Governing International Watercourses Governing International Watercourses:

Governing International Watercourses Susanne Schmeier, 2013 In this contribution to the academic and policy debates surrounding the management and governance of shared natural resources the focus is placed on River Basin Organizations as the key institutions for managing internationally shared water resources The book includes advice to policy makers based on worldwide analysis and three detailed case studies from three continents the Senegal West Africa Mekong South east Asia and Danube Europe rivers

Governing International Watercourses, 2012 *The Principle of Integration in International Watercourse Cooperation Regimes* Pol Pallàs Secall, 2025-06-19 The principle of integration is the backbone of sustainable development yet its practical application remains elusive How can States integrate the economic social and environmental dimensions in the governance of common goods This book seeks to address this question by examining a particularly sensitive domain of cooperation the international watercourses From the Mekong to the Senegal River and from the Great Lakes to the Danube it analyses the legal and institutional instruments of nine international watercourse cooperation regimes to determine how the principle of integration is put into practice This book finds that there are several instruments underutilised or entirely unused offering potential opportunities for improvement

The Law of International Watercourses Stephen C. McCaffrey, 2019-02-21 The Law of International Watercourses is an authoritative guide to the rules of international law governing the navigational and non navigational uses of international rivers lakes and groundwater The continued growth of the world's population places increasing demands on Earth's finite supplies of fresh water Because two or more States share many of the world's most important drainage basins including the Danube the Ganges the Indus the Jordan the Mekong the Nile the Rhine and the Tigris Euphrates competition for increasingly scarce fresh water resources will only increase Agreements between the States sharing international watercourses are negotiated and disputes over shared water are resolved against the backdrop of the rules of international law governing the use of this precious resource The basic legal rules governing the use of shared freshwater for purposes other than navigation are reflected in the 1997 UN Convention on the Law of the Non Navigational Uses of International Watercourses This book devotes a chapter to the 1997 Convention but also examines the factual and legal context in which the Convention should be understood considers the more important rules of the Convention in some depth and discusses specific issues that could not be addressed in a framework instrument of that kind The book reviews the major cases and controversies concerning international watercourses as a background against which to consider the basic substantive and procedural rights and obligations of States in the field The third edition covers the implications of the 1997 Convention coming into force in August 2014 and the compatibility of the 1997 and 1992 Conventions This edition also updates the entire book adds new material to many of the chapters and adds a number of new case studies including Pulp Mills on the River Uruguay Argentina v Uruguay and Certain Activities carried out by Nicaragua in the Border Area Costa Rica v Nicaragua amongst others

The Community of Interest Approach in

International Water Law Julie Gjørtz Howden, 2020-06-02 In *The Community of Interest Approach in International Water Law* Julie Gjörtz Howden identifies the normative elements of the community of interest approach COIA in international water law and demonstrates how the approach can provide a legal framework for common management of international watercourses Through analyses of various features of international watercourse cooperation and common management the book determines the main principles and the underlying values of the COIA and discusses how the approach contributes to the development of international water law Although the COIA is one of the central theories of international water law very few analytical accounts of its legal features exist Through *The Community of Interest Approach in International Water Law* Howden offers a new and fresh approach to international water law that pulls together questions of holistic management State sovereignty public participation and river basin organisations into the analyses of the COIA and its relevance for managing transboundary watercourses today

International Watercourses Law and Multilateral Environmental Agreements Yang Liu, 2024-02-06 This book anchors its arguments in Article 20 of the Watercourses Convention and explores consistencies and inconsistencies in parallel definitions substantive and procedural obligations and institutional arrangements in IWL and the Ramsar and Biodiversity Conventions with respect to the protection and preservation of ecosystems of shared inland waters Dr Yang Liu argues that the all around informed and integrated application of IWL and MEAs is essential for the effective protection and preservation of shared inland water ecosystems However the degree of cross fertilization of parallel provisions should be examined on a case by case basis in light of the legal analytical framework deployed in this study

Environmental Protection of International Watercourses under International Law Owen McIntyre, 2016-05-13 McIntyre's work explains the legal means by which requirements of environmental protection influence the determination of a reasonable and equitable regime for allocating rights to riparian states to utilize shared freshwater resources The work examines the means and processes by which environmental considerations can act upon the operation of the principle of equitable utilization The volume provides a comprehensive analysis of the subject outlining the development scope and operation in general and customary international law of key rules of environmental protection

Sharing water, sharing benefits Wolf, Aaron T., 2010-06-06 *Environmental Protection of International Watercourses under International Law* Dr Owen McIntyre, 2013-01-28 McIntyre's work explains the legal means by which requirements of environmental protection influence the determination of a reasonable and equitable regime for allocating rights to riparian states to utilize shared freshwater resources

River Basin Organizations in Water Diplomacy Anoulak Kittikhoun, Susanne Schmeier, 2020-11-19 Will tensions and disputes among states sharing international water courses and lakes turn into active conflicts Addressing this question the book shows that these concerns are more prominent due to the locations and underlying political dynamics of some of these large rivers and the strategic interests of major powers Written by a combination of leading practitioners and academics this book shows that states are more prone to cooperate and manage

their transboundary issues over the use of their common water resources through peaceful means and the key institutions they employ are international river basin organizations RBOs Far from being mere technical institutions RBOs are key mechanisms of water diplomacy with capacity and effectiveness varying on four key interrelated factors their legal and institutional development and the influence of their technical and strategic resources The basins analyzed span all continents from both developed and developing basins including the Columbia Great Lakes Colorado Senegal Niger Nile Congo Jordan Helmand Aral Sea Mekong Danube and Rhine Contributing to the academic discourse on transboundary water management and water conflict and cooperation the book provides insights to policy makers on which water diplomacy engagements can be successful the strengths to build on and the pitfalls to avoid so that shared water resources are managed in a cooperative sustainable and stable way

The UN Watercourses Convention in Force Flavia Rocha Loures, Alistair

Rieu-Clarke, 2013-09-11 At the UN General Assembly in 1997 an overwhelming majority of States voted for the adoption of the United Nations Convention on the Law of the Non Navigational Uses of International Watercourses a global overarching framework governing the rights and duties of States sharing freshwater systems Globally there are 263 internationally shared watersheds which drain the territories of 145 countries and represent more than forty percent of the Earth's land surface Hence inter State cooperation towards the sustainable management of transboundary water supplies in accordance with applicable international legal instruments is a topic of crucial importance especially in the context of the current global water crisis This volume provides an assessment of the role and relevance of the UN Watercourses Convention and describes and evaluates its entry into force as a key component of transboundary water governance To date the Convention still requires further contracting States before it can enter into force The authors describe the drafting and negotiation of the Convention and its relationship to other multilateral environmental agreements A series of case studies assess the role of the Convention at various levels regional European Union East Africa West Africa Central Asia Central America and South America river basin e.g. the Mekong and Congo and national e.g. Ethiopia and Mexico The book concludes by proposing how future implementation might further strengthen international cooperation in the management of water resources to promote biodiversity conservation as well as sustainable and equitable use

Governing the Nile River Basin Mwangi Kimenyi, John Mbaku, 2015-02-12 The effective and efficient management of water is a major problem not just for economic growth and development in the Nile River basin but also for the peaceful coexistence of the millions of people who live in the region Of critical importance to the people of this part of Africa is the reasonable equitable and sustainable management of the waters of the Nile River and its tributaries Written by scholars trained in economics and law and with significant experience in African political economy this book explores new ways to deal with conflict over the allocation of the waters of the Nile River and its tributaries The monograph provides policymakers in the Nile River riparian states and other stakeholders with practical and effective policy options for dealing with what has become a very contentious problem the effective management of the waters of the Nile River The analysis is quite rigorous but also extremely accessible

Transboundary Water Cooperation Patricia Wouters, Huiping Chen, James E. Nickum, 2018-10-15 China and its neighbours face a series of water security issues in which international law plays a vital role Paramount to both policymakers and researchers in the field of water law the current status of transboundary water cooperation schemes and how these operate in China is of global significance Grounded in international experience this comprehensive volume provides readers with an up to date overview of current international transboundary water resource sharing policies and practices including detailed case studies at both domestic and international levels The authors discuss existing international laws treaties and principles that may stimulate transboundary water cooperation and dialogue and then analyse a number of international experiences with treaties in North America Eastern Europe and Central Asia They take stock of China's water resource issues legal practices and options examine case studies of China's southern shared rivers and explore some innovative approaches to cooperative management of shared waters within China The articles in this book were originally published in the journal *Water International*

Satow's Diplomatic Practice Ivor Roberts, 2018-02 An indispensable guide for anyone working in or studying the field of diplomacy this seventh centenary edition of Satow's *Diplomatic Practice* provides a comprehensive overview and analysis of all areas of diplomacy and diplomatic practice

Satow's Diplomatic Practice Ernest Mason Satow, 2017 First published in 1917 Satow's *Diplomatic Practice* has long been hailed as a classic and authoritative text An indispensable guide for anyone working in or studying the field of diplomacy this seventh centenary edition builds on the extensive revision in the sixth edition The volume provides an enlarged and updated section on the history of diplomacy including the exponential growth in multilateral diplomacy and revises comprehensively the practice of diplomacy and the corpus of diplomatic and international law since the end of the Cold War It traces the substantial expansion in numbers both of sovereign states and international and regional organisations and features detailed chapters on diplomatic privileges and immunities diplomatic missions and

consular matters treaty making and conferences The volume also examines alternative forms of diplomacy from the work of NGOs to the use of secret envoys as well as a study of the interaction with intelligence agencies and commercial security firms It also discusses the impact of international terrorism and other violent non state actors on the life and work of a diplomat Finally in recognition of the speed of changes in the field over the last ten years this seventh edition examines the developments and challenges of modern diplomacy through new chapters on human rights and public digital diplomacy by experts in their respective fields

Water Law Joseph W. Dellapenna, Joyeeta Gupta, 2021-08-31 This volume of the Elgar Encyclopedia of Environmental Law provides thorough and detailed coverage of the changing meanings and roles of water law from the local to the global It examines the rules of ownership rights of use and dispute resolution that address access allocation and protection of water resources Written by leading scholars and practitioners from across the globe this authoritative volume will be a vital resource for all scholars and students of environmental law

The Water Legacies of Conventional Mining James E. Nickum, David B. Brooks, Anthony Turton, Surina Esterhuyse, 2018-10-15 The impact of mining is too big to ignore in a world of oversubscribed water This is true of conventional mining as much as or even more than hydraulic fracturing fracking The legacy issues of such mining on water have not been fully appreciated especially the irretrievable effects mining has had on communities and ecosystems around the world through its impact on water Yet this is not an us or them problem the wealth influence and technical knowledge of mining interests can and must be part of the solution All of the contributions to this volume either consider the deficiencies of existing governance structures and the need for better ones or explore the use of new techniques to identify and evaluate social and environmental impacts The chapters in this book were originally published in the journal **Water International**

World Court Digest, 2002-08-05 The World Court Digest continues the *Fontes Iuris Gentium* a series that presents the decisions of the Permanent Court of International Justice up to 1990 The new volume covers the period from 1996 to 2000 All important pronouncements of the Court in its judgments and advisory opinions are systematically arranged under specific topics taken from substantive and procedural international law The World Court Digest provides reliable access to the decisions of the most significant international judicial organ on questions as important as the aerial incident at Lockerbie the crimes of genocide in Bosnia and Herzegovina as well as the use of nuclear weapons and the use of force in the Yugoslavian context

Defining Effective Transboundary Water Cooperation Melissa McCracken, 2022-03-30 This book establishes a framework for defining transboundary water cooperation and a methodology for evaluating its effectiveness which will contribute to more effective and therefore successful cooperation processes With the increasing focus on transboundary cooperation as a part of the Sustainable Development Goal Framework there is global recognition of transboundary water cooperation as a tool for improved governance and management of transboundary surface and groundwaters However there is not an agreed upon definition of transboundary water cooperation in the literature or in practice This book develops the Four Frames of

Transboundary Water Cooperation which is a neutral modular framework for developing context specific explanatory definitions of transboundary water cooperation in basins and aquifers The Four Frames of Cooperation are legal institutional relational and outcome However we need to move beyond defining cooperation to understand better measures of the quality and effectiveness of cooperative processes The Weighted Model of Effective Cooperation presents a first step in qualitatively evaluating the effectiveness of transboundary water cooperation This model defines effective transboundary water cooperation and operationalizes a method to evaluate the effectiveness of cooperative processes over internationally shared waters Effective cooperation emphasizes the relational and outcome frames of cooperation while working towards equitability and sustainability Together the Four Frames of Cooperation and the Weighted Model of Effective Cooperation will improve the understanding of cooperation and encourage a detailed evaluation of the quality success and effectiveness of cooperative processes This book will be of great interest to students and scholars of water resource management water governance and environmental politics It will also appeal to policymakers and professionals working in the fields of water conflict water diplomacy and international cooperation
