chapters ask is contemporary Eurocentric law and international law in particular capable of moving away from its capitalist and colonial legacies established through myriad oceanic abstractions and classifications toward more amphibious legalities. **Environmental Security in the Arctic Ocean** Paul Arthur Berkman, Alexander N. Vylegzhanin, 2012-11-29. This seminal book results from a NATO Advanced Research Workshop at the University of Cambridge with Russian co-directorship enabling the first formal dialogue between NATO and Russia about security issues in the Arctic Ocean. Involving interdisciplinary participation with experts from 17 nations including all of the Arctic states, this workshop itself reflects progress in Arctic cooperation and collaboration. Interests now are awakening globally to take advantage of extensive energy, shipping, fishing and tourism opportunities in the Arctic Ocean as it is being transformed from a permanent sea ice cap to a seasonally ice-free sea. This environmental state change is introducing inherent risks of political, economic and cultural instabilities that are centralized among the Arctic states and indigenous peoples with repercussions globally. Responding with urgency, environmental security is presented as an integrated approach for assessing and responding to the risks as well as the opportunities generated by an environmental state change. In this book, diverse perspectives on environmental security in the Arctic Ocean are shared in chapters from high-level diplomats, parliamentarians and government officials of Arctic and non-Arctic states, leaders of Arctic indigenous peoples, organizations, international law advisors from Arctic states as well as the United Nations, directors of intergovernmental organizations and non-governmental organizations, managers of multi-national corporations, political scientists, historians and economists along with Earth system scientists and oceanographers. Building on the common Arctic issues of sustainable development and environmental protection established by the Arctic Council, environmental security offers an holistic approach to assess opportunities and risks as well as develop infrastructure responses with law of the sea as the key international legal framework to promote the peaceful uses of the Arctic Ocean. With vision for future generations, environmental security is a path to balance national interests and common interests in the Arctic Ocean for the lasting benefit of all.
