Governance Democracy And Sustainable Development Moving Beyond The Impasse:

Governance, Democracy and Sustainable Development James Meadowcroft, Oluf Langhelle, Audun Rudd, 2012-01-01
The editors of this volume bring together an impressive cast of scholars on the critical relationship of democracy and governance in sustainable development. It offers an outstanding and timely contribution to the literatures in sustainability, political science and comparative environmental politics. Daniel J. Fiorino, American University, US. This very timely and important collection draws together some of the world's leading thinkers on environment and development to debate one of the most important issues of our time: sustainable development. They very usefully remind us all that in order to be politically sustainable, the sustainability transition will have to find a way to maximise policy synergies in a democratically legitimate manner. Andy Jordan, University of East Anglia, UK. This insightful book deals with governance of the environment and sustainable development. The contributors explore the difficulties developed countries are experiencing in coming to terms with environmental limits and the resultant challenges to the democratic polity. They engage with different dimensions of the governance challenge, including norms, public attitudes, citizen engagement, political conflict, policy design and implementation, with a range of environmental problems such as climate change, biodiversity, nature protection and water management. The book concludes with an essay by William Lafferty that explores the flawed character of the contemporary democratic polity and offers his reflections on possible pathways to reform. This book will interest researchers, academics and graduate students in environmental politics and public policy. It is ideal for use as supplementary reading in a wide range of university courses, while NGOs and policymakers will also find it of considerable value. [The Role of Public Sector in Local Economic and Territorial Development](#) Maroš Finka, Matej Jaško, Milan Husár, 2018-08-31. The book covers the topic of the role of the public sector in the economic and territorial development across several dimensions of spatial planning: e.g. theoretical, methodological, planning, cultures, leadership, executive, regional policies, services of general interest, sectoral, energy, tourism, air quality or social, social innovation, preservation of cultural heritage. The book delivers up-to-date knowledge built on interactions between representatives of different stakeholders of economic and territorial development with the research represented by renowned experts and academicians. This is mirrored in the content of the book, delivering in a consistent form the conceptual explanations combined with the examples of the role of the public sector in fostering the local economies within the frame of spatial planning. The book reflects and transfers the expert knowledge which has been generated during more than a decade of scientific and research activities of SpaceNet. Presents a comprehensive view on different aspects of the involvement of the public sector in the local and regional spatial development. Includes a combination of macro-regionally specific perspectives with the generalized knowledge. Provides knowledge from various researchers from prestigious European scientific and research teams. *Conceptual Innovation in Environmental Policy* James Meadowcroft, Daniel J. Fiorino, 2017-09-29. Concepts and their role in the evolution of modern environmental policy with case studies of eleven

influential concepts ranging from environment to sustainable consumption Concepts are thought categories through which we apprehend the world they enable but also constrain reasoning and debate and serve as building blocks for more elaborate arguments This book traces the links between conceptual innovation in the environmental sphere and the evolution of environmental policy and discourse It offers both a broad framework for examining the emergence evolution and effects of policy concepts and a detailed analysis of eleven influential environmental concepts In recent decades conceptual evolution has been particularly notable in environmental governance as new problems have emerged and as environmental issues have increasingly intersected with other areas Biodiversity for example was unheard of until the late 1980s negative carbon emissions only came into being over the last few years After a review of concepts and their use in environmental argument chapters chart the trajectories of a range of environmental concepts environment sustainable development biodiversity environmental assessment critical loads adaptive management green economy environmental risk environmental security environmental justice and sustainable consumption The book provides a valuable resource for scholars and policy makers and also offers a novel introduction to the environmental policy field through the evolution of its conceptual categories Contributors Richard N L Andrews Karin Bäckstrand Karen Baehler Daniel J Fiorino Yrjö Haila Michael E Kraft Oluf Langhelle Judith A Layzer James Meadowcroft Alexis Schulman Johannes Strippel Philip J Vergragt [Networking the Bloc](#) Klara Kemp-Welch, 2019-02-12 The story of the experimental zeitgeist in Eastern European art seen through personal encounters pioneering dialogues collaborative projects and cultural exchanges Throughout the 1970s a network of artists emerged to bridge the East West divide and the no less rigid divides between the countries of the Eastern bloc Originating with a series of creative initiatives by artists art historians and critics and centered in places like Budapest Poznań and Prague this experimental dialogue involved Western participation but is today largely forgotten in the West In [Networking the Bloc](#) Klara Kemp Welch vividly recaptures this lost chapter of art history documenting an elaborate web of artistic connectivity that came about through a series of personal encounters pioneering dialogues collaborative projects and cultural exchanges Countering the conventional Cold War narrative of Eastern bloc isolation Kemp Welch shows how artistic ideas were relayed among like minded artists across ideological boundaries and national frontiers Much of the work created was collaborative and personal encounters were at its heart Drawing on archival documents and interviews with participants Kemp Welch focuses on the exchanges and projects themselves rather than the personalities involved Each of the projects she examines relied for its realization on a network of contributors She looks first at the mobilization of the network from 1964 to 1972 exploring five pioneering cases a friendship between a Slovak artist and a French critic an artistic credo an exhibition a conceptual proposition and a book She then charts a series of way stations for experimental art from the Soviet bloc between 1972 and 1976 points of distribution between studios private homes galleries and certain cities Finally she investigates convergences a succession of shared exhibitions and events in the second half of the 1970s in locations ranging from Prague

control the pollution of air and water and to manage industrial processes wastes and toxic substances This was the birth of the environmental state With planetary ecological challenges like climate change spiraling out of control and dwarfing the environmental state s classical tasks of environmental management new questions about the transformative capacities of the state are becoming acute today How large is the state s capability to transform enhanced industrial societies into sustainable post carbon societies Do its new environmental functions empower the state to prioritise ecological goals over economic growth Can the state s environmental management capabilities be radicalised to turn it into a sustainability state Can democracies be enhanced to enlarge the state s transformative capacities The Political Prospects of a Sustainability Transformation Moving Beyond the Environmental State explores these and other questions from a variety of theoretical and empirical angles covering the fields of democratic theory theories of the state political economy political sociology rhetoric and political philosophy The chapters in this book were originally published as a special issue of the journal Environmental Politics

A. Bressers,2013-05-29 In an increasingly global community of researchers and practitioners new technologies and communication means have made the transfer of policies from one country or region to another progressively more prevalent There has been a lot of attention in the field of public administration paid to policy transfer and institutional transplantation This book aims to create a better understanding of such transfers in the water management sector These include the adoption of modern water management concepts such as integrated water resources management and forms of water governance which are strongly promoted and sometimes also imposed by various international organizations Transfers also occur within the scope of development aid or for the purpose of creating business opportunities In addition many research organisations consultancies and governmental agencies are involved in cross border work The purpose of this book is therefore to present practical examples of the transfer of modern water management from one locality to another and to critically discuss the transferability of policy and governance concepts by analysing the contextual needs and factors Case studies are included from North America Europe the Middle East and Asia It is argued that in many cases context matters in water management and that there is no panacea or universal concept that can be applied to all countries or regions with different political economic cultural and technological contexts Yet it is also shown that some countries are facing pressing and similar water management issues that cut across national borders and hence the transfer of knowledge may be beneficial *What Next for Sustainable Development?* James Meadowcroft,David Banister,Erling Holden,Oluf Langhelle,Kristin Linnerud,Geoffrey Gilpin,2019 This book examines the international experience with sustainable development since the concept was brought to world wide attention in Our Common Future the 1987 report of the World Commission on Environment and Development Scholars from a variety of disciplinary backgrounds engage with three critical
