I had to write a series of posts for supporting the contentions of Homoeopathy by basing the ideas from my understandings That Homoeopathy does work on the principle of a software program rectifying the software of life and human body The book title was The machinery of Hom opathy Recently I happened to read Edgar Thurston s Omens and Superstitions of Southern India It was at that time that I pondered upon reworking out the arguments from the perspective of mantra tantra black magic witchcraft etc The first thing I did was to create a very readable form of that book As I went on doing that work I could get to read the book also This present book is being promoted as a Commentary on Omens and Superstitions of Southern India However only the last part of this book really is a sort of commentary Even in that part it is not exactly a commentary I merely quoted some sentences from his book and elaborated upon them as per what I wanted to convey Edgar Thurston s Omens and Superstitions of Southern India is definitely a great book My writings do not aim to go against that book This book of mine does contain a lot of mentions about Thurston s book This book commences by mentioning OMENS AND SUPERSTITIONS OF SOUTHERN INDIA However it moves beyond to a wider ambit It returns to

Thurston's book at the end as a commentary. However, a mention of Thurston's book can be felt all along. I have used a few images from other old public domain books. These images are mainly taken from my own collection from such books. Due to some issues, I do not have the exact record as to where I got some of the images. I believe that such images have been taken from Edgar Thurston's *Castes and Tribes of Southern India*. Before commencing the reading of the book, the reader is further informed that in various locations, the text would seem to be dealing with cultural aspects. However, without clearly mentioning these things, it would be difficult to go directly into the effects of supernatural software codes. DEVERKOVIL

First drafted in 1989. A QUOTE from the book about what would happen to the US when feudal language speakers swarm into this once good quality English nation. This was written around 1990, a stage may come at least in certain areas where the innate resilience of the English structure may be severely tested and cause much distress to the individual persons and can in a matter of time cause domino effect on many other areas, causing strange happenings of technological failure, inefficiency, conflict, hatred, events that may be described with shallow understanding as racially motivated, decent and peaceful persons acting with unnatural violence etc. Rude officialdom, arrogant and trigger happy police, increasing corruption, insolent attitude to persons who are judged to be doing lower jobs, time consuming judiciary rules and regulations which are laughable in meaning but having a sting from which many get hurt and a general feeling of hopelessness for the solitary individual as against the might of the society are all general characters of the effect of feudal languages. What has to be borne in mind is that feudal languages do have elements in them which aim at subjugation and where they fail to do so, they may at least cause deep mental hurt. And that too in an extremely soft and inconspicuous manner that it may not be discernible to another person other than the person who felt it. Though persons who do not know these languages may not actually understand the full significance of each and every word, they may be able to sense the negativity from the body language of the person who says the words and of the others of the same language who may actually understand it. Beyond all this, there may be a factor of mental waves or energy which may radiate along with the words which may have a deeper effect than is currently understood. It could all lead to a lot of side effects, possibly due to a sort of domino effect and the effect need not be at the place the disturbance took place. Examples could be unexplainable road rages, air rages, shooting of colleagues and so many actions with criminal overtones by seemingly decent persons. You should read this book also. *The SHROUDED SATANISM in FEUDAL LANGUAGES*. Tribulations and intractability of improving others. *MALABAR MANUAL* by William Logan, Commentary. William Logan's Malabar is popularly known as Malabar Manual. It is a huge book of more than 500,000 words. It might not be possible for a casual reader to imbibe all the minute bits of information from this book. However, in this commentary of mine, I have tried to insert a lot of such bits and pieces of information by directly quoting the lines from Malabar. On these quoted lines, I have built up a lot of arguments and also added a lot of explanations and interpretations. I do think that it is much easier to go through my

Commentary than to read the whole of William Logan s book Malabar However the book Malabar contains much more items than what this Commentary can aspire to contain This book Malabar will give very detailed information on how a small group of native Englishmen built up a great nation by joining up extremely minute bits of barbarian and semi barbarian geopolitical areas in the South Asian Subcontinent **Feudal languages!
