from URBAN DESIGN to LANDSCAPE URBANISM Sariyya ARSLAN, Erkan POLAT, 2025-04-16 Landscape Urbanism is a planning and design theory and a model of practice that argues that the best way to organize cities is through the design of the city's landscape rather than just the design of built or unbuilt areas In this context it is positioned within larger scale cultural historical and theoretical formations Landscape Urbanism is a response to the limited perception or depiction of the current project and site context by both Urban Planners and Architects and Landscape Architects It is also a concept that has been strategically introduced by these design and planning oriented professions and jobs especially in terms of Urban Design as a way to differentiate the context and is used more in a Western oriented way and has been put forward as a response to the increasingly undefined role that Landscape Architects find themselves in Landscape Urbanism describes the ability to produce urban effects that have traditionally been achieved through the construction of buildings on built up areas simply through the organization of horizontal surfaces Although first

coined in the mid 1990s the term Landscape Urbanism has adopted many different uses but is most often associated with Urban Design and as a Postmodernist or even New Modernist response to the spatial scale failures of the New Urbanism the departure from comprehensive visions and demands for Modern architecture and Urban Planning

Creating Great Places is an insightful compelling and evidence based resource for readers who want to design urban environments that inspire excite and positively transform people s lives **The Poetics of Cities** Mike Greenberg,1995 In this lively and insightful book Mike Greenberg argues that the purpose of cities and neighborhoods is to foster economic social and intellectual exchange the process that underlies the creation of value He seeks to show how the detailed geography of the city can either inhibit or encourage such exchanges and thus profoundly affect the lives of the people who live there Cities filled an important evolutionary niche historically because they were the places in contrast to rural areas or villages where exchange occurred with greatest efficiency where value was created most spectacularly and thus where the wealth was But it wasn t just the fact of concentration but the how of it that made cities efficient producers of value and circulators of wealth The Poetics of Cities is concerned with the context of contemporary cities and suburban rings where development dynamics guided by the needs of the automobile and by reformist planning concepts that went awry create environments that are increasingly hostile to exchange and thus threaten to inhibit the economic development that made them possible in the first place The city of late nineteenth and early twentieth century America was in some ways a remarkably sophisticated technology for fostering exchange and cementing community Taking examples mostly from his hometown San Antonio Texas Greenberg examines certain features of those cities their sidewalk systems their scale and setbacks the rhythms of their streetscapes the structure of their neighborhoods and shows why they worked so well and why they cannot be arbitrarily tossed aside without doing damage to the urban economy He then offers some practical planning strategies and regulatory ideas to help cities retain what is useful from their traditional forms while at the same time accommodating modernity Engagingly written The Poetics of Cities will make fascinating reading for architects urban planners neighborhood activists city officials real estate developers and anyone interested in the quality of urban life in
